Environmentalism Unbound Robert Gottlieb, 2002-08-02 A call for a broadened environmental movement that addresses issues of everyday life In Environmentalism Unbound Robert Gottlieb proposes a new strategy for social and environmental change that involves reframing and linking the movements for environmental justice and pollution prevention According to Gottlieb the environmental movement's narrow conception of environment has isolated it from vital issues of everyday life such as workplace safety healthy communities and food security that are often viewed separately as industrial community or agricultural concerns This fragmented approach prevents an awareness of how these issues are also environmental issues After tracing a history of environmental perspectives on land and resources city and countryside and work and industry Gottlieb focuses on three compelling examples of this new approach to social and environmental change The first involves a small industry dry cleaning and the debate over pollution prevention approaches the second involves a set of products janitorial cleaning supplies that may be hazardous to workers

Woolner, H. Henderson, 2015-12-17 This book demonstrates that there is much about the New Deal that can be characterized as environmental once one substitutes the word environmental for conservation Indeed the scholarship that is contained within this extraordinary book will help correct the widely held view that the New Deal is virtually a blank space in the history of modern environmentalism In fact the New Deal carried forward and greatly extended the work of the Progressive Conservation Era and in many ways helped establish the foundation for the modern environmental movement **From the Cult of Waste to the Trash Heap of History** Zsuzsa Gille, 2007-04-04 Zsuzsa Gille combines social history cultural analysis and environmental sociology to advance a long overdue social theory of waste in this study of waste management Hungarian state socialism and post Cold War capitalism From 1948 to the end of the Soviet period Hungary developed a cult of waste that valued reuse and recycling With privatization the old environmentally beneficial though not flawless waste regime was eliminated and dumping and waste incineration were again promoted Gille s analysis focuses on the struggle between a Budapest based chemical company and the small rural village that became its toxic dump site *Working in Greece and Turkey* Leda Papastefanaki, M. Nevada's Environmental Legacy James W. Hulse, 2009-02-28 Nevada's relatively brief history it became a state in 1864 has been largely a story of the exploitation of its natural resources Mining has torn down mountains and poisoned streams and groundwater Uncontrolled grazing by vast herds of sheep and cattle has denuded grasslands and left them prey to the invasion of noxious plant species and vulnerable to wildfire Clear cut logging practices have changed the composition of forests and induced serious soil erosion More recently military testing including hundreds of atomic blasts to determine the efficacy of nuclear weapons has irreversibly polluted expanses of fragile desert landscape And rampant development throughout the state over the past four decades along with the public's growing demand for recreational facilities has placed intolerable demands on the arid state's limited water resources and threatened the survival of numerous rare plant and animal species Veteran historian and Nevada native James W Hulse considers the state's complex environmental history as a series of Faustian bargains between the state's need for economic development and the industries government agencies and individuals that have exploited Nevada's natural resources with little concern for the long term consequences of their activities His survey covers all these issues and examines public attitudes about the environment and the role of federal and state agencies in creating interpreting and enforcing environmental policies

Global Environmental History Ian G Simmons, 2008-03-05 Courses which deal with environmental history have long lacked a comprehensive overview I G Simmons has made a significant contribution with a book that looks at the long term history of environment and humanity from 10 000 BC to AD 2000 This far reaching text considers the global picture and recognises the contributions of many disciplines including the natural sciences the social sciences and increasingly the humanities As a starting point this book takes the major phases of human technological evolution of the last 12 000 years and considers how these have affected the natural world It then considers the response to conditions such as climate change putting today s preoccupations into a long term perspective This is a book of history not prophecy and so makes no judgements on current anxieties

Reuss, Stephen H. Anthony N. Penna, Conrad Edick Wright, 2009 Remaking Boston chronicles many of the events that altered the physical landscape of Boston while also offering multidisciplinary perspectives on the environmental history of one of America's oldest and largest metropolitan areas *Urban Design Ecologies* Brian McGrath, 2013-01-14 The discipline of urban design is

undergoing a rapid expansion and realignment It is experiencing a shift from a profession dominated by architects and planners directed at urban development to a more expansive set of practices engaging new forms of social and environmental ecologies as cities worldwide adapt to economic restructuring mass migrations and climate change Bringing together classic and new texts from the last 40 years this AD Reader focuses attention on the critical tools needed to understand how cities have been designed and constructed and then changed over time This enables new ways of envisioning how cities must be conceived and adapted in the future to the dual conditions of rapid urbanisation and economic restructuring coupled with unpredictable environmental conditions due to climate change With its emphasis on both urban design and the ecological this book brings together key articles that point the way forward for reconciling the often conflicting concerns of urbanism and environmentalism Twenty three texts are organised into four distinct sections covering metropolitan architecture the sprawling megalopolis the megacity and the recently emerging metacity These are broadly chronological and highlight the recent thinking behind some of the key urban developments ranging from the art of traditional city making covered by European architects and historians in the late 20th century to contemporary Tokyo described by Atelier Bow Wow Features original texts from Reyner Banham Rem Koolhaas Aldo Rossi Colin Rowe David Grahame Shane Bernard Tschumi Oswald Mathias Ungers and Robert Venturi Denise Scott Brown and Steven Izenour Contains newly commissioned texts from Mary Cadenasso Sharon Haar and Victoria Marshall Carlos Leite Steward TA Pickett and Albert Pope Includes new translations of important essays by Vittorio Gregotti and Paola Vigan Topics range from the European historic city to the Las Vegas Strip and the megacity of S o Paulo taking in the global sustainable city **Creative Subversions** Margot Francis, 2011-12-01

Creative Subversions explores how whiteness and Indigeneity are articulated through images of Canadian identity and the contradictory and contested meanings they evoke These benign even kitschy images she argues are haunted by ideas about race masculinity and sexuality that circulated during the formative years of Anglo Canadian nationhood In this richly

illustrated book Margot Francis shows how national symbols such as the beaver the railway the wilderness of Banff National Park and ideas about Indianness evoke nostalgic versions of a past that cannot be expelled or assimilated Juxtaposing historical images with material by contemporary artists she investigates how artists are giving these taken for granted symbols new and suggestive meanings
