The Regime Change Consensus Joseph Stieb, 2021-07-08 Why did the United States invade Iraq setting off a chain of events that profoundly changed the Middle East and the US global position The Regime Change Consensus offers a compelling look at how the United States pivoted from a policy of containment to regime change in Iraq after September 11 2001 Starting with the Persian Gulf War the book traces how a coalition of political actors argued with increasing success that the totalitarian nature of Saddam Hussein's regime and the untrustworthy behavior of the international coalition behind sanctions meant that containment was a doomed policy By the end of the 1990s a consensus belief emerged that only regime change and democratization could fully address the Iraqi threat Through careful examination Joseph Stieb expands our understanding of the origins of the Iraq War while also explaining why so many politicians and policymakers rejected containment after 9 11 and embraced regime change *Reporting Genocide* David Patrick, 2017-12-13 The Western world's responses to genocide have been slow unwieldy and sometimes unfit for purpose So argues David Patrick in this essential new contribution to the aid and intervention debate While the UK and US have historically been committed to the ideals of human rights freedom and equality their actual material reactions are more usually dictated by geopolitical noise pre conceived ideas of worth and the media attention spans of individual elected leaders Utilizing a wide ranging quantitative analysis of media reporting across the globe Patrick argues that an over reliance on the Holocaust as the framing device we use to try and come to terms with such horrors can lead to slow responses misinterpretation and category errors in both Rwanda and Bosnia much energy was expended trying to ascertain whether these regions qualified for genocide status The Reporting of Genocide demonstrates how such tragedies are reduced to stereotypes in the media framed in terms of innocent victims and brutal oppressors which can over simplify the situation on the ground This in turn can lead to mixed and inadequate responses from governments Reporting on Genocide also seeks to address how responses to genocides across the

globe can be improved and will be essential reading for policy makers and for scholars of genocide and the media

Making Human Matthew S. Weinert, 2015-02-20

Differences between human beings have long been used to justify a range of degrading exclusionary and murderous practices that strip people of their humanity and dignity While considerable scholarship has been devoted to such dehumanization Matthew S Weinert asks how we might conceive its reverse humanization or what it means to make human Weinert proposes an account of making human centered on five mechanisms reflection recognition resistance replication of dominant mores and responsibility Examining cases such as the UN Security Council's engagements with crises and the International Court of Justice's grappling with Kosovo's unilateral declaration of independence he illustrates the distinct and contingent ways these mechanisms have been deployed Theoretically the cases evince a complex evolving relationship between state centric and human centric views of society ultimately revealing the normative potentialities of both Though the case studies concern specific human relations issues on an international level Weinert argues in favor of starting from the shared problem of being

human and of living in a world in which the humanity of countless groups has been demeaned or denied Working outward from that point he proposes we obtain a more pragmatically grounded understanding of the social construction of the human being

Civilian Protection in Armed Conflicts Robert Schütte, 2014-10-29 The study analyzes three themes first the evolution of the concept of civilians in the course of human history and secondly the situation and victimization of civilians in armed conflict since 1990 and third how the international community since the end of the Cold War to protect civilians has monitored by the mandating robust UN peacekeeping missions The United Nations Mission in the Congo functions as a case study

Genocide: A Thematic Approach Thomas Earl Porter, John Cox, 2025-04-08 The purpose of this volume is not simply to compile yet another wearying chronicle of the horrors that have been committed by our fellow human beings Most students who register for a course on Genocide assume that it will focus perhaps exclusively on the Holocaust the case with which they are most familiar Many of them have read Elie Wiesel s eloquent masterpiece Night in secondary school and some may have read The Diary of Anne Frank A few students might even know that a genocide occurred in Rwanda or Darfur Like most people however they equate genocide simply with mass killing and assume that genocide must by definition entail millions of deaths Raphael Lemkin who coined the word genocide meaning literally to kill a people originally defined it a colonial crime of destroying the national patterns of the oppressed and imposing the national patterns of the oppressors This was a process Lemkin said deliberately intending to destroy a people s culture that could sometimes but not necessarily always result in mass murder Students need to know that after World War II the great powers undermined and co opted the process of writing the 1948 Genocide Convention at the UN because these nations did not want their own colonial crimes oppression of minorities and destructions of cultures to be included in the definition Instead they simply used the Holocaust as a template and succeeded in distorting what Lemkin originally meant by genocide the murder of a people by destroying their social and cultural connections

Teaching Multiwriting Robert L. Davis, Mark F Shadle, 2007-04-23 Formulaic ways to train students in composition and rhetoric are no longer effective say authors Robert L Davis and Mark F Shadle Scholar teachers must instead reinvent the field from the inside *Teaching Multiwriting Researching and Composing with Multiple Genres Media Disciplines and Cultures* presents just such a reinvention with multiwriting an alternative open approach to composition Seeking to open the minds of both writers and readers to new understandings the authors argue for the supplanting of the outdated research paper assignment with research projects that use multiple forms to explore questions that cannot be fully answered This innovative volume geared to composition teachers at all levels includes sixteen helpful illustrations and provides classroom exercises and projects for each chapter

Warning Signs of Genocide E.N. Anderson, Barbara A. Anderson, 2013 Genocide occurs when a government attempts to exterminate systematically a large

percentage of its own citizens or subjects simply because they fall into a particular group defined by religion ethnicity political affiliation or rarely other group identification ranging from occupation to gender status Genocide has been a major cause of death worldwide over the last 100 years or more and is far from being eliminated Through examining available cases Warning Signs of Genocide An Anthropological Perspective shows that genocide becomes a live danger when group hatreds especially religious ethnic and political are exploited by political regimes as major ways of seizing and maintaining power Genocide is actually invoked however only when such regimes feel they are threatened usually either because they are new and not consolidated in power or because they are challenged by local rebellions civil war or less often international war or major economic decline Knowing these warning signs should make the international community take note that genocide is virtually certain to occur and take action to stop it This book joins others in noting that the international community has rarely intervened in time and in the hope that these findings will encourage more prompt action
