**New Directions in Analytical Political Economy** Amitava Krishna Dutt, 1994 New Directions in Analytical Political Economy brings together an important collection of economic research by scholars from a wide range of non neoclassical research traditions This book provides a flavour of recent research in non neoclassical economic theory drawing on classical Marxian post Keynesian and Kaleckian structuralist evolutionary and institutional

approaches using mathematical analysis The papers deal with a variety of themes including unemployment financial crises and business cycles technological change and long run growth value prices and pricing and international terms of trade the role of agriculture foreign exchange and fiscal constraint on growth hyperinflation and wage indexation and stability in mixed economies The contributors base their analysis on the structure history and institutions at hand and not just on ever more elaborate optimizing principles as is fashionable in mainstream economics However they do not turn their backs on mainstream concepts and methods using formal mathematical models to conduct their analysis in a rigorous way Combining a broad approach to economics with mathematically based analysis this important new book will be welcomed by economists wanting to go beyond the boundaries of neoclassical economics without losing the rigour of modern economic theory

Busumtwi-Sam, L.

grow faster than others      Markets, Unemployment and Economic Policy Philip Arestis, Gabriel Palma, Malcolm Sawyer, 2005-10-19 In this volume more than 40 leading economists pay tribute to and critically evaluate Geoff Harcourt's work Contributors include Tony Atkinson Tony Lawson Edward Nell and Ian Steedman      *Non-natural Social Science* Neil De Marchi, 1993 Published in 1989 Philip Mirowski's *More Heat Than Light* Economics as Social Physics Physics as Nature's Economics offered a challenge to historians of economics that could not be ignored Neo-classical economics he said adopted certain analytical tools of mid-nineteenth century physics simply substituting utility for energy and in so doing chose a natural world model which denied that economic knowledge might be essentially social and cultural The essays in this collection represent the first collective effort to respond to Mirowski's challenge by examining and assessing the Mirowski enterprise In addition to questioning the veracity of the connection between physics and economics the contributors consider the far-reaching implications of Mirowski's thesis for the history of economics Mirowski shows that economic texts must be viewed in their relation to texts outside the field of economics and offers an alternative reading of economic texts as social and cultural inscriptions As historians of economics respond to Mirowski's challenge the style and direction of their work will be changed Ultimately a careful assessment of *More Heat Than Light* may introduce historians of economics to recognize that the discipline of economics may not be the most appropriate category from which to proceed Contributors Jack Birner Marcel Boumans A W Coats Avi J Cohen I Bernard Cohen Neil de Marchi Steve Fuller Clifford G Gaddy Wade Hands Albert Jolink Arjo Klammer Robert Leonard Philip Mirowski Theodore M Porter Margaret Schabas E Roy Weintraub      Encyclopedia of Political Economy Phillip O'Hara, 1999-02-04 This groundbreaking Encyclopedia is the very first fully refereed A-Z compendium of the main principles concepts problems institutions schools and policies associated with political economy Based on developments in political economy since the 1960s it is designed to provide a comprehensive introduction to the field as well as being an authority      **Development and Growth in the Mexican Economy** Juan Carlos Moreno-Brid, Jaime Ros, 2009-04-23 This book is the first comprehensive and systematic English language treatment of Mexico's economic history to appear in nearly forty years Drawing on several years of in-depth research Juan Carlos Moreno-Brid and Jaime Ros two of the foremost experts on the Mexican economy examine Mexico's current development policies and problems from a historical perspective They review long-term trends in the Mexican economy and analyze past episodes of radical shifts in development strategy and in the role of markets and the state This book provides an overview of Mexico's economic development since Independence that compares the successive periods of stagnation and growth that alternately have characterized Mexico's economic history It gives special attention to developments since 1940 and it presents a re-evaluation of Mexico's development policies during the State-led industrialization period from 1940 to 1982 as well as during the more recent market reform process This reevaluation is critical of the dominant trend in economic literature and is revisionist in arguing that in particular the market reforms undertaken by successive Mexican governments since 1983 have not addressed

the fundamental obstacles to economic growth Development and Growth in the Mexican Economy also details the country's pioneering role in launching NAFTA its membership in the OECD and its radical macroeconomic reforms Carefully argued and meticulously researched the book presents a wide ranging authoritative study that not only pinpoints problems but also suggests solutions for removing obstacles to economic stability and pointing the Mexican economy toward the road to recovery
