Making Slow Food Fast in California Cuisine Victor W. Geraci, 2017-03-02 This book follows the development of industrial agriculture in California and its influence on both regional and national eating habits Early California politicians and entrepreneurs envisioned agriculture as a solution to the food needs of the expanding industrial nation The state s climate geography vast expanses of land water and immigrant workforce when coupled with university research and governmental assistance provided a model for agribusiness In a short time the San Francisco Bay Area became a hub for guaranteeing Americans access to a consistent quantity of quality foods To this end California agribusiness played a major role in national food policies and subsequently produced a bifurcated California Cuisine that sustained both Slow and Fast Food proponents Problems arose as mid twentieth century social activists battled the unresponsiveness of government agencies to corporate greed food safety and environmental sustainability By utilizing multidisciplinary literature and oral histories the book illuminates a more balanced look at how a California Cuisine embraced Slow Food Made Fast

Fast Food Andrew F. Smith, 2016-04-15 The single most influential culinary trend of our time is fast food It has spawned an industry that has changed eating the most fundamental of human activities From the first flipping of burgers in tiny shacks in the western United States to the forging of neon signs that spell out Pizza Hut in Cyrillic or Arabic scripts the fast food industry has exploded into dominance becoming one of the leading examples of global corporate success And with this success it has become one of the largest targets of political criticism blamed for widespread obesity cultural erasure oppressive labor practices and environmental destruction on massive scales In this book expert culinary historian Andrew F Smith explores why the fast food industry has been so successful and examines the myriad ethical lines it has crossed to become so As he shows fast food plain and simple devised a perfect retail model one that works everywhere providing highly flavored calories with speed economy and convenience But there is no such thing as a free lunch they say and the costs with fast food have been enormous an assault on proper nutrition a minimum wage labor standard and a powerful pressure on farmers and ranchers to deploy some of the worst agricultural practices in history As Smith shows we have long known about these problems and the fast food industry for nearly all of its existence has been beset with scathing expos s boycotts protests and government interventions which it has sometimes met with real changes but more often with token gestures blame passing and an unrelenting gauntlet of lawyers and lobbyists Fast Food ultimately looks at food as a business an examination of the industry s options and those of consumers and a serious inquiry into what society can do to ameliorate the problems this cheap and tasty product has created
