From the cup of coffee that jumpstarts the day to dangerously addictive drugs the recreational use of plants with psychoactive properties has a long history among humans But as with many things it turns out that other animals got there first From parrots to primates consuming medicinal chemicals is an instinctive behavior that helps countless organisms fight infection and treat disease But the similarities don t end there Like us many creatures also consume substances that have no apparent benefit except for inducing intoxication In fact animals have been using drugs for recreational purposes since prehistoric times We may even have animals to thank for the idea legend says that coffee was discovered by observing the behavior of goats that had eaten it In his previous book *Strange Survivors* author and biologist On R Pag n introduced readers to some of the truly bizarre strategies animals use to survive in the cutthroat world of natural selection Now in *Drunk Flies and Stoned Dolphins* he sheds light on the surprising cravings they indulge when it s time to unwind In this book you ll get an eye opening glimpse into the mind altering behavior of the non human members of the animal kingdom spanning insects to elephants including the dolphin species that apparently likes to pass around an intoxicating pufferfish as if they were sharing a joint Combining fascinating science with humor and enthusiasm Pag n s latest is full of the kind of unforgettable stories and odd facts that you ll find yourself repeating to everyone you meet From fruit fly happy hour to the evolutionary reasons behind nature s drugs *Drunk Flies and Stoned Dolphins* takes you on a trip through the colorful world of animal intoxication and along the way explores what this science reveals about the surprising connections between all the world s creatures **Sixty-Five Years of Four-Legged Friends** Robert G. Smith,2010-08-10 I have tried many things in my working years steel worker sweeper sales campground owner auto salvage yard operator owner of an air compressor sales and service company and owner of a miscellaneous metals center I retired and sold everything A year into retirement I volunteered to help with a project at church and found myself agreeing to take on the church maintenance which lasted for four years I have always had a more than passing interest in the arts Over the years Ive worked with wood copper iron steel and in my spare time I painted mostly outdoor scenes with acrylics Then I discovered glass etching In my early years the everyday work of providing for and raising a family didnt leave a lot of time for serious commitment to my artworks but since

my second retirement I have been able to fly I've etched sixteen windows for St Anthony Catholic Church Brooksville FL ten windows for The Florida Medical Center Springhill FL six doors for St Thomas Catholic Church Homosassa FL I have works in restaurants attorneys offices and many homes including that of Architect Hal Lenox My artworks can be viewed on my web site in completed custom projects and gallery at www.artworksbyrobertgsmith.com **The Devil's Redemption** Walter S Powell, 2012-06-01 Since Adam and Eve the people of earth have been trapped in a struggle between good and evil The representation of evil Satan has petitioned God for redemption Satan seek to set aside his evil ways and return to the service of God Michael and other angels seek to determine Satan's true purpose Meanwhile Satan's forces cross the universe in an effort to obtain his true objective Will mankind be fooled Will Satan's evil plot succeed or will God reign supreme **Bug Facts** Sage Earthkeeper, AI, 2025-02-17 Bug Facts explores the fascinating world of insects highlighting their incredible biodiversity adaptations and crucial roles in ecosystems Insects often overlooked are essential for pollination and decomposition maintaining ecological balance Did you know some insects can survive being frozen while others use complex dances to communicate This book reveals how insects are not just pests but vital components of healthy environments offering insights into environmental stewardship and insect conservation The book begins with insect classification and evolutionary history progressing through major adaptations like flight and metamorphosis It then explores insect behavior social structures and communication methods Finally it examines their ecological roles illustrating their impact on plant communities and soil health Bug Facts uses a fact based yet engaging tone making complex scientific concepts accessible to a broad audience fostering appreciation for the insect world **Solomon's Little People** James Crowther, 1882

Nightfall and Other Stories Isaac Asimov, 2021-07-13 A collection of twenty classic short stories by Isaac Asimov author of the Foundation series featuring the definitive version of Nightfall From one of history's most influential writers of science fiction comes this collection of twenty short works of fiction arranged in order of publication from 1941 to 1967 Compiled by Asimov himself who prefaced each story with an introduction it begins with Nightfall the tale of a world with eternal sun that is suddenly plunged into total darkness and utter madness Nightfall published when the author was only twenty one was arguably his breakout work making such an impression that almost thirty years later the Science Fiction Writers of America voted it the best science fiction short story ever written The other stories in the collection span far and wide A dedicated scientist who whips up his own love potion Machines that learn to think for themselves and direct their thoughts to overturning the establishment The discovery that Earthlings are being destroyed by a mysterious kind of psychological virus A day when walking outdoors becomes a sign of psychosis And many more **Gordon Matta-Clark** Frances Richard, 2019-03-26 Bringing a poet's perspective to an artist's archive this highly original book examines wordplay in the art and thought of American artist Gordon Matta Clark 1943-1978 A pivotal figure in the postminimalist generation who was also the son of a prominent Surrealist Matta Clark was a leader in the downtown artists community in New York in

the 1970s and is widely seen as a pioneer of what has come to be known as social practice art. He is celebrated for his anarchitectural environments and performances and the films, photographs, drawings, and sculptural fragments with which his site-specific work was documented. In studies of his career, the artist's provocative and vivid language is referenced constantly. Yet the verbal aspect of his practice has not previously been examined in its own right. Blending close readings of Matta Clark's visual and verbal creations with reception history and critical biography, this extensively researched study engages with the linguistic and semiotic forms in Matta Clark's art forms that activate what he called the poetics of psycholocus and total semiotic system. Examining notes, statements, titles, letters, and interviews in light of what they reveal about his work at large, Frances Richard unearths archival, biographical, and historical information linking Matta Clark to Conceptualist peers and Surrealist and Dada forebears. Gordon Matta Clark, *Physical Poetics*, explores the paradoxical durability of Matta Clark's language and its role in an aggressively physical oeuvre whose major works have been destroyed.

Insectpedia
Eric R. Eaton, 2022-05-03. A fun and fact-filled A-Z treasury for the insect lover in all of us. Insectpedia introduces you to the wonders of the insect world while inviting you to make discoveries of your own. Featuring dozens of entries on topics ranging from murder hornets and the insect apocalypse to pioneering entomologists such as Margaret James Strickland Collins and Douglas Tallamy, this beautifully illustrated pocket-friendly encyclopedia dispels many common myths about insects while offering new perspectives on the vital relationships we share with these incredible creatures. This entertaining collection celebrates the long and storied history of entomology, highlights our dependence on insects for food and ecosystem services, and explains the meaning behind various entomological terms. With Eric Eaton as your guide, you will circle the globe in search of African Toktokkies and Australian beer bottle beetles and witness the peculiar spectacle of cricket fighting in Asia. Profiles of influential figures in entomology provide insights into the curious minds that animate this extraordinarily broad field of scientific inquiry, while the book's portable size makes it the perfect travel companion, no matter where your own entomological adventures may lead you. With captivating illustrations by Amy Jean Porter, Insectpedia is an engaging blend of insect facts and folklore that will inspire anyone who delights in the marvels of nature. Features a real cloth cover with an elaborate foil-stamped design.
