## Outlines Of Plant Pathology:

Laboratory Outlines in Plant Pathology Herbert Hice Whetzel, Lexemuel Ray Hesler, Charles Truman Gregory, William Howard Rankin, 1925      **Laboratory Outlines in Plant Pathology** H. H. Whetzel, Lex R. Hesler, 2013-10 This is a new release of the original 1925 edition      **Outline of Plant Pathology** Gary A. Strobel, Don E. Mathre, 1970      **Laboratory Outlines in Plant Pathology** ,      **Laboratory Outlines in Plant Pathology (Classic Reprint)** H. H. Whetzel, 2015-08-06

Excerpt from Laboratory Outlines in Plant Pathology These outlines are designed solely for the purpose of most effectively acquainting the student with the laboratory materials presented in this course They are the result of several years of experience and test in actual practice work They have been frequently revised It is expected that they will now be revised and reprinted at least every two years Although the acquisition of a body of facts is an important and necessary part of the work in such a course a more vital feature is the training in logical methods of acquiring them The student is urged to follow his outline carefully making sine at each step that the outline and the materials before him agree The same sequence of treatment is followed throughout all the outlines This sequence in procedure should be mastered promptly The term papers will afford opportunities for determining how well the student has grasped the logic of this procedure The grouping of diseases here presented is we believe an important step in diverting attention from the domination of systematic mycology in phytopathological teaching and writing and of directing it toward the more logical classification and study of diseases on the baas of the pathological phenomena exhibited At the same time the subgrouping of the diseases according to the chief etiologic factor involved provides for a point of view still generally presented in the teaching of plant pathology It is not expected that all the diseases herein outlined will be covered in a three hours course The instructor will make such selections from the different groups as will best serve his purpose in illustrating the fundamentals of the subject in the case of the students in his classes No laboratory practice in the methods of control of the disease studied is provided That phase of the subject is fully treated in the course based upon and following this namely The Principles of Plant Disease Control These outlines are designed specifically for the work as given at Cornell University and without any attempt to adapt them for use in other institutions It is hoped however that teachers elsewhere may at least find them helpful and possibly usable in their classes Acknowledgments are due Mr Chas Chupp instructor in the department of Plant Pathology for the preparation of a number of the outlines We also gratefully acknowledge the friendly advice and assistance of the Comstock Publishing Company in our effort to make the cost of these outlines to the student as reasonable as possible About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of

imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
