New Dimensions Of Warfarin Prophylaxis:

The New Dimensions of Warfarin Prophylaxis Stanford Wessler, 2013-06-29 The International Symposium on The New Dimensions of Warfarin Prophylaxis held on October 16 18 1986 in New York City was conceived as a forum to bring together physicians and other scientists knowledgeable about the pharmacological effects of warfarin on the hemostatic mechanism and the clinical usefulness of this compound in the prevention of thromboembolic phenomena The coumarin compounds have commanded a striking breadth of interest among members of the biomedical research community for almost one half century Aspects of its effects on the vitamin K dependent proteins on the laboratory recognition of the drug's pharmacologic action and its use as a therapeutic agent in a variety of disease states have been actively studied with increasing intensity in the past several decades Thus the present state of these studies seemed to be a timely subject for discussion not only to gather together in one place representative samples of the myriad of data on warfarin but also to underscore the ever increasing necessity for communication between basic research and clinical practice The content and organization of this monograph reflect the scope and importance of warfarin prophylaxis One of the unique aspects of this publication is that it spells out in one place the warfarin story from molecular biology through clinical trials to future directions of research and patient care

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1988 **The New Dimensions of Warfarin Prophylaxis** Stanford Wessler, 2014-01-15 **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *Recent Advances in Mucosal Immunology* Jiri Mestecky, Jerry R. McGhee, John Bienenstock, Pearay L. Ogra, 2012-12-06 Increasing interest in the immunology of mucosal surfaces is obvious from the number of publications in scientific journals and from the frequency of national and international symposia devoted to this subject Particularly encouraging are the large numbers of young investigators who have chosen to work in this area of theoretical immunology with profound practical implications The two volumes represented here are the result of an International Congress Of Mucosal Immunology held at the Niagara Falls Convention Center and the Niagara Falls Hilton on June 29 July 3 1986 This satellite meeting of the International Congress of Immunology placed emphasis on all aspects of the Mucosal Immune System This included the regulation of differentiation of mucosal lymphocytes mucosa associated lymphoreticular tissue and lymphocyte homing the immunology of mucosa associated tissues and glands effector functions in mucosal immunity and the effects of environmental antigens on the immune response all of which are included in Volume I The second volume has emphasized studies of the immune response and effector functions IgA biosynthesis and transport IgA proteases and effector functions developmental aspects and immunodeficiency the immunopathology of IgA and mucosal immunoprophylaxis A total of 218 papers are included in these two volumes and a comparison to past meetings held at four to five year intervals indicates the explosive growth of mucosal immunology Molecular Mechanisms of Neuronal Responsiveness Yigal H. Ehrlich, Robert H. Lenox, Elizabeth Kornecki, William O. Berry, 2013-03-13 The interaction of

neurotransmitters neuromodulators and neuroactive drugs with receptors localized at the cell surface initiates a chain of molecular events leading to integrated neuronal responses to the triggering stimuli Major advancements in the characterization and isolation of receptor molecules have answered many questions regarding the nature of the elements that determine the specificity in these interactions At the same time recent studies have provided evidence that delicate regulation by intracellular enzymatic systems determines the efficiency of the stimulus response coupling process mediates the interaction between receptors operates in feedback control mechanisms and transduces signals from the receptors to various effector sites in a highly coordinated fashion These studies are at the focus of the present volume which is an outcome of a symposium held at the University of Vermont College of Medicine on March 21-23 1986 in conjunction with the seventeenth annual meeting of the American Society for Neurochemistry The symposium has demonstrated clearly that the concerted efforts of investigators in neurophysiology biochemistry pharmacology cell biology molecular genetics neurology and psychiatry are required to achieve better understanding of the processes underlying neuronal responsiveness This volume includes contributions provided by prominent investigators in all these research areas We hope that the readers will find here a useful source of information and ideas for stimulating further studies which may serve to narrow the gap between basic neuroscience research and its clinical implications

Thromboembolic Complications During Infancy and Childhood Maureen Andrew, Paul T. Monagle, LuAnn Brooker, 2000 Every year there are several hundred thousand episodes of neonates and children experiencing thromboembolic incidents These episodes of blood clotting have many causes some congenital but most caused by underlying problems such as arterial disease renal disorders systemic lupus erythematosus or leukemia Many more are caused by therapeutic interventions in critical care The author is a world recognized expert on the topic who has studied thousands of cases Based on this clinical research the author provides guidelines for the proper diagnosis and therapeutic interventions for thrombotic disorders no matter what the cause She covers the newest drug therapies including oral anticoagulation preparations

Regulation of Ovarian and Testicular Function Virendra B. Mahesh, Dharam S. Dhindsa, Everett Anderson, Satya P. Kalra, 2012-12-06 Rapid advances have taken place in various aspects of reproductive biology during the last decade These advances have centered around several organ systems that comprise the reproductive system and encompass molecular events and structure function relationships It becomes important to review these advances in knowledge at periodic intervals with respect to feedback systems and regulatory loops that control reproductive processes in vivo Towards this end a workshop entitled Functional Correlates of Hormone Receptors in Reproduction sponsored by the National Institute of Child Health and Human Development and the Reproductive Biology Study Section of the Division of Research Grants National Institutes of Health was held in October 1980 The proceedings of the workshop were published by Elsevier Biomedical New York This workshop was followed by two workshops sponsored by the Reproductive Biology Study Section of the Division of Research Grants National Institutes of Health entitled Role of

