## **New Know Nothings The Political Foes Of The Scientific Study Of Human Nature:**

The New Know-nothings Morton M. Hunt, 1999 Morton Hunt gives us the first serious overview of this threat to behavioral and social science research He illustrates precisely how scientific research has been subjected to political attack The New Know Nothings illustrates this phenomenon using in depth case histories and background discussions of the conflicting social forces involved It considers the prevalence of each form of opposition to research using interviews with expert observers in the sciences and government

**The New Know-nothings** Morton Hunt, 2017-09-29 In recent years political religious and other special interest groups have waged war on behavioral and social research projects that threaten their interests and values They have hounded researchers out of universities cut off their funding through congressional and state legislative pressure and harassed them with public demonstrations and picketing all in the hope of forcing them to abandon their research Formerly such unwanted involvement came from activists on the left Now it comes from all across the political spectrum as anti science attitudes and techniques have diffused throughout society In addition conservative and religious forces lobby Congress and state legislatures against funding for major research projects of which they disapprove This phenomenon represents a grave threat to both scientific freedom and the well being of modern society Morton Hunt gives us the first serious overview of this threat to behavioral and social science research He illustrates precisely how scientific research has been subjected to political attack The New Know Nothings illustrates this phenomenon using in depth case histories and background discussions of the conflicting social forces involved It considers the prevalence of each form of opposition of research has been subjected to political attack The New Know Nothings illustrates this phenomenon using in depth case histories and background discussions of the conflicting social forces involved It considers the prevalence of each form of opposition to research using interviews with expert observers in the sciences and government Hunt reviews the nature nurture debate biological contributions to gender differences conservative opposition to sex research in the schools the debate over the controlled drinking approach to alcoholism animal rights versus scientists rights to use animals in research the controversy over day care anthropological research needs versus the Native American repatriation of re

The Blank Slate Steven Pinker, 2003-08-26 A brilliant inquiry into the origins of human nature from the author of *Rationality The Better Angels of Our Nature* and *Enlightenment Now* Sweeping erudite sharply argued and fun to read also highly persuasive Time Finalist for the Pulitzer Prize Updated with a new afterword One of the world's leading experts on language and the mind explores the idea of human nature and its moral emotional and political colorings With characteristic wit lucidity and insight Pinker argues that the dogma that the mind has no innate traits a doctrine held by many intellectuals during the past century denies our common humanity and our individual preferences replaces objective analyses of social problems with feel good slogans and distorts our understanding of politics violence parenting and the arts Injecting calm and rationality into debates that are notorious for ax grinding and mud slinging Pinker shows the importance of an honest acknowledgment of

human nature based on science and common sense      *When Everyone Knows That Everyone Knows . . .* Steven Pinker, 2025-09-23 From one of the world's most celebrated intellectuals a brilliantly insightful work that explains how we think about each other's thoughts about each other's thoughts ad infinitum It sounds impossible but Steven Pinker shows that we do it all the time This awareness which we experience as something that is public or out there is called common knowledge and it has a momentous impact on our social political and economic lives Common knowledge is necessary for coordination for making arbitrary but complementary choices like driving on the right using paper currency and coalescing behind a political leader or movement It's also necessary for social coordination everything from rendezvousing at a time and place to speaking the same language to forming enduring relationships of friendship romance or authority Humans have a sixth sense for common knowledge and we create it with signals like laughter tears blushing eye contact and blunt speech But people also go to great lengths to avoid common knowledge to ensure that even if everyone knows something they can't know that everyone else knows they know it And so we get rituals like benign hypocrisy veiled bribes and threats sexual innuendo and pretending not to see the elephant in the room Pinker shows how the hidden logic of common knowledge can make sense of many of life's enigmas financial bubbles and crashes revolutions that come out of nowhere the posturing and pretense of diplomacy the eruption of social media shaming mobs and academic cancel culture the awkwardness of a first date Artists and humorists have long mined the intrigues of common knowledge and Pinker liberally uses their novels jokes cartoons films and sitcom dialogues to illuminate social life's tragedies and comedies Along the way he answers questions like Why do people hoard toilet paper at the first sign of an emergency Why are Super Bowl ads filled with ads for crypto Why in American presidential primary voting do citizens typically select the candidate they believe is preferred by others rather than their favorite Why did Russian authorities arrest a protester who carried a blank sign Why is it so hard for nervous lovers to say goodbye at the end of a phone call Why does everyone agree that if we were completely honest all the time life would be unbearable Consistently riveting in explaining the paradoxes of human behavior *When Everyone Knows That Everyone Knows* invites us to understand the ways we try to get into each other's heads and the harmonies hypocrisies and outrages that result      Research in the Social Scientific Study of Religion Joanne Marie Greer, David O. Moberg, 2001-04 Various articles are presented covering psychological sociological and cross cultural topics or relevance to religious spiritual researchers and academics      **Research in the Social Scientific Study of Religion, Volume 11** Joanne Marie Greer, David O. Moberg, 2021-11-22 The purpose of this book is to provide an outlet for original research articles examining the role and value of religious and spiritual constructs across the social sciences The aim of the series is to include an international and interfaith voice to this research dialogue An effort is made to be interdisciplinary and academically eclectic The articles in each volume represent a wide array of perspectives and research projects Most of the articles report the findings of quantitative or qualitative investigations but some deal with methodology theory or applications of social science

