Outer Space A New Dimension Of The Arms Race:

Outer Space - A New Dimension of the Arms Race Bhupendra Jasani, 2021-01-26 This book first published in 1982 analyses the prospects of the Cold War superpowers arms race spilling into outer space A SIPRI organized symposium in 1981 discussed the consequences of the militarization of outer space as well as further arms control and disarmament measures This book presents the findings of 20 eminent scientists lawyers and diplomats from 12 different countries

Outer Space Alexei Arbatov, Vladimir Dvorkin, 2011-11 In this era of globalization the world is facing a host of challenging security problems from the proliferation of weapons of mass destruction to international terrorism to accelerating climate change to energy security that cannot be resolved unilaterally especially through the unilateral use of military force One key issue that requires urgent global attention is literally out of this world the military use of outer space This collection of essays by leading Russian experts analyzes the current military use of outer space The book describes the space weapons programs of various countries It details the history of negotiations to prevent or at least control the weaponization of space including analyses of the political military technical and legal problems facing negotiators trying to avoid a catastrophic new space race

Space Weapons and U.S. Strategy Paul B. Stares, 2021-01-26 This book first published in 1985 analyses the factors that have shaped the militarization of space By examining in great detail the determinants of U S policy it explains why for over 25 years space did not become the scene of an arms race and why this began to change in the late 1970s Both superpowers did however develop a limited anti satellite capability in the 1960s and these programmes are also discussed Military Law Review ,1983

The Security Watershed Alexei G. Arbatov, 2021-01-27 This book first published in 1993 is an analytical review that discusses the changes in the international security policies of the USA and USSR at the end of the Cold War as well as the main events that occurred in the area of arms control A distinctive feature of this work is the detailed analysis of competing Russian views concerning arms control agreements and Russian military reforms

Verification Francesco Calogero, 2019-03-20 Since 1957 the Pugwash Conferences have brought together influential scholars and public figures concerned with reducing the danger of nuclear war Meeting in private as individuals rather than as representatives of their governments or institutions Pugwash participants exchange views with a combination of candour and flexibility seldom found i

The ABM Treaty Stockholm International Peace Research Institute, 1987 Among the measures employed to stabilize the strategic relationship between the East and West in the nuclear age the 1972 Anti Ballistic Missile ABM Treaty is of profound importance This cooperative agreement to limit offensive and defensive strategic forces has recently been challenged by the allure of new technology including the proposed Space based Defense System Coinciding with the third ABM Treaty Review Conference this study by an international roster of renowned scholars and policymakers including two negotiators of the 1972 Treaty provides insight

into the complexities of the issues involved and identifies possible solutions Concise timely and well balanced this collection is an important contribution to the debates surrounding the future of international peace and security Horrendous Death, Health, and Well-being Daniel Leviton,1991 A treatment of the incidence of horrendous death both inadvertent and deliberate which views the phenomenon as the greatest public health problem of modern times The author argues that as man causes such deaths he can also learn to eliminate them by collective action *Verification* Allan S. Krass,Stockholm International Peace Research Institute,2020-11-19 Originally published in 1985 the level of anxiety and suspicion between the USA and the USSR had rarely been higher Many advocates of arms control believed that effective verification would reduce tensions and lessen the risk of war This book analyses the two main issues of verification One is technological what are the present capabilities of various verification techniques and what is their potential The devices and methods currently employed by the two major nuclear powers and by international organizations to monitor the compliance of states with arms control or disarmament treaties are examined The second issue is political how do US and Soviet approaches compare what are the roles of domestic and bureaucratic politics and on what criteria can a workable standard of adequacy be based In short how much is enough Although the study concludes that a number of significant arms control measures can already be adequately verified modern weapons are becoming more mobile and it is becoming easier to conceal them There is a danger that the ability to hide weapons will outstrip the ability to find them Verification cannot promise to detect all violations a workable standard of adequacy in verification must derive from the ability to detect militarily significant violations **From Coexistence to Cooperation** Edward McWhinney,Douglas Ross,Grigory Tunkin,Vladien Vereshchetin,2023-11-27 In four short years the international landscape has been completely reorganized The major political fault line of the Cold War has been for the most part erased and the foundations have been laid for an entirely new era in international relations Serious focused analysis is urgently needed to help facilitate the process of ending the Cold War This volume the product of a Canada Soviet bilateral conference of jurists and other scholars specialized in International Law and International Organizatin and International Conflicts Resolution held at Simon Fraser University Vancouver in June 1990 attempts to provide such analysis Written by a professionally and scientifically distinguished team of Canadian and Soviet experts it deals with such issues as the winding up of the Nuclear and General Disarment process the current main proposals on strengtning the United Nations and on reforming and modernizing its main arenas and institutions new approaches to International Trade and Commerce on a multilateral basis developing new norms of International Environmental Protection Law and the Intrnational protection of Human Rights It is characterized above all by a common emphasis Soviet and Canadian on pragmatism and on a rigorously empirical problem oriented approach and offers not merely a description of international Law as it might now happen to exist The result is a suprisingly far ranging consensus not merely on the major World Community problems that should be deemed ripe for present study but also on their most desirable practical and realizable solutions Problems of Communism ,1983

