Rodney L. Reed, 2018-08-14. Everyone who has eyes to see acknowledges the growing importance of the African church to the future of global Christianity. But what does it mean for the church to take root in Africa? How should the message of the gospel and the practice of Christianity be contextualized for Africa? *African Contextual Realities* addresses many of the questions surrounding contextualization from a practical point of view and is the fruit of the 6th Annual Conference of the Africa Society of Evangelical Theology held in Nairobi in 2016. The book explores such questions as: In what ways should the mission of God be universally recognizable in every cultural context? In our efforts to contextualize, how do we avoid compromising the very gospel we are to proclaim? How can the African church wean itself away from dependency on the Western church? How does Christianity speak into some of the cultural and social issues arising out of contemporary African settings, issues like widow cleansing, Christian-Muslim relations and peace building? All those who are interested to learn more about the contextualization of African Christianity will find this volume to be an important resource. **Who Will Care for**

Grandma? Brent R. Kelly, 2009-01-01. It is amazing to realize that much of the Western medical community is in a love-hate relationship with the economics of medicine. Quality Adjusted Life Years (QALYs) is one of the primary methods of guiding many medical decision makers in the allocation of limited medical resources. Herein lies the problem of medicine and economics. It seems that deciding who will receive limited medical resources is a task filled with moral and ethical difficulties even for those depending on the information obtained from QALY calculations. These moral and ethical difficulties are beyond the scope of sound bites that tout the benefits of universal health care, affordable insurance or the safety of the free market economy. The breadth of the difficulty is found in the widespread disagreement concerning how the health care system should be distributed or fixed, since most will agree that there is a problem with distributing medical resources. It seemed obvious that some difficult decisions will need to be made that few are both willing and able to make. This difficulty is particularly true in decisions about health care allocation and that is where QALYs have been found useful and problematic. Limiting medical care for the elderly based upon their age did not occur until the mid twentieth century, possibly because the elderly held a unique position of respect in the Western community. It is no longer the case that the elderly are given a unique

position of respect and dignity Rather it seems that with the increased use of QALY calculations the elderly are in danger of receiving less medical care than they are warranted It is imperative that Christians respond to the ethical implications of significant models of resource allocation that currently assist decision makers in the allocation process such as QALYs

Christian Ethics and Contemporary Moral Problems Michael C. Banner,1999-09-28 This book addresses such key ethical issues as euthanasia the environment biotechnology abortion the family sexual ethics and the distribution of health care resources Michael Banner argues that the task of Christian ethics is to understand the world and humankind in the light of the credal affirmations of the Christian faith and to explicate this understanding in its significance for human action through a critical engagement with the concerns claims and problems of other ethics He illustrates both the distinctiveness of Christian convictions in relation to the above issues and also the critical dialogue with practices based on other convictions which this sense of distinctiveness motivates but does not prevent The book s importance lies in its attempt to show the crucial difference which Christian belief makes to an understanding of these issues whilst at the same time demonstrating some of the weaknesses and confusions of certain popular approaches to them