studies in the field of religion and some are applied demonstrating the relevance of the social sciences to religious organizations and their clergy The value of the volume is that it gives to researchers in this area a broad perspective on the issues and methods of religious research across a spectrum of academic disciplines The aim of the book is to stimulate a creative integrative dialogue that will enhance interdisciplinary research

**Ideological and Political Bias in Psychology**

Craig L. Frisby, Richard E. Redding, William T. O'Donohue, Scott O. Lilienfeld, 2023-09-13 This book examines the traditional assumptions made by academics and professionals alike that have embedded sociopolitical biases that impede practice and undermine efforts to achieve an objective scientific status If allowed to go unchallenged the credibility of psychology as a discipline is compromised This contributed volume thoroughly and comprehensively examines this concern in a conceptually and empirically rigorous manner and offers constructive solutions for minimizing undue political influences within the field of psychology Societies in the 21st century desperately need reliable psychological science but we don't have it This important volume explains one of the main reasons why we are making little progress on any issue that gets contaminated by the left right culture war because the field of psychology is an enthusiastic member of one of the two teams so it rejects findings and researchers who question its ideological commitments The authors of this engaging volume also show us the way out They diagnose the social dynamics of bias and point to reforms that would give us the psychology that we need to address 21st century problems Jonathan Haidt Thomas Cooley Professor of Ethical Leadership NYU Stern School of Business and author of The Righteous Mind The boundaries of free speech censorship moral cultures social justice and ideological biases are among the many incendiary topics discussed in this book If you are looking for a deep dive into real world contemporary controversies Ideological and Political Bias in Psychology fits the bill The chapters are thoughtful and thought provoking Most readers will find something to agree with and something to rage at in almost every chapter It just may change how you think about some of these topics Diane F Halpern Professor of Psychology Emerita Claremont McKenna College and Past President American Psychological Association Unless the political left is always correct about everything in which case we wouldn't need to do research we could just ask a leftist the growing political monoculture of social science is a major barrier to our search for the truth This volume shows how ideological bias should be treated as a source of research error up there with classic methodological flaws like non random assignment and non blind measurement Steven Pinker Johnstone Professor of Psychology Harvard University and the author of Rationality An important read for academics curious about how their politics fashions beliefs that too often are uncritically taken for granted and for non academics wondering why we can't shake off the politics that so influences scientific work Vernon Smith Nobel Laureate in Economic Sciences and George L. Argyros Chair in Finance and Economics Chapman University Advances and deepens empirically rigorous scholarship into biased political influences affecting academic and professional psychology Offers constructive solutions for minimizing undue political influences within psychology and moving the field forward Serves as a resource for psychological academicians

researchers practitioners and consultants seeking to restore the principles of accurate science and effective practice to their respective areas of research

**Evolution Science and Ethics in the Third Millennium** Robert Cliquet, Dragana Avramov, 2018-01-10 The book aims to revitalise the interdisciplinary debate about evolutionary ethics and substantiate the idea that evolution science can provide a rational and robust framework for understanding morality It also traces pathways for knowledge based choices to be made about directions for future long term biological evolution and cultural development in view of adaptation to the expected probable and possible future and the ecological sustainability of our planetary environment The authors discuss ethical challenges associated with the major biosocial sources of human variation individual variation inter personal variation inter group variation and inter generational variation This book approaches the long term challenges of the human species in a holistic way Researchers will find an extensive discussion of the key theoretical scientific aspects of the relationship between evolution and morality Policy makers will find information that can help them better understand from where we are coming and inspire them to make choices and take actions in a longer term perspective The general public will find food for thoughts

