Politics Of Strategic Aircraft Modernization:

The Politics of Strategic Aircraft Modernization David S. Sorenson, 1995-11-20 This study examines three major bomber aircraft acquisition programs the B 36 the B 52 and the B 2 The central question for each of these programs is whether they were chosen to fit national strategic objectives or to meet the more narrow political and economic needs of the so called military industrial complex The book concludes that U S Air Force senior leadership acquired better bombers than did civilian defense leaders The extensive use of original documents in this book reveals that Air Force generals were less concerned about defending their own interests than previous research has implied The Process and Politics of Defense

Acquisition David S. Sorenson, 2008-12-30 The United States government invests billions each year on equipping armed forces with the most advanced military equipment The root of the American defense acquisition system is driven by a combination of national interests and domestic political requirements While fundamentally the defense acquisition system has produced results for the United States military improvements are needed in order to continue to move forward in advancing military tactics and technology Exploring both the systemic and political levels of the system Sorenson argues that the United States will fall behind if the current defense acquisition system is not reformed This book brings together elements of this complicated system such as national security requirements and the changes that are needed in both the structural and political pillars A combination of political interests and the needs of the military serviced by an ever shrinking defense industry make a genuine acquisition reform even more difficult resulting in reform that is more symbolic than genuine

Global Security Watch—Lebanon David S. Sorenson, 2009-11-12 A comprehensive examination of the complex domestic environment and the quarrelsome neighbors that contribute to Lebanon s condition as one of the most violent and unstable countries in the Middle East Global Security Watch Lebanon is the first volume to consider all factors political economic religious and actions by its neighbors that have contributed to Lebanon s violent past and that shape its current security status In Global Security Watch Lebanon author David Sorenson explores Lebanon s arcane almost dysfunctional political structure and economic system as well as the complex religious makeup of a country that is home to Christians Jews and Arabs with no majority faith Sorenson also looks at how the nation has often served as a focal point of diplomatic and military conflict for other nations including Syria Iran and Israel as well as how ill informed American policies toward Lebanon have ultimately harmed American strategic interests in the Middle East Toward a Theory of Spacepower

Charles D. Lutes, 2011-03-07 This volume is a product of the efforts of the Institute for National Strategic Studies Spacepower Theory Project Team which was tasked by the Department of Defense to create a theoretical framework for examining spacepower and its relationship to the achievement of national objectives The team was charged with considering the space domain in a broad and holistic way incorporating a wide range of perspectives from U S and international space actors engaged in scientific commercial intelligence and military enterprises This collection of papers commissioned by the

team serves as a starting point for continued discourse on ways to extend modify refine and integrate a broad range of viewpoints about human initiated space activity its relationship to our globalized society and its economic political and security interactions It will equip practitioners scholars students and citizens with the historical background and conceptual framework to navigate through and assess the challenges and opportunities of an increasingly complex space environment

The George W. Bush Defense Program Stephen J. Cimbala,2010-05 An in depth assessment of Bush's military policy and defense strategy Reconsidering a Century of Flight Roger D. Launius,Janet R. Daly Bednarek,2015-12-01 On December 17 1903 Orville and Wilbur Wright soared into history during a twelve second flight on a secluded North Carolina beach Commemorating the 100th anniversary of the first flight these essays chart the central role that aviation played in twentieth century history and capture the spirit of innovation and adventure that has characterized the history of flight The contributors all leading aerospace historians consider four broad themes relating to the development of flight technology innovation and the technology of flight civil aeronautics and government policy aerial warfare and aviation in the American imagination Through their attention to the political economic military and cultural history of flight the authors establish that the Wrights invention and all that followed in both air and space was one of the most significant technologies of the twentieth century fundamentally reshaping our world Supported by the First Flight Centennial Commission The contributors are Janet R Daly Bednarek Tami Davis Biddle Roger E Bilstein Hans Joachim Braun David T Courtwright Anne Collins Goodyear Roger D Launius William M Leary David D Lee W David Lewis John H Morrow Dominick A Pisano and A Timothy Warnock

Space Policy in the Twenty-First Century W. Henry Lambright,2003 Though more than forty years old the space age has just begun and questions about its future abound What will replace the Space Shuttle Will the International Space Station justify its 100 billion potential cost Are asteroids real threats to Earth or just the subject of science fiction movies Will humans land on Mars Will the search for extraterrestrial life be rewarded In Space Policy in the Twenty First Century W Henry Lambright brings together ten top ranking observers of United States space exploration to address these and other issues relating to the future of the space program While the U S no longer competes with the Soviets for technological firsts they argue ideology and national image remain at the core of space policy with other factors playing subordinate roles Reminding readers of the historical highlights the authors pose searching questions about the priorities and applications of space science manned vs unmanned flights and commercial access to the space enterprise Contributors include Christopher F Chyba SETI Institute and Stanford University Ronald J Deibert University of Toronto Daniel H Deudney the Johns Hopkins University W Henry Lambright Syracuse University Roger D Launius NASA Karl A Leib Syracuse University John M Logsdon George Washington University Howard E McCurdy American University Scott N Pace White House Office of Science and Technology Policy and Debora L VanNijnatten Wilfrid Laurier University **Air University Library Index to Military Periodicals** ,1996 The Viability of U.s. Antisatellite (asat) Policy: moving Toward Space control Joan

