Output Decline in Eastern Europe R. Holzmann, János Gács, G. Winckler, 2012-12-06 The first phase of transition to a market economy in Central and Eastern Europe was characterized by a sharp output decline The fall in real GDP exceeded 20% while real industrial production decreased even by 40% Output Decline in Eastern Europe aims at providing comprehensive multi factor explanations for this unique painful experience Various hypotheses are analyzed credit and fiscal policies may have been too tight the collapse of the CMEA and the USSR came as a shock domestic producers were neither experienced nor flexible enough to adjust the output to new patterns of demand Output Decline in Eastern Europe contains a unique combination of authors from East and West who extensively analyze new data based on country studies Understanding the causes of recent output decline the subject matter of this volume may help to assess the prospects for Eastern Europe The book is addressed to researchers and students as well as interested officials who deal with the transition of formerly centrally planned economies in Central and Eastern Europe *Crisis, Stabilization and Growth* Patrick J. Hopps, Demetrius S. Iatridis, 1998-08-27 Central and Eastern European countries are facing the transition from central to market systems with different strategies and capacities As the task of societal transformation is without precedent in world history the massive economic restructuring has revealed the need for distributive justice and general well being As the editors and contributors to this volume point out the monolithic preoccupation with economic restructuring in a market economics framework is implemented at the expense of social protection and security In contrast to traditional views of privatization as only an economic or managerial phenomenon this collection approaches privatization as a broader integrated process of societal transformation Privatization as defined here consists of integrated processes of societal restructuring that affect sociopolitical economic and ideological constructs as well as human and physical capital development transformation of family structures market stabilization and organization of social care Public policymakers as well as scholars and researchers of contemporary Eastern Europe will find this collection of great interest and an important challenge to the economic models of privatization which undervalue social costs **Forging an Integrated Europe** Jeffry A. Frieden, Barry Eichengreen, 2010-05-18 As European integration has deepened and become more invasive the tension between the authority of the European Union and the autonomy of member states has increased while dissatisfaction with the political institutions of the European Union has increased dramatically How fast and how far European integration will

proceed are critical issues for scholars and policymakers in Europe and the United States Barry Eichengreen and Jeffrey Frieden have assembled a group of prominent economists and political scientists to discuss the most important and most difficult political and economic issues involved in European integration The book focuses on three major issues economic and monetary union the reform and development of responsive political institutions for the Union and the enlargement of the Union to include states to the east In examining these issues the writers consider such problems as the trade off between the benefits of international economic cooperation and the ability to pursue domestic welfare policies how to increase the political accountability of the institutions of the EU and how the EU can both be enlarged in membership and deepened in terms of the powers given community institutions The contributors are Steven Arndt Peter Bofinger Christian de Boisseu Michele Fratianni Geoffrey Garrett Jurgen von Hagen Ander Todal Jenssen Ken Kletzer Lisa Martin Jonathan Moses Jean Pisani Ferry and Michael Wallerstein in addition to the editors Barry Eichengreen is Professor of Economics University of California Berkeley Jeffrey Frieden is Professor of Government Harvard University

as a part of the Czechoslovak Federal Republic embarked on an unprecedented path that should have lead not only to stabilization and liberalization but also to very rapid mass privatization of its sector of large enterprises that have dominated its economy to an extreme extent