**Scientific Pollyannaism** Oksana Yakushko, 2019-06-24 This book argues that the story of the orphan girl Pollyanna namely her strategy of playing the glad games to manage loss abuse and social prejudice serves as a framework for critiquing historical forms of Western scientific Pollyannaism The author examines Pollyannaism as it relates to the sciences demonstrating how the approach has been used throughout modern Western history to enforce happiness and to criticize negative human emotional states These efforts carried out by scientists and popularized as scientific focus on negating the role of the environment and on promoting varied forms of emotional control Ultimately the book emphasizes strategies used to compel individuals into becoming Pollyannas about science itself

Neuroethics Martha J. Farah, 2010-07-16 Explores the ethical legal and societal issues arising from brain imaging psychopharmacology and other new developments in neuroscience Neuroscience increasingly allows us to explain predict and even control aspects of human behavior The ethical issues that arise from these developments extend beyond the boundaries of conventional bioethics into philosophy of mind psychology theology public policy and the law This broader set of concerns is the subject matter of neuroethics In this book leading neuroscientist Martha Farah introduces the

reader to the key issues of neuroethics placing them in scientific and cultural context and presenting a carefully chosen set of essays articles and excerpts from longer works that explore specific problems in neuroethics from the perspectives of a diverse set of authors Included are writings by such leading scientists philosophers and legal scholars as Carl Elliot Joshua Greene Steven Hyman Peter Kramer and Elizabeth Phelps Topics include the ethical dilemmas of cognitive enhancement issues of personality memory and identity the ability of brain imaging to both persuade and reveal the legal implications of neuroscience and the many ways in which neuroscience challenges our conception of what it means to be a person

Neuroethics is an essential guide to the most intellectually challenging and socially significant issues at the interface of neuroscience and society Farah s clear writing and well chosen readings will be appreciated by scientist and humanist alike and the inclusion of questions for discussion in each section makes the book suitable for classroom use Contributors Zenab Amin Ofek Bar Ilan Richard G Boire Philip Campbell Turhan Canli Jonathan Cohen Robert Cook Degan Lawrence H Diller Carl Elliott Martha J Farah Rod Flower Kenneth R Foster Howard Gardner Michael Gazzaniga Jeremy R Gray Henry Greely Joshua Greene John Harris Andrea S Heberlein Steven E Hyman Judy Iles Eric Kandel Ronald C Kessler Patricia King Adam J Kolber Peter D Kramer Daniel D Langleben Steven Laureys Stephen J Morse Nancey Murphy Eric Parens Sidney Perkowitz Elizabeth A Phelps President s Council on Bioethics Eric Racine Barbara Sahakian Laura A Thomas Paul M Thompson Stacey A Tovino Paul Root Wolpe

Modernity and Cultural Decline Matthew Alexandar Sarraf, Michael Anthony Woodley of Menie, Colin Feltham, 2019-12-05 This book argues that despite the many real advantages that industrial modernity has yielded including large gains in wealth longevity and possibly happiness it has occurred together with the appearance of a variety of serious problems Chief among these are probable losses in subjective existential purpose and increases in psychopathology A highly original theory of the ultimate basis of these trends is advanced which unites prior work in psychometrics and evolutionary science This theory builds on the social epistasis amplification model to argue that genetic and epigenetic changes in modernizing and modernized populations stemming from shifts in selective pressures related to industrialization have lowered human fitness and wellness

*The New Know-nothings* Morton Hunt, 2017 In recent years political religious and other special interest groups have waged war on behavioral and social research projects that threaten their interests and values They have hounded researchers out of universities cut off their funding through congressional and state legislative pressure and harassed them with public demonstrations and picketing all in the hope of forcing them to abandon their research Formerly such unwanted involvement came from activists on the left Now it comes from all across the political spectrum as anti science attitudes and techniques have diffused throughout society In addition conservative and religious forces lobby Congress and state legislatures against funding for major research projects of which they disapprove This phenomenon represents a grave threat to both scientific freedom and the well being of modern society Morton Hunt gives us the first serious overview of this threat to behavioral and social science research He illustrates precisely how

