Out Of Me Story Of Postnatal Breakdown:

The Virago Story Catherine Riley, 2018-04-23 The 1970s witnessed a renaissance in women's print culture as feminist presses and bookshops sprang up in the wake of the second wave women's movement. At four decades removed from that heady era, however, the landscape looks dramatically different with only one press from the period still active in contemporary publishing: Virago. This engaging history explains how, from modest beginnings, Virago managed to weather epochal transformations in gender politics, literary culture, and the book publishing business. Drawing on original interviews with many of the press's principal figures, it gives a compelling account of Virago's place in recent women's history while also reflecting on the fraught relationship between activism and commerce.

Mothers Jacqueline Rose, 2018-05-01 A daring and provocative book-length essay on why we both romanticize and vilify mothers. A sort of Rosetta Stone for the moment that examines the particular mix of fascination and dread that mothers engender. Rose is a calm and stylish writer whose rangy essays have become indispensable reading during the current reckoning around power and sexuality. The New York Times. A simple argument guides this book: motherhood is the place in our culture where we lodge or rather bury the reality of our own conflicts. By making mothers the objects of both licensed idealization and cruelty, we blind ourselves to the world's iniquities and shut down the portals of the heart. Mothers are the ultimate scapegoat for our personal and political failings for everything that is wrong with the world, which becomes their task, unrealizable of course, to repair. Moving commandingly between pop-cultural references such as Roald Dahl's *Matilda* to insights on motherhood in the ancient world and the contemporary stigmatization of single mothers, Jacqueline Rose delivers a groundbreaking report into something so prevalent we hardly notice. *Mothers* is an incisive rousing call to action from one of our most important contemporary thinkers. *Mothers* is a passionate polemic. Rose's intellectual range is dazzling. The Economist. Rose's book distills a lifetime of psychoanalytic, literary, and political engagement into a fierce, generous study of human complexity, one which pushes us to reckon with the urgent question of how we might stop tearing mothers and the world to pieces. Maggie Nelson, author of *The Argonauts*.

Out of Me Fiona Shaw, 1998 **The Oxford Handbook of Mental Health and Contemporary Western Aesthetics**, 2025-01-02 Human flourishing depends upon the mental health of the individuals. Throughout history, various cultural traditions have established and practiced diverse strategies to maintain their community members' mental health, treat their mental illness, and enhance their well-being. They range from spiritual disciplines, religious rituals, and philosophical training to communal activities, educational instructions, and community support. It is noteworthy that aesthetic objects and activities are frequently integrated into these strategies. They include visual arts, music, dance, story telling, theatre, and occasions and events made special by certain foods, drinks, decorations, clothes, and fragrance. This long-held and widely practiced integration of aesthetics into the promotion of mental health testifies to the power of the aesthetic to affect the well-being of humans and their communities. The world's major philosophies and religious traditions have recognized this power of the

aesthetic For example Plato's proposed censorship of the arts in his utopian Republic indicates his acknowledgement of and a respect for the power of the arts to mold the citizen's psyche and character Confucianism also utilizes arts and rituals to promote moral virtues Finally Buddhism teaches the cultivation of mindful practice for human flourishing by developing an alternative relationship with present moment experience such as suffering and distress Today the most dominant methods of treating mental illness in the West are psychotherapy psychology and psychiatry methodologies and practices established and developed in Europe since the nineteenth century Ever since the birth of art and poetry its purpose has been to inspire stir and move people This handbook addresses the valuable role aesthetics plays in psychotherapy and psychiatry exploring both theory and practice

Narrative Medicine: Trauma and Ethics Anders Juhl Rasmussen, Morten

Sodemann, 2024-05-14 This new volume repositions narrative medicine and trauma studies in a global context with a particular focus on ethics Trauma is a rapidly growing field of especially literary and cultural studies and the ways in which trauma has asserted its relevance across disciplines which intersect with narrative medicine and how it has come to widen the scope of narrative research and medical practice constitute the principal concerns of this volume This collection brings together contributions from established and emerging scholars coming from a wide range of academic fields within the faculty of humanities that include literary and media studies psychology philosophy history anthropology as well as medical education and health care studies This crossing of disciplines is also represented by the collaboration between the two editors Most of the authors in the volume use narrative medicine to refer to the methodology pioneered by Rita Charon and her colleagues at Columbia University but in some chapters the authors use it to refer to other methodologies and pedagogies utilizing that descriptor Trauma is today understood both in the restricted sense in which it is used in the mental health field and in its more widespread popular usage in literature This collection aspires to prolong deepen and advance the field of narrative medicine in two important aspects by bringing together both the cultural and the clinical side of trauma and by opening the investigation to a truly global horizon

