Out of Place Talmadge Wright, *Out of Place Homeless Mobilizations Subcities and Contested Landscapes* details the development of two organized homeless resistances in two different cities From the redevelopment protesters and squatting activities of the Student Homeless Alliance in San Jose to the squatter camps of Tranquility City in Chicago the differences and similarities between both groups are highlighted within the context of city redevelopment policies Wright argues for considering homelessness not merely as an issue for social welfare but first and foremost as a land use issue directly connected to issues of gentrification displacement and the cultural imaginings of what the city should look like by those who have the power to shape its development

Urban Interstices: The Aesthetics and the Politics of the In-between Andrea Mubi Brighenti, 2016-02-11 Bringing together a team of international scholars with an interest in urban transformations spatial justice and territoriality this volume questions how the interstice is related to the emerging processes of partitioning enclave making and zoning showing how in between spaces are intimately related to larger flows networks territories and boundaries Illustrated with a range of case studies from places such as the US Quebec the UK Italy Gaza Iraq India and South east Asia the volume analyses the place and function of interstitial locales in both a disciplined urban space and a disordered space conceptualized through the notions of excess danger and threat Warning not to romanticize the interstice the book invites us to study it as not simply a place but also a set of phenomena events and social interactions How are interstices perceived and represented What is the politics of visibility that is applied to them How to capture their peculiar rhythms speeds and affects On the one hand interstices open up venues for informality improvisation challenge and bricolage playful as well as angry statements on the neoliberal city and enhanced urban inequalities On the other hand they also represent a crucial site of governance even governance by withdrawal and urban management where an array of techniques ranging from military urbanism to new forms of value extraction are experimented At the point of convergence of all these tensions interstices appear as veritable sites of transformation where social forces clash and mesh prefiguring our urban future The book interrogates these territories proposing new ways to explore the dynamics events and visibilities that define them

The Politics of Space and Place Bob Brecher, Nicola Clewer, Doug Else, 2013-01-03 What might an analysis of politics which focuses on the operation of power through space and place and on the spatial structuring of inequality tell us about the world we make for ourselves and others From the national border to the wire fence from the privatisation of land to the exclusion and expulsion of persecuted peoples questions of space and place of who can be where and what they can do there are at the very heart of the most important political debates of our time Bringing together an interdisciplinary collection of authors deploying diverse perspectives and methodological approaches this book responds to the pressing demand to reflect on and engage with some of the key questions raised by a political analysis of space and place Its chapters chart the ways in which inequality and exclusion are played out in spatial terms exploring the operations of power and resistance at the micro level of the individual home and small community analysing modes of securitisation and fortification utilised in the interests of wealth and power and documenting the ways in which space and place are being transformed by changing socio economic and cultural demands As well as analysing the ways in which forms of exclusion and persecution are manifest spatially the chapters in this book also attend to the forms of

resistance and contestation which emerge in response to them Resistance is found in the persistence of those who build and rebuild their homes and communities in a world which seems bent on their exclusion At the same time life on the peripheries can give rise to new conceptions of citizenship and public space as well as to new political demands which seek to re claim space and contest the dominant order Bringing together scholars working in fields as diverse as political science geography international studies cultural anthropology architecture political philosophy and the visual arts this book offers readers access to a range of contemporary case studies and theoretical perspectives Relevant timely and thoroughly accessible this text offers an integrated approach to what can be a dauntingly diverse area of study and will be of interest not only to those working in fields such as architecture political theory and geography but also to non specialists and students

The People's Property? Lynn Staeheli, Donald Mitchell, 2016-05-06 The People's Property is the first book length scholarly examination of how negotiations over the ownership control and peopling of public space are central to the development of publicity citizenship and democracy in urban areas The book asks the questions Why does it matter who owns public property Who controls it Who is in it Donald Mitchell and Lynn A Staeheli answer the questions by focusing on the interplay between property in its geographical sense as a parcel of owned space and people Property rights are often defined as the right to exclude It is important therefore to understand who what individual and corporate entities governed by what kinds of regulations and restrictions owns publicly accessible property It is likewise important to understand the changing bases for excluding some people and classes of people from otherwise publicly accessible property That is to say it is important to understand how modes of access and possibilities for association in publicly accessible space vary for different individuals and different

classes of people if we are to understand the role public spaces play in shaping democratic possibilities In what ways are urban public spaces the people's property and in what ways are they not What does this mean for citizenship and the constitution of an inclusive democratic polity The book develops its argument through five case studies protest in Washington DC struggles over the Plaza of Santa Fe NM homelessness and property redevelopment in San Diego CA the enclosure of public space in a mall in Syracuse NY and community gardens in New York City Though empirically focused on the US the book is of broader interests as publics in all liberal democracies are undergoing rapid reconsideration and transformation