Peptides and Proteins in Control of Reproduction in February 1982 and published by Elsevier Biomedical and Molecular and Cellular Aspects of Reproduction in October 1985 and published by Plenum Press It was therefore timely to review the current state of knowledge regarding the regulation of ovarian and testicular function by bringing together scientists working in separate and discrete aspects of reproduction to review the functional implications of their research on the regulation of function within the same tissue and also in relationship to feedback systems and regulatory loops with other tissues

Oxygen Transport to Tissue IX Haim I. Bicher, Duane F. Bruley, 2013-11-21 These papers stem from the ISOTT Meeting held at Churchill College Cambridge from July 27th to 30th 1986 Although the sun did not shine so brightly as during the Cambridge meeting in 1977 the communications and discussions were as lively and informative and some heat as well as light was generated in the presentation of differing views The meeting was conducted in a generally informal way which allowed maximum time for discussion but the relatively unstructured nature of the debates made them unsuitable for publication The amount of editing necessary meant that the printed version of the exchanges would bear little resemblance to the original hence their omission All the papers presented here have been scrutinized and retyped in a standard format However the diverse interests of ISOTT's members reflected in the wide spectrum of the material submitted made total editorial uniformity an unrealistic goal Complete consistency in the use of symbols abbreviations and units seemed less important than speed of publication

Disorders of Thrombosis and Hemostasis Rodger L. Bick, 2002 Written for a multidisciplinary audience this revision presents current data on antithrombotic therapy including warfarins and heparin delivers practical techniques for diagnosing and treating bleeding and clotting disorders and includes all topics necessary for board review This practical text covers disorders of thrombosis and hemostasis in a logical and sequential manner etiology pathophysiology clinical and laboratory diagnosis and management Also included are diagnostic tests for deep venous thrombosis three new clotting defects hereditary disorders and defects liver and renal diseases cardiovascular events and problems in obstetrical gynecological patients A Brandon Hill recommended title

Continuous Transcutaneous Monitoring Albert Huch, Renate Huch, Gösta Rooth, 2013-03-09 The international symposia on transcutaneous monitoring have dealt with the interaction between ideas and research the introduction of unconventional techniques into clinical practice and the joint efforts of researchers clinicians and industry to design and manufacture practical equipment for noninvasive monitoring The First International Symposium on Continuous Transcutaneous Blood Gas Monitoring took place in Marburg West Germany from May 31 to June 2 1978 This was the first major international meeting exclusively devoted to transcutaneous blood gas monitoring and it was attended by the scientists who had developed this technique or had been working with it by a large number of doctors mainly neonatologists who had just begun to use the technique or hoped to do so and finally a rather large number of representatives of industry The second symposium with the same title was held in Zurich Switzerland October 14-16 1981 This time the focus was to a large extent on transcutaneous PCO₂ monitoring for which

equipment had become 2 commercially available only a short time before Fetal monitoring was also discussed at length as was the use of the transcutaneous techniques in other fields such as vascular surgery and experimental animal research The third symposium October 1 4 1986 was again held in Zurich It was entitled Continuous Transcutaneous Monitoring indicating that not only blood gases but also other parameters could be monitored trans cutaneous ly **Biotechnology of Blood** Jack Goldstein, 2014-06-28 Biotechnology of Blood presents research on applications of biotechnology to blood and its components The book is organized into four parts Part I begins with an overview of the blood business in order to provide background of the industry to identify problems and perhaps some solutions that rely on the scientific advances made possible by biotechnology This is followed by studies on the storage and preservation of red blood cells autologous blood salvage procedures the development procedures to provide a constant supply of blood group O and the development of blood substitutes Part II on plasma fractions includes studies on the preparation of plasma fractions recombinant antihemophilic factors and fibrinogen Part III on the regulation of blood cell products includes studies such as hematopoietic stem cell processing and storage and long term bone marrow cell cultures Part IV on blood borne diseases examines the inactivation of viruses found with plasma proteins and viruses found with cellular components **The Cumulative Book Index**, 1989 A world list of books in the English language Pediatric Anesthesia Bruno Bissonnette, 2014-05-14 No longer merely a subspecialty pediatric anesthesia is now a professional entity in its own right as is amply demonstrated in this comprehensive addition to the medical and surgical literature Pediatric Anesthesia Basic Principles State of the Art Future comprises the contributions of 150 experts in the field from all over the world providing this book with a truly global perspective This textbook will help anesthesiologists already interested in pediatric anesthesia to the knowledge and skills inherent to the safe practice of anesthesia for infants and children The Biology of Taurine Ryan J. Huxtable, F. Franconi, A. Giotti, 2013-11-11 I was pleased and at the same time filled with some misgivings when Professors Alberto Giotti and Ryan Huxtable asked me to introduce this book The book is the outcome of the Symposium held in Firenze San Miniato PI October 6 9 1986 The symposium was entitled Sulfur Amino Acids Peptides and Related Compounds and was the 7th international symposium on taurine and associated substances It is always difficult to introduce with the right brevity and emphasis a topic which has been studied in depth by numerous experts Nevertheless I shall do my best to give a historical perspective of the subjects of the meeting which I consider to be very important for the frontiers of research on taurine the following topics have also become coherent areas of study during the development of research on taurine metabolism nutrition neurochemistry cardiovascular regulation Although taurine was isolated in 1821 by Ledman and Gmelin its only biochemical role known at the time was the synthesis of bile salts in mammalian tissue There has been an increasing interest in the biological action of taurine from metabolic aspects to other biological aspects nutrition development etc In 1975 it was first demonstrated that taurine deprivation produced retinal degeneration in cats more recent studies showed that a taurine free diet or the administration

of taurine transport inhibitors caused retinal degeneration in other mammals More recent studies have pointed out the role of taurine in development and the first part of this book is dedicated to these topics Cumulated Index Medicus ,1965
