Neonatology? Recent Advances in Monitoring, Diagnostics, and Therapeutics in Neonatal Care Minesh

Khashu, Karel Allegaert, 2025-01-27 Neonates and infants have been referred to as therapeutic orphans due to the overall scarcity of treatments that have been developed and tailored to their needs. However, in recent years, there have been increased efforts by researchers and regulatory bodies to focus on the provision of drugs, devices, and treatment modalities tailored for pediatric use. This trend is also being witnessed in neonatology, but a lot more needs to be done. This Research Topic aims to capture the latest research reviews and scientific opinion on new drugs, devices, diagnostics, monitoring modalities, and therapeutic models in neonatology. This includes specific products like drugs and medical devices used in the detection, monitoring, or management of various neonatal conditions such as Bronchopulmonary dysplasia, Neonatal seizures, Malabsorption, and poor growth, Necrotizing enterocolitis, Hypoxic ischemic encephalopathy, Retinopathy of prematurity, Pediatric short bowel syndrome, Respiratory distress syndrome, Congenital hyperinsulinism, Neonatal infections, and Sepsis.

Recent Advances in Ophthalmology S. I. Davidson, F. T. Fraunfelder, 2013-10-22 *Recent Advances in Ophthalmology* focuses on developments in ophthalmology including therapy, keratotomy, phototoxicity, and retinopathy. The compilation first offers information on the therapy of herpes simplex, anterior segment surgery, and use of viscous and viscoelastic substances in ophthalmology. Topics include systemic antiviral agents and ocular disease, influence of new instruments and technology, criteria for the selection of viscous or viscoelastic material, and indications for the use of viscous substances. The text then ponders on radial keratotomy, intraocular lenses, and treatment of congenital cataracts. The publication takes a look at ocular phototoxicity and vitreous surgery, as well as proliferative diabetic retinopathy, posterior penetrating trauma, effects of non-ionizing radiation on biological systems, body temperature, and light damage and retinal photodamage. The text also touches on the management of diabetic retinopathy, treatment of malignant melanomas of the posterior uvea, and macular disease with serious retinal detachment. The compilation is highly recommended for ophthalmologists and readers interested in the developments in ophthalmology. *Recent Advances in Pediatrics Special Vol 17 Adolescence* Gupta Suraj, 2006-01-01 The 17th special volume of the noted international series *Recent Advances in Pediatrics* first launched in 1991 and now concurrently in the 16th Annual and 16th special volumes RAP 16 and RAP Special Vol 16 Pediatric Cardiology respectively.
