Exploring Language through Contrast Tomasz Fojt, Waldemar Skrzypczak, Sławomir Waciewicz, 2012-11-30 The volume portrays a panorama of recent linguistic research in Poland in terms of comparison and juxtaposition as driving forces in an attempt to grasp descriptive and explanatory aspects of linguistic use and organization The spectrum of contributions spans all the levels of language The constellation of methodological perspectives juxtaposes the generative theory and recent developments in cognitive linguistics synchronic and diachronic perspectives and a measure of freedom has also been allocated to a more traditional structurally oriented and or eclectic spirit The notions of comparison and contrast have become the major force and the common denominator for all contributions in the service of explicating the central and the focal from what appears nebulous A well documented discussion on horizontal bonds between phonological primes and a refreshing new attempt to handle the phonology of Old English i umlaut are complemented with equally illuminating topics in derivational morphology such as grinding diminutives suffix distributional preferences and compound nouns In a similar fashion drawing upon the fundamental phenomenon of dynamic alternating processes syntactic topics focus on such problems as grammatical constructions with locatum verbs the status of English NPN forms and a new typology of Old English verbs Cognitively grounded phenomena are handled with equal zest and range across the vast territory of backstage cognition from the slip of the tongue through novelty of meaning achieved through collocation construction environment to a discussion on the emergence of metaphorical senses in Old English lexical concepts for fire and light This stage inevitably leads us to further juxtapositions championed in the volume embracing subjectification and objectification in viewing arrangement as well as dynamically anchored viewing impositions of the self of the textual narrator The contributions dealing with levels of discourse aspire to bring us closer to goals and norms in politeness and co operation strategies and also to an in depth analysis of stylistic features based on corpora The coda falls onto normative linguistics and thus closes the territory of contrast and juxtaposition It provides an insight into how a reflective thespian and a devoted linguist differ in viewing language without compromising the status and validity of their respective stances Marketing Health Virginia

Berridge, 2007-07-19 The post war history of public health and the role of smoking within that history epitomises the tensions which surround taking health to the public Public health history has largely concentrated on the nineteenth century sanitary period or on the years before the Second World War often focussing on the environmental advances or on the professional and occupational history of public health as an activity This book has a different focus it deals with the change in the outlook of public health post war From a focus on services vaccination and dealing with health issues at the local level public health had developed new discourse Centring on chronic disease it became concerned with the concept of risk and targeted individual behaviour The mass media and centralised campaigning directed at the whole population replaced local campaigns and politicians changed their mind about speaking directly to the public on health matters Their early worries about the nanny state gave place to a desire to inculcate new norms of behaviour and it was debated how change was to be achieved

Identifying debates between those believing in systematic gradualism and those who advocated a more coercive approach Virginia Berridge uses smoking as a model Such debates brought into play tensions over the relationships between public health and industrial interests Health campaigning by new style pressure groups like ASH which were part state funded was an important motive force behind the change In the 1980s and 1990s public health changed again Passive smoking and HIV AIDS brought environmental concerns back into public health which had disappeared after the 1950s The rise of addiction for smoking demonstrated the power of pharmaceutical interests to define a new pharmaceutical public health in which treatment and magic bullets were also tactics for prevention In the early 21st century public health was play to complex tensions and conflicting impetuses This book shows that those tensions were nothing new and outlines their development over the last half century Exchanging Human Bodily Material: Rethinking Bodies and Markets Klaus Hoeyer,2013-01-05

This book addresses the debate usually tagged as being about markets in human body parts which is antagonistically divided into pro market and anti market positions The author provides a set of propositions about how to approach this and shows a way out of the concrete impasse of it Assumptions about markets and bodies that characterize this debate are analyzed and described while the author argues that these assumptions are in fact constitutive for exchanges of human bodily material but in unacknowledged ways It is concluded that what we need is a different analytical approach to better understand the mechanisms at play when organizations exchange organs tissues and cells for use in transplantation and fertility medicine

Criminalizing Children David McCallum,2017-12-21 Does the Australian welfare system criminalize children This book unpacks history and politics to explore the treatment of child offenders **Humanizing Healthcare Reforms** Gerald A.

Arbuckle,Maria Theresa Ho,2012-10-01 This book looks at the current turmoil facing contemporary healthcare systems worldwide which has resulted from relentless reorganization being imposed upon them and argues for a return to a values based approach to healthcare Writing from the unique and fresh perspective of social anthropology the author takes a highly logical approach to practice and emphasizes the importance of values such as compassion solidarity and social justice He stipulates that without being able to clearly identify the values and goals that unite its members healthcare organizations are unlikely to be able to meet the demands of the constant and varied pressures they face and explains how individuals at every level in healthcare can contribute to positive change within their organizations This much needed and highly accessible book will be essential reading for anyone interested in healthcare reform from clinicians and nurses to managers and policy makers as well as the interested reader *Unraveling* Matthew J. Wolf-Meyer,2020-10-20

Developing a cybernetic model of subjectivity and personhood that honors disability experiences to reconceptualize the category of the human Twentieth century neuroscience fixed the brain as the basis of consciousness the self identity individuality even life itself obscuring the fundamental relationships between bodies and the worlds that they inhabit In *Unraveling* Matthew J Wolf Meyer draws on narratives of family and individual experiences with neurological disorders paired with texts by neuroscientists and

psychiatrists to decenter the brain and expose the ableist biases in the dominant thinking about personhood Unraveling articulates a novel cybernetic theory of subjectivity in which the nervous system is connected to the world it inhabits rather than being walled off inside the body moving beyond neuroscientific symbolic and materialist approaches to the self to focus instead on such concepts as animation modularity and facilitation It does so through close readings of memoirs by individuals who lost their hearing or developed trauma induced aphasia as well as family members of people diagnosed as autistic texts that rethink modes of subjectivity through experiences with communication caregiving and the demands of everyday life Arguing for a radical antinormative bioethics Unraveling shifts the discourse on neurological disorders from such value laden concepts as quality of life to develop an inclusive model of personhood that honors disability experiences and reconceptualizes the category of the human in all of its social technological and environmental contexts

Infant Mortality: A Continuing Social Problem Eilidh Garrett,Chris Galley,Nicola Shelton,Robert Woods,2018-02-06 In 1906 Sir George Newman s Infant Mortality A Social Problem one of the most important health studies of the twentieth century was published To commemorate this anniversary this volume brings together an interdisciplinary team of leading academics to evaluate Newman s critical contribution to review current understandings of the history of infant and early childhood mortality especially in Britain and to discuss modern approaches to infant health as a continuing social problem The volume argues that even after 100 years of health programmes scientific advances and medical interventions early childhood mortality is still a significant social problem and it also proposes new ways of defining and tracking the problem of persistent mortality differentials

between personal experience theory and research Lowe argues for a pedagogy of suffering that shows how the moral anguish implicit in suffering is an ethical response of the emergent self This is an important read for all those interested in medical humanities health professional education person centred care and the sociology of health and illness **Medical**