Art and Memory in the Work of Elizabeth Bishop Jonathan

Ellis, 2018-01-17 In *Art and Memory in the Work of Elizabeth Bishop* Jonathan Ellis offers evidence for a redirection in Bishop studies toward a more thorough scrutiny of the links between Bishop's art and life The book is less concerned with the details of what actually happened to Bishop than with the ways in which she refracted key events into writing both personal unpublished material as well as stories poems and paintings Thus Ellis challenges Bishop's reputation as either a strictly impersonal or personal writer and repositions her poetry between the Modernists on the one hand and the Confessionals on the other Although Elizabeth Bishop was born and died in Massachusetts she lived a life more bohemian and varied than that of almost all of her contemporaries a fact masked by the tendency of biographers and critics to focus on Bishop's life in the United States Drawing on published works and unpublished material overlooked by many critics Ellis gives equal attention to the influence of Bishop's Canadian upbringing on her art and to the shifts in her aesthetic and personal tastes that took place

during Bishop's residence in Brazil during the 1950s and 1960s By bringing together the whole of Bishop's work this book opens a welcome new direction in Bishop studies specifically and in the study of women poets generally **Voicing**

Identities Francesco Fanti Rovetta, 2024-11-04 We are often asked to describe ourselves In response one might propose a few adjectives or possibly even a brief account of how they became the person they are today How we develop such self understanding is a complicated matter involving various cognitive and social processes Fanti Rovetta contributes to the comprehension of these processes by exploring the role of inner speech or verbal thought in self understanding Drawing from sociolinguistics he proposes and applies a novel theoretical framework a situated approach to inner speech which emphasizes individual variation and suggests that each person has a style of inner speaking Such style of inner speaking constrains the linguistic hermeneutic resources a person can access in thinking about themselves and in making sense of their experiences Additionally he investigates the role of inner speech in narrative thinking and in verbal rumination which are two key mental phenomena related to self understanding Throughout the book the approach adopted is multidisciplinary integrating philosophical discussion with recent developments in cognitive science psychology and linguistics *A Short Introduction to Psychiatry* Linda Gask, 2004-08-20 Linda Gask gives readers a clear picture of psychiatry as it is today She describes the development of the profession the route to qualification and the scope of contemporary practice including the work done by psychiatrists in a range of specialisms from child psychiatry to addiction services and forensic psychiatry

Emotion and Value Sabine Roeser, Cain Todd, 2014-11-06 This volume brings together new work by leading philosophers on the topics of emotion and value and explores issues at their intersection Philosophers and psychologists working on the emotions have reached something of a consensus about the complex inter related nature of the affective and cognitive components of emotions and have increasingly focussed on the important epistemological role that emotions play in giving us access to values At the same time an increasing number of philosophers have become attracted to analyses of value that give emotions a prominent place in evaluative judgements and experiences The work undertaken in each of these areas has important implications for current research on topics such as the role that emotions play in practical rationality and moral psychology the connection between imagination and emotion in the appreciation of fiction and more generally with the ability of emotions to discern axiological saliences and to ground or fail to ground the objectivity of ethical or aesthetic value judgements This volume makes a unique contribution to scholarship on emotion and value by bringing together top authors from these lines of research In addition the volume contains a number of contributions that explore various links between the emotions and self understanding touching on a range of themes that include depression empathy agency guilt and self trust All of these issues are approached from a number of different perspectives in order to present the reader with a wide view of this extremely rich terrain and to demonstrate how the latest thinking in a number of currently intensive areas of research is deeply interconnected How To Survive Your Viva: Defending A Thesis In An Oral Examination Murray,
