Our Overcrowded World:

An Overcrowded World? Rob Bowden, 2002 Examines the facts about population growth its effects on the environment and considers what lies ahead **The Micro Men** John Russell Fearn, Vargo Statten, 2015-09-30 An intense human quietness was upon the laboratory Annexed though it was to the rambling reaches of the Research Council Building wherein experimental analyses from atomic power to weed killer were taking place twenty four hours a day no external sounds penetrated the proofed heavily insulated walls **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1973 *Great Sand Dunes National Park* , 2004 For three years John Weller captured the Great Sand Dunes with his extraordinary photography and vivid stories Here is his masterly result in a phenomenal book to celebrate our nation s newest national park **Journeys with Open Eyes** Hugh Roberts, 2024-06-19 Journeys with Open Eyes is not a travel book although it provides a wealth of information about places far away and sometimes very close to home both locationally and psychologically Nor is it a history book although the author Hugh Roberts was present in or around many of the world s trouble spots immediately before or after some of the epoch making events of the 20th and early 21st centuries This is a book about people As such it is concerned with Hugh s empathetic approach to members of the human race be they indigenous residents of the High Andes Soviet functionaries Arab princes white South Africans of the Apartheid era or numerous others There can be no doubt that empathy helped him in his career as an international Urban Planner but empathy like this is only found in those with a genuine love for humankind Hugh judges systems of government but rarely the people operating or imposing them As a result he invariably gets the best out of his fellows whether as friends work colleagues or chance acquaintances Journeys with Open Eyes will entertain and educate the reader in full measure and should be required reading for all who care for the inhabitants of this planet *Sociology: The Basics* Martin Albrow, 1999 This is a book for anyone who wants to know what sociology is and what sociologists do In a subject which has changed dramatically over the last twenty years Sociology The Basics offers the most up to date guide to the major topics and areas of debate It covers among other things sociology and society laws morality and science social relations power and communication society in the future becoming a sociologist Clearly written concise and comprehensive Sociology The Basics is an essential introductory handbook *The World's Challenge* Marion Guillou, Gérard Matheron, 2014-07-08 If a global population of 9 billion by 2050 is to be fed adequately more food must be produced and this in keeping with increasingly stringent standards of quality and with respect for the environment Not to mention the land that must be set aside for the production of energy resources industrial goods carbon storage and the protection of biodiversity *Current Catalog* National Library of Medicine (U.S.), 1970 Includes subject section name section and 1968 1970 technical reports **Congressional Record** United States. Congress, 1888 **Against the Grain** Richard Manning, 2005-02-01 In this provocative wide ranging book Against the Grain Richard Manning offers a dramatically revisionist view of recent human

evolution beginning with the vast increase in brain size that set us apart from our primate relatives and brought an accompanying increase in our need for nourishment For 290 000 years we managed to meet that need as hunter gatherers a state in which Manning believes we were at our most human at our smartest strongest most sensually alive But our reliance on food made a secure supply deeply attractive and eventually we embarked upon the agricultural experiment that has been the history of our past 10 000 years The evolutionary road is littered with failed experiments however and Manning suggests that agriculture as we have practiced it runs against both our grain and nature s Drawing on the work of anthropologists biologists archaeologists and philosophers along with his own travels he argues that not only our ecological ills overpopulation erosion pollution but our social and emotional malaise are rooted in the devil s bargain we made in our not so distant past And he offers personal achievable ways we might re contour the path we have taken to resurrect what is most sustainable and sustaining in our own nature and the planet s
