Outrageous Practices The Alarming Truth About How Medicine Mistreats Women:

Outrageous Practices Leslie Laurence, Beth Weinhouse, 1997 Women's health is threatened by gender bias on three fronts: bias against women patients, bias against women doctors, health practitioners and medical scientists, and bias against women as medical research subjects. *Outrageous Practices*, a highly acclaimed best seller, newly available in paperback, chronicles the history of a prejudiced health care establishment and shows how the current system remains captive to male-dominated medicine and research. The book examines how gender discrimination manifests itself in hospitals, physicians' and psychiatrists' offices, medical schools, research labs, government health-related agencies, and biomedical and pharmaceutical industries.

KEY POINTS

- o New paperback edition of a powerful book about gender bias in the medical establishment
- o New preface by authors brings the issues up to date

Outrageous Practices Leslie Laurence, 1998-12

Laurence and Weinhouse shine a penetrating light on the medical establishment and discover pervasive neglect, rampant gender bias, and systematized discrimination in women's health care, an issue that has galvanized women in the nineties. They investigate the shocking anti-woman bias at medical schools and research facilities and take to task physicians' offices where female patients are treated differently from their male counterparts. They eloquently demonstrate that sexist medicine is bad science and the demand for nonsexist treatment is nothing less than the demand for equitable treatment in research, education, and patient care.

Outrageous Practices Leslie Laurence, Beth Weinhouse, 1994 Exposes the inequalities, neglect, discrimination, and harassment against women in medical practice and medical schools, including untested drugs and unproductive research.

Australian Women's Health Lenore Manderson, 1998 *Australian Women's Health: Innovations in Social Science and Community Research* contains a compilation of studies that investigate the status of women's physical and mental health in Australia. The studies in this book will help researchers and practitioners from any country benefit from the methodological approaches used to ask questions of policy, program, and epidemiological interests. From *Australian Women's Health*, you will learn ways to discover the different needs of women depending on their age, race, and economic situation; if these needs are being met; and how politics affect women's health care issues. *Australian Women's Health* offers suggestions for further research and gives you insight into Australian health policies, the social aspects of women's health, and women's health care costs, in particular for women in minority communities. Furthermore, this book investigates issues that affect women based on their occupation, cultural background, and roles in society. This information will help you understand the diverse needs and health care concerns of Australian women. The studies in *Australian Women's Health* identify current problems and offer future suggestions on how to improve women's health care, including evaluating the positive and negative aspects of women's health centers (WHCs) in order to offer or improve important services to women and maintain government funding, conducting a follow-up survey in conjunction with the Women's Health Australia (WHA) study to learn more about health service utilization, eating disorders, violence, social support, and health care for widowers and services.

Beck, Sandra L. Ragan, Athena du Pr., Athena du Pre, 2013-11-05 In the 1960s feminists voiced their outrage about the health care system in the United States which routinely discriminated against women and in so doing literally jeopardized their health and well being Over a decade later women s health advocates still stressed the need for reform of this male dominated institution because of the on going threat to the health of American women In the 1990s nearly 40 years after women began their fight for quality and equitable treatment from the medical profession women unfortunately continue to confront problems on numerous levels including discrimination in medical research and in the availability of insurance and health care providers Most alarming however is the fact that women today like women in the 60s and before lack information understanding and adequate diagnoses and treatment from their health caregivers This book extends from a program of research on women s health issues by the authors More than 150 audio taped naturally occurring interactions between health caregivers and their female patients from three different health care settings as well as ethnographic field notes in three additional settings which provide health care to women constitute the data for this investigation They explore the consequentiality of relational issues during women s health care encounters and examine how health care participants save face enact roles co construct their encounters and accomplish the objective of education and medical care Unlike earlier works this study utilizes an extensive data collection derived directly from hundreds of interactions between health care providers and their patients as opposed to surveys or case studies of singular practitioners The authors examine the data in light of insights from a variety of theoretical perspectives and are committed to exploring the implication that medical encounters are collaboratively managed by both patients and caregivers Given these theoretical and empirical contributions the authors believe this book will advance

present understanding in the areas of health and relational communication women s health care gender issues in communication conversation analysis discourse processes and institutional talk
