Outcome Uncertain Science And The Political Process:

Outcome Uncertain Mary E. Ames, 1982-07-01 The New Politics of Science David Dickson, 1988 How science gets done in today's world has profound political repercussions since scientific knowledge through its technical applications has become an important source of both economic and military power The increasing dependence of scientific research on funding from business and the military has made questions about the access to and control of scientific knowledge a central issue in today's politics of science In The New Politics of Science David Dickson points out that the scientific community has its own internal power structures its elites its hierarchies its ideologies its sanctioned norms of social behavior and its dissenting groups And the more that science as a social practice forms an integral part of the economic structures of the society in which it is imbedded the more the boundaries and differences between the two dissolve Groups inside the scientific community for example will use groups outside the community and vice versa to achieve their own political ends In this edition Dickson has included a new preface commenting on the continuing and increasing influence of industrial and defense interests on American scientific research in the 1980s

Harold Innis in the New Century Charles R. Acland, William J. Buxton, 1999-10-19 The book is divided into three sections Reflections on Innis provides a historical reassessment of Innis Gaps and Silences considers the limitations of both Innis's thought and his interpreters and Innis and Cultural Theory offers speculations on his influence on cultural analysis The interpretations offered reflect the changing landscape of intellectual life as boundaries between traditional disciplines blur and new interdisciplinary fields emerge Harold Innis in the New Century is a valuable resource for scholars and students of Canadian studies communication studies cultural studies economic history and political science Contributors include Charles R Acland Calgary Alison Beale Simon Fraser Jody Berland York James Bickerton St Francis Xavier William J Buxton Concordia James Carey Columbia Ray Charron Concordia Cheryl Dahl University College of the Fraser Valley Michael Dorland Carleton Kevin Dowler York Donald Fisher UBC Sarah Fortin McGill Alain G Gagnon McGill Jane Jenson Montr'al Heather Menzies Carleton Richard Noble Winnipeg Daniel Sal'e Concordia Liora Salter Osgoode Hall Kim Sawchuk Concordia Irene Spry professor emerita Ottawa Judith Stamps Victoria and Andrew Werwick Trent

Lobbying, Political Uncertainty and Policy Outcomes Sebastian Koehler, 2018-08-28 This book analyses interest group communication strategies in parliamentary political systems and considers how political uncertainty which emerges from the political process shapes interest group communication strategies It develops a formal model of lobbying in a bicameral legislature with strong party discipline and discusses why interest groups choose public or private communication channels to influence political bargaining The book tests its hypothesis in different policy contexts including lobbying on major legislation in the field of labour and social policy

Nuclear Politics James M. Jasper, 2014-07-14 Why did nuclear energy policies in France Sweden and the United States very similar at the time of the oil

crisis of 1973 and 1974 diverge so greatly in the following years In answering this question James Jasper challenges one of the most popular trends in political analysis explanations relying exclusively on political and economic structures to account for public policies Jasper proposes a new cultural and state centered approach one heeding not only structural factors but cultural meanings individual biographies and elite discretion Surveying the period from the successful commercialization of light water reactor technology in the early 1960s to the present he explains the events that occurred after 1973 France built even more reactors than it needed the United States canceled most reactor orders and Sweden completed planned nuclear plants but decided to phase out nuclear energy by 2010 This work is based on one hundred interviews with managers policymakers and activists in the three countries In addition to providing a unique theoretical perspective it broadens our understanding of nuclear policy by looking at three countries in depth and over a long historical span Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

A History of Environmental Politics Since 1945 Samuel P.

Hays, 2000-10-15 Long before public life in America was enlivened with such dramatic sound bites as acid rain global warming rain forests and the ozone layer Samuel P Hays was well launched on his career of tracking this new phenomenon of environmental affairs His first foray a book on the early twentieth century conservation movement published in 1958 helped to launch environmental history as a field and his continued writings after coming to the University of Pittsburgh in 1960 helped to bring the field to full flower Now he has produced another volley which promises to continue to energize this growing and dynamic field of study A History of Environmental Politics since 1945 Hays provides an overview of environmental politics during the last half century both its formative and its maturing years that will be useful to those who are actively engaged in environmental affairs and those who wish to watch and assess it from the sidelines His themes are both simple and diverse His overall focus is on the emergence of an environmental culture which has engaged millions of Americans in varied ways of thought and action on the one hand and the intense opposition to that drive on the other Hays explores a wide range of issues such as the role of nature in an urban society pollution and its causes and effects the impact of an ever increasing population and its voracious appetite to consume At the same time he follows these threads through science technology economics management the structure of politics and the results of policy A History of Environmental Politics since 1945 provides an introduction to the subject for both the specialist and the lay audience the general public and the student It provides a high level of insight that will inform both those who are environmental experts and those who wish to take a first step at grasping the meaning of environmental affairs It constitutes a formative guide for a subject that