Johnson-Freese, 2000 This is the 30th volume in the Occasional Paper series of the U S Air Force Institute for National Security Studies INSS It is particularly timely that with the increased emphasis on space within the U S Air Force in light of the ongoing HQ USAF efforts toward air and space integration into a true aerospace force and in the wake of the 1998 INSS conference Spacepower for a New Millennium this work represents the initiation of the Space Policy Series of INSS Occasional Papers In this paper Dr Joan Johnson Freese presents an examination of past U S policy and international treaty interpretations on anti satellite weapons ASAT in space within the context of the organizational politics surrounding questions of developing and deploying these systems With the ever increasing American commercial and military reliance on space these questions are particularly timely and it is our hope that the debate on ASATs indeed on the larger issues of weaponization of space can be better informed by this paper

Arms Diffusion THomas W. Zarzecki, 2018-12-20 Weapons proliferation is one of the most pressing global concerns following the end of the Cold War Despite the absence of an overarching superpower conflict armaments and related technologies have continued to spread throughout the international system This has been particularly true in areas like East Asia and the Middle East where the traditional two party arms races are not readily apparent This text addresses these concerns and shortcomings using data on fourteen specific military technological innovations that diffused throughout the international system from 1960 to 1997

To Reach the High Frontier Roger D. Launius, Dennis R. Jenkins, 2014-07-11 Access no single word better describes the primary concern of the exploration and development of space Every participant in space activities civil military scientific or commercial needs affordable reliable frequent and flexible access to space To Reach the High Frontier details the histories of the various space access vehicles developed in the United States since the birth of the space age in 1957 Each case study has been written by a specialist knowledgeable about the vehicle described and places each system in the larger context of the history of spaceflight The technical challenge of reaching space with chemical rockets the high costs associated with space launch the long lead times necessary for scheduling flights and the poor reliability of the rockets themselves show launch vehicles to be the space program s most difficult challenge

History of Acquisition in the Department of Defense, Volume 1 Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint

between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs

Rearming for the Cold War, 1945-1960 Elliott Vanveltner Converse, 2012 Book Description The first publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense author Elliott Converse presents a meticulously researched overview of changes in acquisition policies organizations and processes within the United States military establishment during the decade and a half following World War II Many of the changes that shaped the nature and course of weapons research and development production and contracting through the end of the century were instituted between 1945 and 1960 many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years This study is the first to combine the histories of the Office of the Secretary of Defense OSD and the military services into one account The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods

Atomic Audit Stephen I. Schwartz, 2011-12-01 Since 1945 the United States has manufactured and deployed more than 70 000 nuclear weapons to deter and if necessary fight a nuclear war Some observers believe the absence of a third world war confirms that these weapons were a prudent and cost effective response to the uncertainty and fear surrounding the Soviet Union s military and political ambitions during the cold war As early as 1950 nuclear weapons were considered relatively inexpensive providing a bigger bang for a buck and were thoroughly integrated into U S forces on that basis Yet this assumption was never validated Indeed for more than fifty years scant attention has been paid to the enormous costs of this effort more than 5 trillion thus far and its short and long term consequences for the nation Based on four years of extensive research Atomic Audit is the first book to document the comprehensive costs of U S nuclear weapons assembling for the first time anywhere the actual and estimated expenditures for the program since its creation in 1940 The authors provide a unique perspective on U S nuclear policy and nuclear weapons tracking their development from the Manhattan Project of World War II to the present day and assessing each aspect of the program including research development testing and production deployment command control communications

and intelligence and defensive measures They also examine the costs of dismantling nuclear weapons the management and disposal of large quantities of toxic and radioactive wastes left over from their production compensation for persons harmed by nuclear weapons activities nuclear secrecy and the economic implications of nuclear deterrence Utilizing archival and newly declassified government documents and data this richly documented book demonstrates how a variety of factors the open ended nature of nuclear deterrence faulty assumptions about the cost effectiveness of nuclear weapons regular misrepresentation of and overreaction to the Soviet threat the desire to maintain nuclear superiority bureaucratic and often arbitrary decisions pork barrel politics and excessive secrecy all drove the acquisition of an arsenal far larger than what many contemporary civilian and military leaders deemed necessary Atomic Audit concludes with recommendations for strengthening atomic accountability and fostering greater public understanding of nuclear weapons programs and policies
