Argues for a humanistic cultural reformation to counter our materialistic values and science dominated intellectual life and shows how this would affect our lives and transform our society A Society Fit for Human Beings contends that there is a profound incoherence in the foundations of modern Western civilization and that we are on a self destructive course With the quest for wealth and power our dominant concern we find ourselves with a flourishing economy and a supreme military force based on science and technology but with our moral civic and religious culture undermined by our way of comprehending the world

Our human identity is problematic the wells of meaning that nourish the human spirit are polluted or drying up and the social order is in disarray This situation E M Adams argues requires nothing less than a historic cultural revolution based on a shift in priorities from wealth and power to humanistic values those grounded in selfhood and lived experience that are essential for human growth meaningful lives and a healthy society Such a shift in our governing values would require a restructuring of our intellectual vision of humankind and the world in terms of humanistic categories This book shows the import of such a humanistic cultural revolution for our human identity morality the social order and our major institutions including the family and community education the economy the government the military and religion It outlines how we can work toward such a cultural revolution and develop a constructive postmodern civilization with a society fit for human beings Salvation Accomplished by the Son Robert A. James Rutherford, 2013-11-27 Understanding Physics provides a thorough grounding in contemporary physics while placing physics into its social and historical context Based in large part on the highly respected Project Physics Course developed by two of the authors it also integrates the results of recent pedagogical research The text thus teaches about the basic phenomena in the physical world and the concepts developed to explain them shows that science is a rational human endeavor with a long and continuing tradition involving many different cultures and people develops facility in critical thinking reasoned argumentation evaluation of evidence mathematical modeling and ethical values The treatment emphasizes not only what we know but also how we know it why we believe it and what effects that knowledge has Why do we believe the Earth and planets revolve around the Sun Why do we believe that matter is made of atoms How do relativity theory and quantum mechanics alter our conception of Nature and in what ways do they leave the classical concepts unchanged What impact does the knowledge of finite energy resources have on our society How have applications of fundamental science such as the steam engine the laser the electric generator the transistor affected our lives

Information Bulletin, 1972 **The Gospel According to St. John** M. F. Sadler, 2014-06-24 M. F. Sadler was an Anglican priest. He served as rector of Honiton, England, and wrote several other commentaries, including volumes on each of the four Gospels. SADLER, MICHAEL FERREBEE, 1819-1895, theologian, eldest son of Michael Thomas Sadler. He was born at Leeds in 1819. Educated at Sherborne School, he entered St. John's College, Cambridge, after a short interval of business life. He was elected Tyrwhitt's Hebrew scholar in 1846 and graduated B.A. 1847. He was vicar of Bridgwater from 1857 to 1864, during which time he was appointed to the prebend of Combe 13th in Wells Cathedral and of St. Paul's, Bedford, from 1864 to 1869. He was rector of Honiton from 1869 till his death. In 1869 he received an offer of the bishopric of Montreal, carrying with it the dignity of metropolitan of Canada, but refused it on medical advice. He was a voluminous writer on theological subjects and a strong high churchman. His works, which had a large circulation, did much to popularise the tractarian doctrines. *With the Irish in Frongoch* W. J.

Brennan-Whitmore, 2013-06-07 For eight months following the Easter Rising, over 1,800 Irish rebels were imprisoned in Frongoch, a former whiskey distillery in North Wales. It soon became a University of Revolution, and among its notable alumni were Michael Collins and Richard Mulcahy. By December 1916, all the Irish prisoners had been repatriated, and the camp was closed. Frongoch had initially held German prisoners of war, but became much more high profile when the Irish rebels were interned there. Most of them were interned without any trial or chance to defend themselves, and many who had not been initially supportive of the rebel cause were converted during their internment. This contemporary account of life in the camp was an important part of the propaganda to win support for the nationalist cause in the lead up to the War of Independence.