Theory, Justice, and Social Change Christopher R. Williams, Bruce A. Arrigo, 2012-09-22 Throughout history social and intellectual crises have given rise to compelling suggestions for reform steeped in various progressive sensibilities For example within the discipline of criminology particularly during the 1980 s and 1990 s a number of unconventional theoretical perspectives emerged that sought to challenge many of the assumptions embedded within its own mainstream discourse and to propose alternative solutions for meaningful sustainable change Conceived of as critical in overarching orientation these efforts to rethink the foundations of criminological verstehen can be traced to several specific theoretical and methodological strands of inquiry e g anarchism peacemaking chaos theory postmodernism Though distinct in some respects these emerging models are linked

paradigmatically by their shared discontent with conventional criminological thought and by their radicalized posture toward existing and previously unexamined epistemic crises Collectively this is an agenda for reform that seeks to establish a more humane and just social order particularly as citizens and society confront the institutional and communal problems posed by crime delinquency and deviance Theory Justice and Social Change Theoretical Integrations and Critical Applications represents a provocative series of essays that systematically reviews or extends the role of critical social theory in fostering justice and change in several relevant though problematic social contexts Mindful of the need to address both conceptual exegeses and pragmatic concerns the articles contained in this volume grapple with the ongoing double crisis that confronts theory and practice in the construction of knowledge By appropriating and integrating various insights from several heterodox and critically animated lines of inquiry each chapter deftly exposes where and how conventional sociological and criminological thought has failed to effectively address such human social issues as homelessness mental illness minority rights juvenile justice global violence and criminal punishment In doing so Theory Justice and Social Change provides new and much needed direction regarding theory development in the social sciences and indicates why charting such a course of theory action yields more enlightened prospects for justice and change in society and in our lives *Hobos, Hustlers, and Backsliders* Teresa Gowan, 2010-07-10 Winner of the 2011 Robert Park Award for the Best Book in Community and Urban Sociology American Sociological Association 2011 Co winner of the 2011 Mary Douglas Prize for Best Book in the Sociology of Culture American Sociological Association 2011 When homelessness reemerged in American cities during the 1980s at levels not seen since the Great Depression it initially provoked shock and outrage Within a few years however what had been perceived as a national crisis came to be seen as a nuisance with early sympathies for the plight of the homeless giving way to compassion fatigue and then condemnation Debates around the problem of homelessness often set in terms of sin sickness and the failure of the social system have come to profoundly shape how homeless people survive and make sense of their plights In *Hobos Hustlers and Backsliders* Teresa Gowan vividly depicts the lives of homeless men in San Francisco and analyzes the influence of the homelessness industry on the streets in the shelters and on public policy Gowan shows some of the diverse ways that men on the street in San Francisco struggle for survival autonomy and self respect Living for weeks at a time among homeless men working side by side with them as they collected cans bottles and scrap metal helping them set up camp watching and listening as they panhandled and hawked newspapers and accompanying them into soup kitchens jails welfare offices and shelters Gowan immersed herself in their routines their personal stories and their perspectives on life on the streets She observes a wide range of survival techniques from the illicit to the industrious from drug dealing to dumpster diving She also discovered that prevailing discussions about homelessness and its causes homelessness as pathology homelessness as moral failure and homelessness as systemic failure powerfully affect how homeless people see themselves and their ability to change their situation Drawing on five years of fieldwork this powerful ethnography of men living on the

streets of the most liberal city in America Hobos Hustlers and Backsliders makes clear that the way we talk about issues of extreme poverty has real consequences for how we address this problem and for the homeless themselves
