Advances in Oncology, 2025 Leonidas C. Platanias, 2025-04-29 *Advances in Oncology* reviews the year's most important findings and updates within the field in order to provide practicing oncologists with the current clinical information they need to improve patient outcomes. A distinguished editorial board led by Dr. Leonidas C. Platanias identifies key areas of major progress and controversy and invites preeminent specialists to contribute original articles devoted to these topics. These insightful overviews in oncology inform and enhance clinical practice by bringing concepts to a clinical level and exploring their everyday impact on patient care. Contains 25 articles on such topics as adaptive radiation therapy, MRI-guided or CT-guided neoadjuvant treatment strategies in gastrointestinal stromal tumors, treatment advances in small cell lung cancer, sexual health following diagnosis and treatment of gynecologic cancers, neurocognitive outcomes for childhood cancer survivors, targeting IDH in gliomas, the role of allogeneic stem cell transplant for elderly leukemia patients, bladder-sparing approaches in muscle-invasive bladder cancer, and more. Provides in-depth clinical reviews in oncology providing actionable insights for clinical practice. Presents the latest information in the field under the leadership of an experienced editorial team. Authors synthesize and distill the latest research and practice guidelines to create these timely topic-based reviews.

**Advances in Clinical Chemistry**, 2012-12-31 Volume 59 in the internationally acclaimed *Advances in Clinical Chemistry* contains chapters submitted from leading experts from academia and clinical laboratory science. Authors are from a diverse field of clinical chemistry disciplines and diagnostics ranging from basic biochemical exploration to cutting-edge microarray technology. Written by authors representing the diverse field of clinical chemistry and diagnostics, reviews in *Advances in Clinical Chemistry* cover a range of cutting-edge research ranging from basic biochemical exploration to microarray technology. *NCI Monographs*, 1986

**Current Developments in Biosensors and Emerging Smart Technologies**, 2025-07-30 This book covers recent advancements in sensor technologies, emphasizing creative and innovative strategies that have significantly expanded our understanding of this topic. This book provides a thorough review of nanosystems and biosensors in biomedical applications, focusing on their functions in nanotechnology, healthcare, diagnostics, and therapeutic monitoring. Important subjects include antibiotic detection, sensors, biomarker monitoring, early cancer detection, glucose sensing, and next-generation electrochemical biosensors for infectious disease diagnostics. Modern advancements in wearable digital sensors, colorimetric smart sensors, and quantum biosensing technologies for drug development and pharmaceutical research are also covered in the book. Other chapters investigate high-throughput optical modulation, biosensing platforms, integrated optical biosensors, and transdermal alcohol biosensors for detecting low-concentration biomarkers. These contributions offer a comprehensive understanding of the new instruments and methods that are advancing biosensing research. Development of Folates and Folic Acid Antagonists in Cancer Chemotherapy, 1987 *Advances in Animal Biotechnology and its Applications* Suresh Kumar Gahlawat, Joginder Singh Duhan, Raj Kumar Salar, Priyanka Siwach, Suresh

Kumar,Pawan Kaur,2018-05-29 This book explores the recent advancements in cutting edge techniques and applications of Biotechnology It provides an overview of prospects and applications while emphasizing modern and emerging areas of Biotechnology The chapters are dedicated to various field of Biotechnology including genome editing probiotics in silico drug designing nanoparticles and its applications molecular diagnostics tissue engineering cryopreservation and antioxidants It is useful for both academicians and researchers in the various disciplines of life sciences agricultural sciences medicine and Biotechnology in Universities Research Institutions and Biotech companies This book provides the readers with a comprehensive knowledge of topics in Genomics Bionanotechnology Drug Designing Diagnostics Therapeutics Food and Environmental Biotechnology The chapters have been written with special reference to the latest developments in the frontier areas of Biotechnology that impacts the Biotech industries New Anti-cancer Drug Development and Evaluation

Yongchang Zhang,Nong Yang,2024-12-09 This book aims to help researchers to understand the current status of new drug development in China and major events experienced in the development of new drugs It also helps clinicians and basic research scientists to grasp the types indications and adverse reactions of common new drugs clarifies key events experienced during the launch of new drugs and discusses future perspectives of clinical medicine development This book is also beneficial to clinicians by helping them to better become physician scientists *Advances in Cancer Management*

Ravinder Mohan,2012-01-27 Cancer is now the most common cause of death in the world However because of early diagnosis better treatment and advanced life expectancy many cancer patients frequently live a long happy and healthy life after the diagnosis and often live as long as patients who eventually do not die because of cancer This book presents newer advances in diagnosis and treatment of specific cancers an evidence based and realistic approach to the selection of cancer treatment and cutting edge laboratory developments such as the use of the MALDI technique and computational methods that can be used to detect newer protein biomarkers of cancers in diagnosis and to evaluate the success of treatment *Approved: The Life Cycle of Drug Development*

