Outstanding Days:

Guy Wanjialin, 2004 A world without accounting means confusion and chaos Accounting is not only used in the business world but rather it is used by everyone in all types of situations Tax touches every aspect of our lives People are talking about tax on the TV the radio newspaper and the Internet Life has grown as a whole toward higher levels of complexity The language of accounting and taxation is also expanding More and more new words are created and new meanings are added to the old words Do you know the meaning of these words ad hoc accounting bath below water blackout capex carve out e tax postil Sarbanes Oxley strata Each term has its unique meaning you may not be able to find a definition in an ordinary dictionary An International Dictionary of Accounting Taxation is a book with more than 12 000 entries drawn from accounting auditing and taxation Each entry has a clear one sentence definition right to the point Whether you are an accountant CPA tax professional or amateur you will find this dictionary of immeasurable help *The Art of Company Valuation and Financial Statement Analysis* Nicolas Schmidlin, 2014-04-30 The Art of Company Valuation and Financial Statement Analysis A value investor s guide with real life case studies covers all quantitative and qualitative approaches needed to evaluate the past and forecast the future performance of a company in a practical manner Is a given stock over or undervalued How can the future prospects of a company be evaluated How can complex valuation methods be applied in practice The Art of Company Valuation and Financial Statement Analysis answers each of these questions and conveys the principles of company valuation in an accessible and applicable way Valuation theory is linked to the practice of investing through financial statement analysis and interpretation analysis of business models company valuation stock analysis portfolio management and value Investing The book s unique approach is to illustrate each valuation method with a case study of actual company performance More than 100 real case studies are included supplementing the sound theoretical framework and offering potential investors a methodology that can easily be applied in practice Written for asset managers investment professionals and private investors who require a reliable current and comprehensive guide to company valuation the book aims to encourage readers to think like an entrepreneur rather than a speculator when it comes to investing in the stock markets It is an approach that has led many to long term success and consistent returns that regularly outperform more opportunistic approaches to investment Financial Intelligence for IT Professionals Julie Bonner, 2021-12-09 There are many books written for the accounting and finance community However there are very few books written to help the non financial career professionals who still need to understand the conceptual fundamentals of accounting and finance In 20 years of teaching this material to non financial professionals Dr Bonner has perfected a teaching approach that works to help the non financial professional engage with the material to use financial information in leveraging their career without becoming overloaded with information that is not helpful to them Learning this material takes repetition application and building the thinking processes necessary for effectiveness Many think the challenge with finance is the math but as this

book will demonstrate it is a conceptual problem If you understand the conceptual framework you will understand the math
Dr Julie Bonner is currently a tenured professor at Central Washington University in the information technology and administrative management department Her career has spanned business and education for over 30 years Initially she received a Bachelor of Science degree in accounting whereafter she earned an MBA and then a doctorate in organizational leadership

Strategic Entrepreneurial Finance Darek

Klonowski, 2014-11-27 Entrepreneurial finance is a discipline that studies financial resource mobilization resource allocation risk moderation optimization in financial contracting value creation and value monetization within the context of entrepreneurship However without proper strategic consideration the discipline is incomplete This book examines how the activity of entrepreneurial finance can be enhanced via a concentration on value creation and through improved strategic decision making The most unique feature of the book is its focus on value creation For entrepreneurs value creation is not a one-off activity but rather a continuous cycle of incremental improvements across a wide range of business activities Entrepreneurial value creation is described in four comprehensive stages value creation value measurement value enhancement and value realization referred to as the C-MER model This book focuses on what creates value rather than merely presenting value creation in a straight accounting framework At the same time deliberate and tactical planning and implementation ensure that the firm does not ignore the components necessary for it to survive and flourish Vigorous strategic deliberations maximize the entrepreneurial firm's chances of making the right business decisions for the future enable the firm to manage its available financial and non-financial resources in the most optimal manner ensure that the necessary capital is secured to progress the development of the firm to its desired development level and build value While financial considerations are important the field of strategic entrepreneurial finance represents a fusion of three disciplines strategic management financial management and entrepreneurship This orientation represents a natural evolution of scholarship to combine specific domains and paradigms of naturally connected business disciplines and reflects the need to simultaneously examine business topics from different perspectives which may better encapsulate actual entrepreneurial practices