scientific research has been subjected to political attack The New Know Nothings illustrates this phenomenon using in depth case histories and background discussions of the conflicting social forces involved It considers the prevalence of each form of opposition of research has been subjected to political attack The New Know Nothings illustrates this phenomenon using in depth case histories and background discussions of the conflicting social forces involved It considers the prevalence of each form of opposition to research using interviews with expert observers in the sciences and government Hunt reviews the nature nurture debate biological contributions to gender differences conservative opposition to sex research in the schools the debate over the controlled drinking approach to alcoholism animal rights versus scientists rights to use animals in research the controversy over day care anthropological research needs versus the Native American repatriation of re Provided by publisher *Censoring Sex Research* Thomas K Hubbard,Beert Verstraete,2016-06-16 This volume brings into daylight one of the most explosive episodes of censorship and censure of academic scholarship in recent decades presenting an extended version of Bruce Rind s suppressed essay on sexual relations between male adults and adolescents cross culturally accompanied by twelve essays arguing for or against Rind and analysing the controversy **Personality Theories** Albert Ellis,Mike Abrams,Lidia Abrams,2009 Personality Theories by Albert Ellis the founding father of Rational Emotive Behaviour Therapy provides a comprehensive review of all major theories of personality including theories of personality pathology Importantly it critically reviews each of these theories in light of the competing theories as well as recent research **Research Methods in Social Relations** Geoffrey Maruyama,Carey S. Ryan,2014-06-11 Research Methods in Social Relations 8th Edition features a series of updates and revisions in its comprehensive introduction to current research methods in the social and behavioural sciences Offers comprehensive coverage of a wide variety of traditional and topical research methods Addresses many newer research approaches such as propensity score matching mixed methods designs and confirmatory factor analysis Written to be accessible to a range of social and behavioural science disciplines including public health political science sociology and psychology Includes new chapters that engage readers in critical thinking about the processes involved in building sustainable partnerships in field and community settings The Companion website includes an array of resources for Instructors including Test Banks Power Point lecture slides discussion questions and exercises This new edition is the much anticipated follow up to 2001 s seventh edition by Hoyle Harris and Judd **The Sexual Self** Michael S. Kimmel,2007 Abstract **A History of the Behavioral Therapies** William O'Donohue,Deborah Henderson,Steven Hayes,Jane Fisher,Linda Hayes,2001-04-01 In this unique work eighteen of the most influential and significant figures in the various subareas of behavior therapy from behavior analysis through cognitive therapy are brought together to discuss their work and the sources and influences that affected it At times moving profound and humorous it casts a new and perhaps more human light on the most influential movement in behavioral health in the latter part of the 20th century These intellectual biographies range in tone and intensity as each author uses their own

particular style to convey their views about the field and their individual impact on it For those interested in the behavioral and cognitive movement this book is a must have since it is the only book to have chronicled the individual histories of the founders of the applied behavioral movement before they are lost forever **The Skeptical Inquirer**, 2003 **Science and the Production of Ignorance** Janet Kourany, Martin Carrier, 2020-02-18 An introduction to the new area of ignorance studies that examines how science produces ignorance both actively and passively intentionally and unintentionally We may think of science as our foremost producer of knowledge but for the past decade science has also been studied as an important source of ignorance The historian of science Robert Proctor has coined the term agnotology to refer to the study of ignorance and much of the ignorance studied in this new area is produced by science Whether an active or passive construct intended or unintended this ignorance is in Proctor's words made maintained and manipulated by science This volume examines forms of scientific ignorance and their consequences A dialogue between Proctor and Peter Galison offers historical context presenting the concerns and motivations of pioneers in the field Essays by leading historians and philosophers of science examine the active construction of ignorance by biased design and interpretation of experiments and empirical studies as seen in the false advertising by climate change deniers the virtuous construction of ignorance for example by curtailing research on race and gender related cognitive differences and ignorance as the unintended by product of choices made in the research process when rules incentives and methods encourage an emphasis on the beneficial and commercial effects of industrial chemicals and when certain concepts and even certain groups interests are inaccessible in a given conceptual framework Contributors Martin Carrier Carl F Cranor Peter Galison Paul Hoyningen Huene Philip Kitcher Janet Kourany Hugh Lacey Robert Proctor Londa Schiebinger Miriam Solomon Torsten Wilholt
