Outside Lies Magic Regaining History And Awareness In Everyday Places:

Outside Lies Magic John R. Stilgoe, 2009-05-26 *Outside Lies Magic* is a book about the acute observation of ordinary things about becoming aware in everyday places about seeing in utterly new ways about enriching your life unexpectedly For more than 20 years John R Stilgoe has developed and practiced the art of exploring the everyday world around us where so much lies hidden just beneath the surface offering uncommon knowledge if we but know what to look for In this remarkable book Stilgoe inspires us to become explorers on our own on foot or on bicycle and by so doing to reap the benefits of escaping even temporarily the traps of our programmed lives Exploration encourages creativity serendipity invention he writes And while sharing his insights on how to explore Stilgoe provides a fascinating pocket history of the American landscape as striking in its originality as it is revealing Stilgoe dissects our visual surroundings his observations will transform the way you see everything Through his eyes an abandoned railroad line is redolent of history and future promise front lawns recall our agrarian past vacant lots hold cathedrals of potential From the electrical grid overhead to fences malls and main streets Stilgoe offers a fresh understanding of the links and fractures in our society After reading *Outside Lies Magic* your world will never look the same again

, **Biophilic Cities** Timothy Beatley, 2011 *Biophilic Cities* makes a powerful case for placing nature at the center of urban life Tim Beatley argues that true sustainability goes beyond infrastructure it requires cities that nurture our innate connection to the natural world Drawing on global examples he shows how urban areas can weave nature into every layer of design and planning creating healthier more vibrant and resilient communities *Literacy and Mobility* Brice Nordquist, 2017-04-28 Pushing forward research on emerging literacies and theoretical orientations this book follows students from different tracks of high school English in a failing U S public school through their first two years in universities colleges and jobs Analytical and methodological tools from new literacy and mobility studies are employed to investigate relations among patterns of movement and literacy practices across educational institutions neighborhoods cultures and national borders By following research participants trajectories in and across scenes of literacy in school college home online in transit and elsewhere the work illustrates how students help constitute and connect one scene of literacy with others in their daily lives how their mobile literacies produce maintain and disrupt social relations and identities with respect to race gender class language and nationality and how they draw upon multiple literacies and linguistic resources to accommodate resist and transform dominant discourses **Questing** Delia

In nearly 200 entries the encyclopedia traces the history of artifacts concepts and ideas industries peoples and cultures cultural productions historical forces periods and styles religious and secular rituals and traditions and much more Everyone from researchers and curators to students and general readers will find example after example of how the objects and environments created or altered by humans reveal as much about American life as diaries documents and texts

Urbanism Without Effort Charles R. Wolfe, 2019-01-31 How do you create inviting and authentic urban environments where people feel at home Countless community engagement workshops studies by consulting firms and downtown revitalization campaigns have attempted to answer this age old question In *Urbanism Without Effort* Chuck Wolfe argues that unplanned places can often teach us more about great placemaking than planned ones From impromptu movie nights in a Seattle alley to the adapted reuse of Diocletian's Palace in Split Croatia Wolfe searches for the first principles of what makes humans feel happy and safe amid the hustle and bustle of urban life He highlights the common elements of cities around the world that spontaneously bring people together being inherently walkable factors that contribute to safety at night the importance of intersections and corners and more In this age of skyrocketing metropolitan growth he argues looking to the past might be our best approach to creating the urban future we dream about A whirlwind global tour *Urbanism Without Effort* offers readers inspiration historical context and a better understanding of how an inviting urban environment is created

Remembering Roadside America John A. Jakle, Keith A. Sculle, 2011-09-30 The use of cars and trucks over the past century has remade American geography pushing big cities ever outward toward suburbanization spurring the growth of some small towns while hastening the decline of others and spawning a new kind of commercial landscape marked by gas stations drive in restaurants motels tourist attractions and countless other retail entities that express our national love affair with the open road By its very nature this landscape is ever changing indeed ephemeral What is new quickly becomes old and is soon forgotten In this absorbing book John Jakle and Keith Sculle ponder how *Roadside America* might be remembered especially since so little physical evidence of its earliest years survives In straightforward and lively prose supplemented by copious illustrations historic and modern photographs advertising postcards cartoons roadmaps they survey the ways in which automobility has transformed life in the United States Asking how we might best commemorate and preserve this part of our past which has been so vital economically and politically so significant to the cultural aspirations of ordinary Americans yet so often ignored by scholars who dismiss it as kitsch they propose the development of an actual outdoor museum that would treat seriously the themes of our roadside history Certainly museums have been created for frontier pioneering the rise of commercial agriculture and the coming of water and steam powered industrialization and transportation especially the railroad Is now not the time the authors ask for a museum forcefully exploring the automobile's emergence and the changes it has brought to place and landscape Such a museum need not deny the nostalgic appeal of roadsides past but if done properly it could also tell us much about what the authors describe as the most important kind of

place yet devised in the American experience John A Jakle is Emeritus Professor of Geography at the University of Illinois Urbana Champaign Keith A Sculle is the former head of research and education at the Illinois Historic Preservation Agency They have coauthored such books as *America's Main Street Hotels Transiency and Community in the Early Automobile Age* *Motoring The Highway Experience in America* *Fast Food Roadside Restaurants in the Automobile Age* and *The Gas Station in America* Urban Transformations in the U.S.A. Julia Sattler,2016-01-15 How did American cities change throughout the 20th and early 21st century This timely publication integrates research from American Literary and Cultural Studies Urban Studies and History The essays range from negotiations of the ethnic city in US literature and media to studies of recent urban phenomena and their representations gentrification re appropriation and conversion of urban spaces in the USA These interdisciplinary and intercultural perspectives on American cities provide unique points of access for studying the complex narratives of urban transformation **Paradoxes of Green** Gareth Doherty,2017-02-07 This highly innovative book is a multidisciplinary study of green and its significance from multiple perspectives aesthetic architectural environmental political and social It is centered on the Kingdom of Bahrain the smallest and greenest of the Arab states in the Persian Gulf where green has a long and deep history appearing cooling productive and prosperous and a radical contrast to the hot hostile desert As is the case with cities around the world green is often celebrated as a counter to gray urban environments yet green has not always been good for cities To have the color green manifested in arid environments is often in direct conflict with green from an environmental point of view this paradox is at the heart of the book Given the resources required to maintain green in arid areas including cities the provision of green often bears significant environmental costs In arid environments such as Bahrain this contradiction becomes extreme and even unsustainable Based on long term ethnographic fieldwork Gareth Doherty explores the landscapes of Bahrain where green represents a plethora of implicit human values and lives in dialectical tension with other culturally and environmentally significant colors and hues The book's six chapters focus on Blue Red Date palm Green Grass Green Beige and White Implicit in his book is the argument that concepts of color and object are mutually defining and thus a discussion about green becomes a discussion about the creation of space and place