Narendra Chirmule,Vihang Vivek Ghalsasi,2025-04-29 Drug development stands at a transformative threshold in modern medicine Over the past three decades biotherapeutics have redefined medical innovation paving the way for treatments that are not only effective but also accessible This book provides a comprehensive exploration of the intricate world of drug development shedding light on the essential balance between efficiency regulatory compliance and quality to achieve both innovation and affordability Written by leading experts this guide delves into the multi faceted process of drug development covering critical areas such as pharmacology biomarkers toxicology product development manufacturing and clinical trials all framed within the stringent requirements set by the FDA Readers will find in depth discussions on the latest technologies statistical approaches and quality assurance measures essential to navigating today s complex regulatory landscape With practical case studies project reports and curated article reviews this book offers valuable insights into risk assessment and mitigation at every stage of development It serves as an indispensable resource for

students educators and industry professionals aiming to foster a deeper understanding of the challenges and opportunities in drug development and to inspire the next generation of scientific innovators      *Development and Application of Biomarkers* Roger L. Lundblad, 2016-04-19 First introduced to biomedical research in 1980 the term biomarker has taken on a life of its own in recent years and has come to mean a number of things In biomedical science biomarker has evolved to most commonly mean a characteristic that can be used either as a diagnostic or a prognostic but most significantly as a screening indicator for p      **Advances in Selected Artificial Intelligence Areas** Maria Virvou, George A. Tsihrintzis, Lakhmi C. Jain, 2022-02-27 As new technological challenges are perpetually arising Artificial Intelligence research interests are focusing on the incorporation of improvement abilities into machines in an effort to make them more efficient and more useful Recent reports indicate that the demand for scientists with Artificial Intelligence skills significantly exceeds the market availability and that this shortage will intensify further in the years to come A potential solution includes attracting more women into the field as women currently make up only 26 percent of Artificial Intelligence positions in the workforce The present book serves a dual purpose On one hand it sheds light on the very significant research led by women in areas of Artificial Intelligence in hopes of inspiring other women to follow studies in the area and get involved in related research On the other hand it highlights the state of the art and current research in selected Artificial Intelligence areas and applications The book consists of an editorial note and an additional thirteen 13 chapters all authored by invited women researchers who work on various Artificial Intelligence areas and stand out for their significant research contributions In more detail the chapters in the book are organized into three parts namely i Advances in Artificial Intelligence Paradigms ii Advances in Artificial Intelligence Applications and iii Recent Trends in Artificial Intelligence Areas and Applications This research book is directed towards professors researchers scientists engineers and students in Artificial Intelligence related disciplines It is also directed towards readers who come from other disciplines and are interested in becoming versed in some of the most recent Artificial Intelligence based technologies An extensive list of bibliographic references at the end of each chapter guides the readers to probe further into the Artificial Intelligence areas of interest to them      **Micro- and Nanotechnologies-Based Product Development** Neelesh Kumar Mehra, Arvind Gulbake, 2021-09-06 This book provides comprehensive information of the nanotechnology based pharmaceutical product development including a diverse range of arenas such as liposomes nanoparticles fullerenes hydrogels thermally responsive externally activated theranostics TREAT hydrogels microspheres micro and nanoemulsions and carbon nanomaterials It covers the micro and nanotechnological aspects for pharmaceutical product development with the product development point of view and also covers the industrial aspects novel technologies stability studies validation safety and toxicity profiles regulatory perspectives scale up technologies and fundamental concept in the development of products Salient Features Covers micro and nanotechnology approaches with current trends with safety and efficacy in product development Presents an overview of the recent progress of stability testing reverse

engineering validation and regulatory perspectives as per regulatory requirements Provides a comprehensive overview of the latest research related to micro and nanotechnologies including designing optimisation validation and scale up of micro and nanotechnologies Is edited by two well known researchers by contribution of vivid chapters from renowned scientists across the globe in the field of pharmaceutical sciences Dr Neelesh Kumar Mehra is working as an Assistant Professor of Pharmaceutics Biopharmaceutics at the Department of Pharmaceutics National Institute of Pharmaceutical Education Research NIPER Hyderabad India He received TEAM AWARD for successful commercialisation of an ophthalmic suspension product He has authored more than 60 peer reviewed publications in highly reputed international journals and more than 10 book chapter contributions He has filed patents on manufacturing process and composition to improved therapeutic efficacy for topical delivery He guided PhD and MS students for their dissertations research projects He has received numerous outstanding awards including Young Scientist Award and Team Award for his research output He recently published one edited book Dendrimers in Nanomedicine Concept Theory and Regulatory Perspectives in CRC Press Currently he is editing books on nano drug delivery based products with Elsevier Pvt Ltd He has rich research and teaching experience in the formulation and development of complex innovative ophthalmic and injectable biopharmaceutical products including micro and nanotechnologies for regulated market Dr Arvind Gulbake is working as an Assistant Professor at the Faculty of Pharmacy School of Pharmaceutical Population Health Informatics at DIT University Dehradun India He has authored more than 40 peer reviewed publications in highly reputed international journals four book chapters and a patent contribution He has received outstanding awards including Young Scientist Award and BRG Travel Award for his research He is an assistant editor for IJAP He guided PhD and MS students for their dissertations research projects He has successfully completed extramural project funded by SERB New Delhi Government of India He has more than 12 years of research and teaching experience in the formulation and development of nanopharmaceuticals **Cumulated Index Medicus** ,1987
