Pollution Green Issues:

Major Environmental Issues Facing the 21st Century Mary K. Theodore, Louis Theodore, 1996 This work intended for informed non technical readers provides an objective overview of important environmental issues The book starts with the traditional topics of air land and water pollution but also presents newer issues including solid waste management the greenhouse effect electromagnetic fields and questions of environmental equity The authors also focus on how to prevent the pollution in the first place rather than on simply cleaning it up afterwards

Global Environmental Issues Frances Harris, 2005-01-28 Meeting the needs of upper level students this book treats global environmental problems as complex issues with a network of human and biophysical causes Each chapter interlinks human demands on the Earth's resources to natural biophysical change not simply a cause and effect treatment of global issues and environmental change Includes coverage of contemporary hot topics such as biodiversity urbanisation and sustainable development Global case studies two per chapter contextualise theory for students This book should have considerable appeal among undergraduate and postgraduate students in a broad range of disciplines Frances Harris has assembled a team of well qualified authors who between them consider such important environmental issues as climate and sea level change biodiversity GM crops energy supply urbanization pollution and sustainable development The style is clear and non technical the coverage is global and the text is supported by numerous figures and illustrations Boxed case studies provide useful exemplification of general issues I have no doubt that this book will be very popular with my own students in providing detailed analysis of a range of key environmental issues which are frequently reported in the media Tony Binns University of Sussex UK This book usefully realises that environmental issues are a complex blend of contested science broader socio political contexts and the concerns values attitudes and livelihoods of individuals Written by internationally recognised authors it covers major global issues such as pollution energy climate change sea level rise food production urbanisation and sustainability in an informative way with abundant case studies and illustrations which clearly exemplify just how complex the facets of the issues can be It does not offer easy solutions but it is a good exercise in awareness for the reader Stephen Trudgill Robinson College University of Cambridge UK

Shades of Green Alan Frizzell, 1997-05-15 Is there a real community of interest on the state of the environment that transcends national boundaries An answer to this vital question will ultimately determine the success or failure of initiatives where international co operation and co ordination are essential such as atmospheric or water pollution controls Shades of Green volume two of the ISSP International Social Survey Programme series analyzes data from identical surveys conducted in 22 countries and tackles a wide range of attitudes and priorities Expectations of government in terms of environmental protection a comparison of Canada U S results the level of knowledge on environmental issues from country to country the perceived role for science in solving ecological problems and attitudinal differences between the West and states of the former Soviet Union these issues have serious implications for the environmental movement and government policies

Environmental Pollution and the Media Glenn D. Hook, Libby Lester, Meng Ji, Kingsley Edney, Chris G. Pope, Luli van der Does-Ishikawa, 2017-04-07 This book offers a theoretically informed empirical investigation of national media reporting and political discourse on environmental issues in Australia China and Japan It illuminates the risks harms and responsibilities associated with climate change through an analysis of pollution adopting an interdisciplinary approach drawing on both the social sciences and humanities A particular strength of the work is the detailed analysis of the data using a range of both quantitative and qualitative techniques enabling the authors to reveal in rich and compelling detail the complex relationship between risk and responsibility in the climate change discourse The case studies of Australia China and Japan are set in the current literature as well as in the historical context of climate change in these three countries The analysis of the media discourse on the Great Barrier Reef in Australia demonstrates how the mining of coal for overseas markets has led to devastating harm to the life of the reef A critical discussion of the Chinese documentary Under the Dome shows how this medium has played a crucial role in building awareness of the harm from atmospheric pollution among the citizens shaping

attitudes and promoting action The first case study of Japan elucidates how cross border atmospheric pollution from China forges a chain of responsibility for responding to climate change running from the state to society The other case study of Japan demonstrates how smart cities have emerged as a way to mitigate the risks and harms of climate change The Conclusion draws together the similarities and differences in how climate change is addressed in the three countries In all Environmental Pollution and the Media Political Discourses of Risk and Responsibility in Australia China and Japan uncovers the dynamics of the triadic relationship among risk harm and climate change in Australia China and Japan By so doing the book makes an original and timely contribution to understanding comparative media discourse and political debates on climate change

