Nauta, 2019-05-24 Over the last two decades the expanding role of Southern countries as development partners has led to tectonic shifts in global development ideas practices norms and actors Researchers are faced with new questions around identity power and positionality in global development Researching South South Development Cooperation examines this rapidly growing and complex phenomenon asking to what extent existing assumptions conceptual frameworks and definitions of development need to be reframed in the context of researching this new landscape This interdisciplinary book draws on voices from across the Global South and North to explore the epistemological and related methodological challenges and opportunities associated with researching South South development cooperation asking what these trends mean for the politics of knowledge production Chapters are interspersed with shorter vignettes which aim to share examples from first hand participation in and observation of South South development cooperation initiatives This book will be of interest to anyone conducting research on development in the Global South whether they are a practitioner or policy maker or a student or researcher in politics international development area studies or international relations *Current Policy* ,

Indigenous Peoples' Wisdom and Power Julian Kunnie, Nomalungelo Ivy Goduka, 2006 xts across Africa Asia the Middle East North South America and Oceania *Language Narratives and Shifting Multilingual Pedagogies* Belinda Mendelowitz, Ana Ferreira, Kerry Dixon, 2022-12-15 Winner of the UKLA Academic Book Award 2024 This book challenges monoglossic ideologies traditional language pedagogies and dominant forms of knowledge construction by foregrounding multilingual and multicultural students language narratives repertoires and identities The research is based on a sixteen year longitudinal study of a sociolinguistics course at an English language university and the language narratives produced by the first year education students The study was borne out of a need to create a critically inclusive course that would engage a cohort of students from socially and linguistically diverse backgrounds in contemporary South Africa Drawing on data from over 5 000 students who have journeyed through this course this book shows how a narrative heteroglossic pedagogy harnesses students multilingual strengths A close analysis reveals complex identity work by students located in the Global South The authors argue that decolonising language education is about reconceptualising language reconfiguring what knowledges are valued in the classroom and reshaping pedagogy *American Foreign Policy Current Documents* , 1986
