New Development Strategies Beyond The Washington Consensus:

New Development Strategies A. Kohsaka, 2004-05-24 This edited volume examines the flaws in the Washington Consensus. The missing link identified is the relationship between market and government. The East Asian Miracle showed that the market and government are complementary, particularly with regard to economic development. However, the nature of this relationship has not been fully clarified. This book assesses development strategies and policy issues in the context of individual and/or regional economy's history and political economic reality. The relationship may be conditional to these two factors. With these perceptions in mind, the book focuses on the role and significance of government in economic development in pursuit for new development strategies. *Re-Inventing Africa's Development* Jong-Dae Park, 2018-12-31 This open access book analyses the development problems of sub-Saharan Africa (SSA) from the eyes of a Korean diplomat with knowledge of the economic growth Korea has experienced in recent decades. The author argues that Africa's development challenges are not due to a lack of resources but a lack of management, presenting an alternative to the traditional view that Africa's problems are caused by a lack of leadership. In exploring an approach based on mind set and nation building rather than unity, which tends to promote individual or party interests rather than the broader country or national interests, the author suggests new solutions for SSA's economic growth inspired by Korea's successful economic growth model, much of which is focused on industrialisation. This book will be of interest to researchers, policymakers, NGOs and governmental bodies in economics, development and politics studying Africa's economic development and Korea's economic growth model.

Globalization -

The Juggernaut of the 21st Century Jan-Erik Lane, 2016-04-22 While some people debate whether globalization really exists, it proceeds apace, affecting all societies. It presents us with unknown challenges, and as governments start to discuss what to do about these challenges, it is becoming obvious that globalization is not manageable. With globalization, the juggernaut of the 21st century, all countries of the world become interdependent in relation to the coming energy crisis, climate change, the sharper cleavages between rich and poor countries and people, and the emergence of a multicultural social structure. This interesting and erudite book adopts a distinctive approach to the multiple dimensions of the globalization debate. The impressive coverage of philosophical thought, including Popper, Weber, Habermas, Lipset and Hobbes, makes a valuable contribution to the debates on globalization. *Trouble in the Making?* Mary Hallward-Driemeier, Gaurav Nayyar, 2017-10-12 Technology and globalization are threatening manufacturing's traditional ability to deliver both productivity and jobs at a large scale for unskilled workers. Concerns about widening inequality within and across countries are raising questions about whether interventions are needed and how effective they could be. *Trouble in the Making: The Future of Manufacturing-Led Development* addresses three questions: How has the global manufacturing landscape changed and why does this matter for development opportunities? How are emerging trends in technology and globalization likely to shape the feasibility and desirability of manufacturing-led development in the future? If low wages are going to be less

important in defining competitiveness how can less industrialized countries make the most of new opportunities that shifting technologies and globalization patterns may bring The book examines the impacts of new technologies i e the Internet of Things 3 D printing and advanced robotics rising international competition and increased servicification on manufacturing productivity and employment The aim is to inform policy choices for countries currently producing and for those seeking to enter new manufacturing markets Increased polarization is a risk but the book analyzes ways to go beyond focusing on potential disruptions to position workers firms and locations for new opportunities www.worldbank.org/futureofmanufacturing

Input Trade and Production Networks in East Asia Daisuke Hiratsuka, Yoko Uchida, 2010-01-01 Spatial fragmentation of production is linked with two great waves of unbundling The first one was a century and a half ago when the spatial location of production of goods was separated from their consumption We live in the age of a second unbundling where certain operations within the same factory can be fragmented and performed elsewhere There is trade in certain tasks and components which was made possible by cheaper and better communication and transport This book considers production networks in East Asia which is and will continue to

be the most dynamic economic region in the decades to come Miroslav N Jovanovi University of Geneva Switzerland

Intermediate input trade is regarded as an important contributory factor in explaining the increase in world trade in recent years This timely book presents for the first time meticulous empirical analyses of the growth of input trade and includes detailed studies that capture the main features and characteristics of production networks in East Asia Intermediate input trade has grown markedly in East Asia and at a much faster rate than in the rest of the world Since the early 1990s when technological developments made it possible to separate the production process into many stages East Asia as a region has developed sophisticated production networks in the manufacture of various products Different countries have installed production stages according to their levels of technology or factor endowments and consequently sequential production stages are now located across various countries In order to produce final goods East Asian nations have therefore relied on the trade of inputs back and forth Containing unique and important data this book will appeal to academics researchers and policymakers interested in trade economic integration and Asian studies

Stiglitz, 2001 In controversial speeches made around the world Stiglitz has undone the conventional wisdom that dominated policy making at the World Bank the International Monetary Fund and the US Treasury Department For the first time Stiglitz s nine most revealing speeches have been gathered together covering such topics as the failure of shock therapy and transition economics the limits of capital market liberalization the myopia of the Washington consensus the role of knowledge in markets the process of developing market institutions and the primacy of openness and worker participation A landmark collection of material for economists everywhere

Reinventing the World Bank Jonathan R. Pincus, Jeffrey A. Winters, 2018-08-06 Largely ignored for decades the World Bank increasingly finds itself

at the center of an international political maelstrom Attacked by the Right as the last bastion of socialism and by the Left as an instrument of economic imperialism the Bank has struggled to adapt to a changing post Cold War era Still the world's leading development institution in terms of size and influence the International Bank for Reconstruction and Development's failure to articulate and implement a convincing strategy to reduce world poverty has left it vulnerable to the charge that at least in its present form it has outlived its usefulness In a book neither funded nor controlled by its subject leading North American and British scholars critically examine the World Bank They contend that an institution that has grown to unmanageable proportions through internally driven change cannot realistically be expected to effect its own reform program All the Bank's previous attempts at self redesign have failed and the contributors argue it is beyond reform it must be reinvented Reinvention involves a thoroughgoing and externally controlled process of transformation starting from basic principles and encompassing three closely related dimensions operations or the fit between the Bank's lending program and its development objectives concepts its vision of development and anti poverty strategy and power which includes the Bank's relationships with member countries and the wider public as well as structures of internal governance and accountability
