Educational Philosophy and New French Thought David R. Cole, Joff P. N. Bradley, 2019-02-14 Contemporary French philosophy perhaps reached a high point during the 1970s with the likes of Gilles Deleuze Michel Foucault and Jacques Derrida Since that time thinkers such as Francois Laruelle Bernard Stiegler Quentin Meillassoux and Catherine Malabou have continued on in this strong tradition while deepening and rethinking many of the parameters that have made contemporary French philosophy so powerful and useful for understanding the contemporary condition For example new French thought has reengaged with the relationships between thought science and universal commercial interests and has investigated purposefully the possibilities of post capitalist theorising This book while not exhaustive takes the most pertinent aspects of new French thought and applies them to the philosophy of education In contemporary philosophies of education the repetitions of evidence based and neoliberal theories abound This book serves as an antidote to the levelling off and exhaustion in thought that a capitalist takeover implies while keeping sight of the crucial relationships between science the arts and metaphysical speculation Furthermore this book represents a thoroughgoing thinking through of philosophy of education s relationships with neuroscience new scientific paradigms feminist materialisms anti correlationism technology and the socius and as such constitutes a new philosophy of education This book was originally published as a special issue of Educational Philosophy and Theory f and exhaustion in thought that a capitalist takeover implies while keeping sight of the crucial relationships between science the arts and metaphysical speculation Furthermore this book represents a thoroughgoing thinking through of philosophy of education s relationships with neuroscience new scientific paradigms feminist materialisms anti correlationism technology and the socius and as such constitutes a new philosophy of education This book was originally published as a special issue of Educational Philosophy and Theory

Educational Philosophy Edward J. Power, 2021-12-12 The first step in education s long road to respectability lay in the ability of its proponents to demonstrate that it was worthy of collaborating with traditional disciplines in the syllabus of higher learning The universities where the infant discipline of education was promoted benefited from scholars who engaged in teaching and research with enthusiasm and preached the gospel of scientific education These schools Teachers College Columbia University the University of Chicago and Stanford University gained a reputation as oases of pedagogical knowledge Soon public and private colleges alike introduced professional academic programs for the preparation of teachers Foremost among the subjects for these programs was education philosophy with its long history and the impeccable credentials of its ancient and modern expositors Although the principal focus of this study is the history of educational philosophy in colleges and universities it also recognizes educational philosophy s antecedents Chapters cover ancient roots Christian educational

The New Education in Europe Frederick William Roman,2019-05-28 Originally published in 1924 as outlined in the preface this book is based on the belief that the only substantial hope of rescue in the present world crisis and the saving of even civilization itself depend upon the degree to which the creative thought that the coming generations may bring is applied to a continued and purposeful reconstruction of the modes of living The world is in need as never before of stronger and more clearly conceived ideals of conscious effort in the service of humanity The salvation of society must be mined out of its own depths Much of this work must be done by those now at school and therefore we are at once led to inquire to what extent the present systems of education provide for conditions that are provocative of free and spontaneous thought In each of the several countries with which the present study is concerned there is a considerable body of men and women who have undertaken a serious and thoughtful campaign of education The pages that follow attempt to give a summary account of the origin and the likelihood of success of these several undertakings **The New Education in**

Europe Frederick William Roman,1923 Postformal Education Jennifer M. Gidley,2016-08-05 This book explains why the current education model which was developed in the 19th century to meet the needs of industrial expansion is obsolete It points to the need for a new approach to education designed to prepare young people for global uncertainty accelerating change and unprecedented complexity The book offers a new educational philosophy to awaken the creative big picture and long term thinking that will help equip students to face tomorrow s challenges Inside readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today s most evolved education research and practice This dialogue reveals surprising links between play and wisdom imagination and ecology holism and love The overwhelming issues of global climate crisis growing economic disparity and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators This book raises a planet wide call to deeply question how we actually think and how we must educate It articulates a postformal education philosophy as a foundation for

educational futures The book will appeal to educators educational philosophers pre service teacher educators educational and developmental psychologists and educational researchers including postgraduates with an interest in transformational educational theories designed for the complexity of the 21st century This is the most compelling book on education I have read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy

Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past

Gidley s challenge is to co evolve a radically new education All who seek to play a part must read this book

Educational Philosophy in the French Enlightenment Natasha Gill,2016-04-29 Though Emile is still considered the central pedagogical text of the French Enlightenment a myriad of lesser known thinkers paved the way for Rousseau s masterpiece

Natasha Gill traces the arc of these thinkers as they sought to reveal the correlation between early childhood experiences and the success or failure of social and political relations and set the terms for the modern debate about the influence of nature and nurture in individual growth and collective life

Gill offers a comprehensive analysis of the rich cross fertilization between educational and philosophical thought in the French Enlightenment She begins by showing how in *Some Thoughts Concerning Education* John Locke set the stage for the French debate by transposing key themes from his philosophy into an educational context

Her treatment of the abb Claude Fleury the rector of the University of Paris Charles Rollin and Swiss educator Jean Pierre de Crousaz illustrates the extent to which early Enlightenment theorists reevaluated childhood and learning methods on the basis of sensationist psychology

Etienne Gabriel Morelly usually studied as a marginal thinker in the history of utopian thought is here revealed as the most important precursor to Rousseau and the first theorist to claim education as the vehicle through which individual liberation social harmony and political unity could be achieved

Gill concludes with an analysis of the educational philosophical dispute between Helv tius and Rousseau and traces the influence of pedagogical theory on the political debate surrounding the expulsion of the Jesuits in 1762

Insights Into Education J Krishnamurti,2022-09-09 Insights into Education presents the educational philosophy of J Krishnamurti in an easy to use topic based format It is a practical handbook that comes alive when used as an introduction to group investigation and dialogue

What it offers to teachers everywhere is an inroad into the many matters of concern with which they are faced on a daily basis That we cannot continue as we have been doing with rote learning fact finding and a modicum of analysis as the building blocks of education is obvious to anyone who is at all concerned with teaching and learning in a world with accelerating technological advancement alienation and despair

It is these very issues that are tackled here sometimes implicitly but always at depth

What Krishnamurti proposes and here discloses is a different approach to learning altogether

one that distinguishes itself radically from what we normally understand by that term the accumulation of knowledge with its application and testing By narrowing down our understanding to the pragmatic and the measurable we forfeit the opportunity to probe deeply and to awaken intelligence in our students and in ourselves What is meant by intelligence in this context is not the capacity to memorize and measure but that subtler ability to see the whole which comes alive in a human being when he she sees the limits of the measurable To awaken this intelligence is the goal of education

A New History of Educational Philosophy James Kaminsky, 1993-02-28 Kaminsky provides a new intellectual history of educational philosophy in the context of a comparative examination of educational philosophy in the United States Britain and Australasia Throughout his work he challenges those involved with educational philosophy to take a different view of the discipline and its intellectual mission Kaminsky argues that the intellectual mission of education is different from that of philosophy He believes that the legitimate audience of educational philosophy is made up of professional educators The new history of educational philosophy suggests a profound alignment with social science the discipline being part of an attempt to define and realize a social politic for the Common School The conduct and invention of philosophy of education in Britain is drawn from an attempt to restore the classical reassurances of the English concept of a liberal education to the conduct of teacher education in particular and the conduct of English versions of education in general In Australasia Kaminsky argues the discipline was initially dependent upon the work of R S Peters and the establishment of the university study of education in Britain Later developments are attributed to a defensive two class politics that came out of convictry and began to find expression in Old and New Left politics in the late 1960s and beyond In offering a new interpretation of educational philosophy which traces its origins to both social science and philosophy Kaminsky has provided a work of value to all involved with educational philosophy