promises to engage the nation ever more fully in the years to come

Industrial Change in Advanced Economies F. E. Ian Hamilton,2018-03-26 Originally published in 1987 and taking a review of the theories and processes of industrial relocation as its starting point this book examines the nature of organisational and technological changes in detail and concludes with a series of industry case studies drawn from areas throughout the world The book examines the salient features and implications of the reorganisation of industries and industrial enterprises reflecting their development or harnessing of technological changes not least ot increase their bargaining power with control over or use of labour Various chapters discuss policy making and the role of the State posed by the speed scale and character of the changes *Kiplinger's Personal Finance* ,1979-02 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics **Technical Fouls** John Kurt Jacobsen,2018-02-07 What is it that shapes the direction of technological progress in advanced industrial societies Is it science Technology itself Or is it something even more powerful and all encompassing like power or money or politics John Kurt Jacobsen addresses this topic by investigating how contemporary democratic capitalist states govern the development and deployment of their scientific and technological resources He examines the interaction of ideology profits and power and their combined effect upon technology policy in democracies The social function of science has been a contentious area of scholarly study throughout the second half of the twentieth century Although the book focuses mainly on the United States for the sake of instructive comparison it also studies technological development of other societies including the former Soviet Union and China Some competing accounts of technical change across the borders include laissez faire cultural and neo Marxist markets In fact with regard to laissez faire markets even to inquire if science has a social function is to deviate from the appropriate images of economic development What is always politically at stake is who will rule the next stage in production due to each swing in technology which will in turn be associated with a new structure of control Most recently the microchip revolution and cyberspace are the most highly publicized candidates for the next upswing in technology and thus the next new structure of control The explanatory focus of the book is on ideology or on ideas about how technology works and should work and the three key areas of policy contention discussed are industrial development military uses and the environment Students and scholars of science technology and sociology should find this book useful in coming to terms with the fundamental questions underlying the development of technology today *TubeLight* Janet Rendall,2017-05-16 Nineteen year old Neon Ryder suspects she has a superhuman ability to heal people An attempt to cure her old friend Jimmy Trent an angry and depressed quadriplegic whose spinal cord was severed by a Viet Cong sniper s bullet unleashes a torrent of ever escalating problems on everyone she loves Her parents Frank and May living under the radar for twenty years are in danger of discovery May is a plant based alien with healing

powers hiding in a human body Frank is the FBI agent who captured her in 1949 If recaptured May will be studied and dissected and Frank subjected to a congressional military investigation Further complications arise when paraplegic Bob Evans son of a billionaire with powerful connections witnesses Neon s attempt to heal Jimmy Jimmy s recovery makes Bob think Neon gave Jimmy an experimental drug and he wants whatever she s got How the story plays out will have readers excitedly turning pages to discover the outcome

Aircraft David Pascoe,2004-09-03 In his celebrated manifesto Aircraft 1935 the architect Le Corbusier presented more than 100 photographs celebrating airplanes either in imperious flight or elegantly at rest Dwelling on the artfully abstracted shapes of noses wings and tails he declared Ponder a moment on the truth of these objects Clearness of function In Aircraft David Pascoe follows this lead and offers a startling new account of the form of the airplane an object that in the course of a hundred years has developed from a flimsy contraption of wood wire and canvas into a machine compounded of exotic materials whose wings can touch the edges of space Tracing the airplane through the twentieth century he considers the subject from a number of perspectives as an inspiration for artists architects and politicians as a miracle of engineering as a product of industrialized culture as a device of military ambition and finally in its clearness of function as an instance of sublime technology Profusely illustrated and authoritatively written Aircraft offers not just a fresh account of aeronautical design documenting in particular the forms of earlier flying machines and the dependence of later projects upon them but also provides a cultural history of an object whose very shape contains the dreams and nightmares of the modern age

Cardinal Choices ,2000-09 This book is a history of the complex relations between scientific advisors primarily physicists and U S presidents in their role as decision makers about nuclear weapons and military strategy The story unsurprisingly is one of considerable tension between the experts and the politicians as scientists seek to influence policy and presidents alternate between accepting their advice and resisting or even ignoring it First published in 1992 the book has been brought up to date to include the experiences of science advisors to President Clinton In addition the texts of eleven crucial documents from the Einstein Szilard letter to President Roosevelt 1939 to the announcement of the Strategic Defense Initiative by President Reagan 1983 have been added as appendixes

A Theory of Uncertainty Andreas Klinke,2024-08-02 Using sources from classical to modern that broach the phenomenon of uncertainty and its relation to risk this book creates a novel approach to the recognized but theoretically often unattended issue of uncertainty Andreas Klinke develops a new general theory of uncertainty that provides a taxonomy of categories which are deduced from a critical inventory in philosophy social and natural sciences and risk research Comprising six parts the philosophical grounding of uncertainty sets the stage for the following philosophical and social scientific accounts and explanation of four distinctive guises of uncertainty that form a taxonomic notion and rationale ontological epistemological linguistic communicative and teleological uncertainty The theoretical conceptual rumination provides a complex differentiated view of the anatomy of uncertainty and an understanding that can be used in further theoretical and empirical

research as well as socio political practice The latter is delineated in the final part addressing the societal domestication of uncertainty This book will be of great interest to scholars and students in philosophy social and natural sciences risk research as well as inter and transdisciplinary science fields
