imagination that led to the birth of civilization burst out **Saving the Last Rhinos** Grant Fowlds, Graham Spence, 2020-05-05 The remarkable story of Grant Fowlds who has dedicated his life to saving the imperiled rhinos vividly told with Graham Spence co author of the bestselling *The Elephant Whisperer* What would drive a man to smuggle rhino horn back into Africa at great risk to himself This is just one of the situations Fowlds has put himself in as part of his ongoing fight against poaching in order to prove a link between southern Africa and the illicit lucrative trade in rhino horn in Vietnam Shavings of rhino horn are sold as a snake oil cures but a rhino's horn has no magical medicinal properties whatsoever Yet it is for this that rhinoceroses are being killed at an escalating rate that puts the survival of the species in jeopardy This corrupt illegal war on wildlife has brought an iconic animal to the brink of extinction Growing up on a farm in the eastern Cape of South Africa Grant developed a deep love of nature turning his back on hunting to focus on saving wildlife of all kinds and the environment that sustains both them and us He is a passionate conservationist who puts himself on the front line of protecting rhinos in the wild right now against armed poachers and in the long term through his work with schoolchildren communities and policymakers Inheritors of the Earth Chris D. Thomas, 2017-09-05 Human activity has irreversibly changed the natural environment But the news isn't all bad It's accepted wisdom today that human beings have permanently damaged the natural world causing extinction deforestation pollution and of course climate change But in *Inheritors of the Earth* biologist Chris Thomas shows that this obscures a more hopeful truth we're also helping nature grow and change Human cities and mass agriculture have created new places for enterprising animals and plants to live and our activities have stimulated evolutionary change in virtually every population of living species Most remarkably Thomas shows humans may well have raised the rate at which new species are formed to the highest level in the history of our planet Drawing on the success stories of diverse species from the ochre colored comma butterfly to the New Zealand pukeko Thomas overturns the accepted story of declining biodiversity on Earth In so doing he questions why we resist new forms of life and why we see ourselves as unnatural Ultimately he suggests that if life on Earth can recover from the asteroid that killed off the dinosaurs it can survive the onslaughts of the technological age This eye opening book is a profound reexamination of the relationship between humanity and the natural world Global Environmental Sustainability Choy Yee Keong, 2020-10-31 *Global Environmental Sustainability Case Studies and Analysis of the United Nations Journey toward Sustainable Development* presents an integrated interdisciplinary analysis of sustainable development addressing global environmental problems in the contemporary world It critically examines current actions being taken on global and local scales particularly in relation to the UN's efforts to promote sustainable development This approach is supported by empirical analysis drawing upon a host of interweaving insights spanning economics politics ecology environmental philosophy and ethics among others As a result it offers a comprehensive and well balanced assessment of the overall perspective of sustainable development supported by in depth content analysis theoretical evaluation empirical and actual case studies premised on solid data and actual field work
