Fritz,2004-10-08 At the end of World War II Gen Dwight D Eisenhower fearing that retreating Germans would consolidate large numbers of troops in an Alpine stronghold and from there conduct a protracted guerilla war turned U S forces toward the heart of Franconia ordering them to cut off and destroy German units before they could reach the Alps Opposing this advance was a conglomeration of German forces headed by SS Gruppenf hrer Max Simon a committed National Socialist who advocated merciless resistance Under the direction of officers schooled in harsh combat in Russia the Germans succeeded in bringing the American advance to a grinding halt Caught in the middle were the people of Franconia Historians have accorded little mention to this period of violence and terror but it provides insight into the chaotic nature of life while the Nazi regime was crumbling Neither German civilians nor foreign refugees acted simply as passive victims caught between two fronts Throughout the region people pressured local authorities to end the senseless resistance and sought revenge for their tribulations in the liberation that followed Stephen G Fritz examines the predicament and outlook of American GI s German soldiers and officials and the civilian population caught in the arduous fighting during the waning days of World War II Endkampf is a gripping portrait of the collapse of a society and how it affected those involved whether they were soldiers or civilians victors or vanquished perpetrators or victims *Faith and Beauty* Edward Farley,2020-04-14 Aesthetics and theological aesthetics usually imply a focus on questions about the arts and how faith or religion relates to the arts only the final pages of this work take up that problem The central theme of this book is that of beauty Farley employs a new typology of western texts on beauty and a theological analysis of the image of God and redemption to counter the centuries long tendency to ignore or marginalize beauty and the aesthetic as part of the life of faith Studying the interpretation of beauty in ancient Greece eighteenth century England the work of Jonathan Edwards and nineteenth and twentieth century philosophies of human self transcendence the author explores whether Christian existence the life of faith and the ethical exclude or require an aesthetic dimension in the sense of beauty The work will be of particular interest to those interested in Christian theology ethics and religion and the arts Rethinking Organizational and

Complexity and Organization Robert Macintosh, Donald Maclean, Ralph Stacey, Douglas Griffin, 2013-10-16 In the past decade complexity based thinking has exerted an increasing yet somewhat controversial authority over management theory and practice This has in some part been due to the influence of a number of high profile articles and the not inconsiderable hype which has accompanied them Another feature of the subject's development has been the diversity of the origins of the thinking and the claims which have been made for it in terms of managerial and organizational implications Complexity and Organization is the first text to bring this thinking together presenting some of the most influential writing in the field showing how the subject has developed and how it continues to influence managerial thinking Seminal contributions to the field have been brought together in a single accessible volume allowing readers to access what might otherwise appear a very diverse body of literature Moreover the editors who represent some of the leading thinkers and writers in this field have combined these readings with a unique commentary indicating not only the importance of the papers but teasing out the subtle but significant differences and similarities between them These commentaries take the form of a discussion between the editors debating the contribution that each paper has made to the field and the influence it has had on management thinking **Journal of Early Modern Studies: Volume 5, Issue 1 (Spring 2016)** Vlad Alexandrescu, Tinca
