Children Learning Outside the Classroom Sue Waite, 2011-02-09 Learning outside the classroom is increasingly seen as beneficial in both early years and primary settings and it is becoming embedded in the curriculum but what are the benefits of this approach What do children learn from being outside the classroom This book explores why learning beyond the classroom is important for children and offers practical examples of how to improve outdoor learning experiences for all children In the face of the increasing restriction of children's outdoor experiences it will help the reader rise to the challenge of finding creative opportunities for working across the curriculum through outdoor activities Chapters cover the theory behind learning outside the classroom transition from early years to primary practice what outdoor learning looks like in different contexts teaching and learning across the curriculum outdoors how to evaluate the effectiveness of different outdoor activities and learning outside the classroom as a whole Each chapter has case studies thoughts on theory points for practice and summaries to help readers digest the most important information Critical thinking and reflective practice are encouraged throughout to support consideration of how outdoor learning relates to the curricula in England Wales Scotland and Northern Ireland Sue Waite is a Research Fellow at the University of Plymouth where she leads the outdoor and experiential learning research network in the Faculty of Education

Children Today, 1982 Weaving Work and Motherhood Anita Iltis Garey, 1999 In American culture the image of balancing work and family life is often represented in the glossy shot of the executive track woman balancing cell phone laptop and baby In *Weaving Work and Motherhood* Anita Iltis Garey focuses not on the corporate executives so frequently represented in American ads and magazines but rather on the women in jobs that typify the vast majority of women's employment in the United States A sociologist and work and family expert Garey situates her research in the health service industry Interviewing a racially and ethnically diverse group of women hospital workers clerical workers

janitorial workers nurses and nurse s aids Garey analyzes what it means to be at once a mother who is employed and a worker with children Within the limits of the resources available to them women integrate their identities as workers and their identities as mothers by valuing their relation to work while simultaneously preserving cultural norms about what it means to be a good mother Some of these women work non day shifts in order to have the right blocks of time at home including for example a registered nurse who explains how working the night shift enables her to see her children off to school greet them when they return and attend school events in the way she feels good mothers should even if she finds little time for sleep Moving beyond studies of women work and family in terms of structural incompatibilities Garey challenges images of the exclusively work oriented or exclusively family oriented mother As women talk about their lives Garey focuses on the meanings of motherhood and of work that underlie their strategies for integrating employment and motherhood She replaces notions of how women balance work and family with a better understanding of how women integrate negotiate and weave together their identities as both workers and mothers Breaking new ground in the study of work and family Weaving Work and Motherhood offers new insights for those interested in sociology gender and women s studies social policy child care social welfare and health care *The American Journal of Obstetrics and Diseases of Women and Children* ,1898
