Supervision and Agency Management for Counselors Elizabeth R. O'Brien, PhD, LPC, Michael A. Hauser, PhD, LPC, 2015-11-06 Integrates and fosters effective leadership management and supervisory skills The development of competency in management and leadership skills as well as clinical supervisory skills is of increasing importance to professional counselors who seek advancement in their careers This is the first text to integrate both the clinical supervision

and agency management skills needed by counselors who are training to work in mental health services settings. Highly practical and comprehensive, it brings together the critical leadership responsibilities of clinical supervision and agency management into one reader-friendly text. The book distills the wisdom of specialists in each subject area and is replete with in-depth information that is often not sufficiently addressed in graduate programs. The book provides a solid foundation for counselors planning to supervise clinicians working with individuals and groups, attain leadership positions within an agency, or open their own professional practice. It encompasses key information about supervisory roles and responsibilities, ethics, multicultural issues, evaluation, and due process procedures, along with administrative issues such as agency leadership, budgeting, information management, crisis management, and quality improvement practices. Also included is practical information on networking and marketing in the community. Featuring case vignettes throughout, this book describes typical challenges faced during the transition to a leadership role and how to develop effective supervisory skills. End-of-chapter questions for reflection also help to make this an ideal text for courses in administration and supervision of mental health services, as well as a valuable resource for internship students. Examples of commonly used documents such as contracts and evaluation forms further add to the book's utility.

Key Features: Integrates management and leadership skills with clinical supervisory skills; the first text to unite these interrelated topics; Trains mental health counselors in skills necessary for leadership in agencies or large private practices; Supports CACREP standards for supervision and management of mental health services and programs; Includes samples of relevant paperwork: contracts, evaluation forms, etc.; Provides real-world examples through vignettes as well as reflective questions.

Evaluating Student Learning Outcomes in Counselor Education Casey A. Barrio Minton, Donna M. Gibson, Carrie A. Wachter Morris, 2016-04-14. This timely text describes the role of program evaluation in counselor education and provides step-by-step guidance for faculty seeking to develop comprehensive Student Learning Outcome (SLO) evaluation plans to meet accountability expectations. It serves as a blueprint for demystifying the SLO process and making the switch from an input-based measure of productivity that focuses on what counseling programs do to an outcome-based approach that concentrates on the quality of learning through evidence-based assessment of students' knowledge and skills. The first and second parts of the book lay the foundation for the SLO process and provide practical guidance for identifying and developing direct and indirect measures of student learning. Part III offers strategies for creating measures, collecting, managing, and reporting student data, and using data to ensure competence. In Part IV, counselor educators across the country offer hands-on application through a wide variety of SLO activities and rubrics linked to each of the curricular and specialty areas of the 2016 CACREP Standards.
