## **Our Primitive Contemporaries:**

**Our Primitive Contemporaries** George Peter Murdock, 1934 PREFACE THE Author of this very practical treatise on Scotch Loch Fishing desires clearly that it may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is dependent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing

Hardness of Heart/hardness of Life Larry Stephen Milner, 2000 Infanticide is one of the most common yet least understood of all human crimes Although academic articles document isolated aspects of this problem a single unified analysis of infanticide has not been completed until now In *Hardness of Heart Hardness of Life* Larry Milner provides the first exhaustive survey of infanticide drawing on historical data from around the world He then uses this survey as a basis for investigating why infanticide has been present in every form of human society throughout history Both comprehensive and compelling this important study will intrigue students of human psychology social welfare and child abuse and will promote further research on this alarmingly overlooked atrocity *Malinowski and the Work of Myth* Ivan Strenski, 2014-07-14 Bronislaw Malinowski 1884 1942 was a wide ranging thinker whose ideas affected almost every branch of the social sciences And nowhere is this impact more evident or more persistent than on the study of myth ritual and religion He articulated as never before or since a program of seeing myths as part of the functional pragmatic or performed dimension of culture that is as part of activities that did certain tasks for particular human communities Spanning his entire career this anthology brings together for the first time the important texts from his work on myth Ivan Strenski's introduction places Malinowski in his intellectual world and traces his evolving conception of mythology As Strenski points out Malinowski was a pioneer in applying the lessons of psychoanalysis to the study of culture while at the same time he attempted to correct the generalizations of psychoanalysis with the cross cultural researches of ethnology With his growing interest in psychoanalysis came a conviction that myths performed essential cultural tasks in chartering all sort of human institutions and practices

*Nursing World*, 1929 **The Trained Nurse and Hospital Review**, 1929 A monthly magazine of practical nursing devoted to the improvement and development of the graduate nurse

**Action** D. G. Brown, 1968-12-15 Professor Brown in this volume discusses one of the most difficult questions in metaphysics what is action His analysis proceeds along three main lines of thought the point of view of the agent the primacy of inanimate action and the pervasiveness of explanatory insight in the description of action In the spirit of recent work on practical reasoning he takes the central fact about human action to be the existence of the point of view and considers the agent s relation to his own body Professor Brown argues that the concept of human action is best understood through that of inanimate action such as the action of wind on trees or an axe on wood His analysis takes inanimate action as fundamental and defends it against the popular theory that it is an anthropomorphic projection Human action is indeed unique But it is also Professor Brown s thesis that the classical empiricist search for the brute fact of our own agency yields no more than incidental insights into its nature introspection does not replace the analysis of human action The analysis in this essay caters for inanimate action as well as for the uniqueness of human action The key to an analysis complex enough to cover both is the notion of attributability which Professor Brown regards as providing an Aristotelian extension of a Humean approach to causation Explanation by reference to the soul exploits the point of view of the rational agent In this way both human and inanimate action are exhibited as natural phenomena the descriptions of which are pervaded by explanatory insight The book as a whole gives an account of action in which the peculiarities of human action find their place in nature It does not enter on questions of ethics but remains with concepts common to morality psychology and history There are incidental discussions of deliberation

psychokinesis casual necessity the agent's knowledge of his action and responsibility Here is a controversial theory of action supported by careful argument Professor Brown's writing is both ambitious in scope and attentive to conceptual detail and offers a valuable contribution to one of the liveliest contemporary debates in philosophy