NATO and the Strategic Defence Initiative Luc-André Brunet, 2022-08-19 This book explores the largely neglected issue of responses to the US Strategic Defence Initiative SDI or the Star Wars missile defence programme across NATO The chapters here explore the reactions of different Western allies to the announcement of the SDI in 1983 and especially the 1985 invitation to participate While existing studies have explored the origins of the American programme and the role it may have played in ending the Cold War this volume breaks new ground by considering the impact of the SDI on transatlantic relations in the 1980s Based on newly available archival sources this volume re evaluates the responses of eight NATO member state governments as well as the Soviet leadership to the SDI In addition to looking at top down governmental reactions the volume also explores the bottom up response to the SDI of civil society and peace activists on both sides of the Atlantic The volume examines how the American initiative derisively named Star Wars by its detractors provoked a crisis in relations with its allies during the final decade of the Cold War and how those tensions within NATO were ultimately resolved This book will be of much interest to students of Cold War history strategic studies foreign policy and international history

World Peace, Mass Culture, and National Policies William Over, 2004-04-30 The author offers an analysis of forms of U S mass culture that support parallel or critique official national regional and intergovernmental peace policy prevention and peacemaking Major popular culture forms such as film television news media peace parks and public memorials and peace and justice movements are considered as public discourses influencing and reflecting public understanding of peace and war themes The discussion includes events following September 11 2001 World Peace Mass Culture and National Policy takes a critical and analytical approach to Washington foreign policy unilateralist methods and corporatism as global hegemony It includes a wide discussion of these issues based on cultural institutions and ideologies of mass culture in the U S The work critiques the notion that corporate capitalism and the consumer affluence of the U S alone can bring other societies to democratic practice

The Soviet Navy Bruce W. Watson, Susan M Watson, Calland Carnes, Brian Larson, 2020-01-09 Since Admiral Sergei G Gorshkov was appointed to the office of commander in chief of the Soviet Navy in 1956 the Soviet Union has made a massive investment in naval construction training and operations As a result the Soviet Navy has grown from a coastal defense force to one of the world s two strongest navies This book offers a detailed assessment of every major aspect of the Soviet Navy from fleet structure and training facilities to command and control procedures and warfare and intelligence collection capabilities

Agreements for Arms Control Jozef Goldblat, Stockholm International Peace Research Institute, 2020-11-19 Originally published in 1982 this is the most comprehensive handbook on arms control ever published It contains an analysis of the bilateral and multilateral agreements reached since World War II An assessment is made of the extent to which each agreement has affected the arms race reduced the likelihood of war or otherwise contributed to the overall goal of disarmament Ongoing arms control negotiations are also analyzed The complex problem of verification of compliance with arms control obligations is critically examined and the shortcomings of the existing

arrangements are pointed out The critique is searching objective and free of the usual biases of official government reports The analysis of the arms control agreements is preceded by an historical overview beginning with the Hague Peace Conferences held at the turn of this century through the League of Nations attempts to bring about a universal reduction of armaments to the activities of the United Nations in the field of arms regulation and general disarmament The present arms control negotiating machinery is described The texts of the relevant documents are reproduced for handy reference and the status of the implementation of the most important multilateral arms control agreements is presented in tabular form Tables and figures facilitate the reading
