Sculpting Space Barry A Berkus:

Sculpting Space Barry A. Berkus, 2002 Berkus's custom residences bring to life the personalities and programmes of their clients. Rather than reiterating a signature style, Berkus approaches the design of a home as a collaborative process. Together the client and architect explore the needs. **Steven Ehrlich Architects** Michael Webb, 2002 Founded in 1970 Steven Ehrlich Architects is a twenty person architectural team whose office is a converted dance hall in Culver City, California. This award winning firm is internationally recognised for its distinctive residential designs that extend Los Angeles' tradition of architectural innovation fusing technology with cultural and environmental sensitivity. This fine volume details Ehrlich's most famous projects and includes floorplans, delightful photographs and textual accompaniment by renowned architecture and design writer Michael Webb. **SELLING POINTS** Features the best work from this renowned architect culled from a career spanning decades. Showcases state of the art architectural photography by the finest in the field. Blends some of the architect's original sketches with detailed floor plans and fantastic digital images. 122 col 91 b w **Pure Form** Ivan Rijavec, 2000 Ivan Rijavec is an Australian architect based in Melbourne who continues to produce work that astounds both his peers and the wider community. Though commentators find it difficult to categorise and explain his work, images are the most reliable source with which to describe it. Only a few of the terms that have been used to describe the work of this remarkable architect. Rijavec likens the design process to a movie. I see my work as a strip of film that keeps changing in the viewer's mind. The appearance changes according to one's vantage point, giving inner life to the structure. If only all movies were this good. **Interior Spaces of the USA and Canada** Images, 2002 The international design community looks to Interior Spaces of the USA and Canada with great anticipation. In many ways it is akin to an address about the state of the union. It is very much a statement about where interior design is going in the United States.

Architecture/Art/Parallels/Connections Barry A. Berkus, 2000 Looks at the parallels between works of art that are often separated by long periods of time or spatial context. **The British National Bibliography** Arthur James Wells, 2003

This book takes readers all the way to outer space as they learn how to sculpt characters from astronauts to aliens and space vehicles from space ships to rovers. The book begins with an introduction to Claymation and the tools and techniques necessary to completing the project. Readers will learn both armature and subtractive sculpting techniques which are applicable to many different sculpting projects. Readers will also build their own set and make props to bring their movie

together The last step is learning about lighting and cameras so readers can make their Claymation space adventure a reality