Environmental Issues in Latin America and the Caribbean Aldemaro Romero, Sarah E. West, 2006-02-23 We began this book with a simple goal to assemble a collection of readings for an undergraduate interdisciplinary course taught by one of us AR at Macalester College This course explored environmental problems and solutions in Latin America and the Caribbean using both natural science and social science methods After a literature search failed to produce an anthology of interdisciplinary readings appropriate for the course we set out to compile one We sought papers that dealt with the most salient environmental problems in the region that were written by experts and that were appropriate for undergraduate students Most importantly we sought papers that clearly demonstrate the contributions that experts from one discipline can make to analysis in another discipline We sought papers that for example show how biological species assessments can be used to inform the politics of biodiversity conservation We sought papers that show how economic analysis can be used to predict the likely effects of human behavior on ecosystems We sought papers that pay close attention to how institutions both national and international affect the outcome of environmental initiatives To find essays that fit our needs we sent out a world wide call for papers chose the most promising submissions and subjected these submissions to peer review The twelve approved essays represent the work of researchers from Latin America and the Caribbean the United States Canada Europe and Australia All the authors have direct experience with Latin America and the Caribbean and the region's problems

Handbook of Japan's Environmental Law, Policy and Politics Hiroshi Ohta, 2025-10-01 This handbook offers an exposition of the contemporary status of Japan's environmental law policy and politics The compass of ecological quandaries explored within this tome is expansive encompassing issues pertinent to both natural and synthetic ecosystems natural resources and inorganic materials Each chapter's temporal framework corresponds to the postwar period following the enactment of environmental statutes and the initiation of administrative institutionalization situated approximately in the early 1970s The central inquiry addressed in this compendium pertains to the extent to which prevailing environmental statutes and policies have contributed to the enhancement or conservation of Japan's natural and synthetic ecosystems as well as the resilience of its natural resources The authors within this volume undertake an analysis to discern the causal factors behind the quandaries by ascribing them to the existence or absence of enforceable regulations public involvement in policy formulation processes bureaucratic fragmentation pioneering regulatory measures institutional obstacles regulatory co-optation rational cost effective methodologies scientific understanding scientific communities ecological commerce environmental non governmental organizations NGOs and holistic ecological plans and programs Moreover pertinent sections raise an inquiry concerning Japan's ecological diplomacy inquiring whether Japan serves as a leader bystander or obstructionist **The**

Politics of Environmental Policy in Russia David Lewis Feldman, Ivan Blokov, 2012-01-01 A fresh and up to date discussion of Russia's manifold environmental crises using the results of an elite survey and a framework based on the civil society literature I believe this is the best treatment of its subject that is presently available and given Russia's enormous territorial extent it is a study that has important implications for everyone who has any concern for the future of Planet Earth Stephen White University of Glasgow UK In recent years international inter governmental entities have acknowledged the importance of civil society for engaging stakeholders in environmental change especially at the local community level and in promoting democracy In Russia efforts by NGOs to promote reform since the fall of the Soviet Union have been aimed at achieving both objectives This fascinating and highly illuminating book explores the political legal and attitudinal barriers to environmental reform in Russia since 1991 The authors renowned experts in the field explore efforts to develop a mature civil society in Russia and analyse the policy views of environmental groups the media and the scientific community Three important case studies underpin the study suspended plans to build an oil pipeline near Lake Baikal management of Cold War generated radioactive waste at Chelyabinsk and public reaction to the introduction of genetically modified foods The

conclusion is that although civil society groups face obstacles in the form of apathy state imposed constraints on their activities and agency reluctance to confer on decisions there are some successes in reversing decisions due in part to NGO pressures yielding reform This path breaking book will be of enormous interest to scholars researchers and students focusing on comparative environmental policy and politics contemporary public policy in Russia and international politics
