A Sculptor's Manual focuses on the methods involved in sculpture. The manual first outlines drawing as a medium by which artistic creativity can evolve. The text notes that mastery of this talent can enable artists to become more analytical in their appreciation of their fellow beings as well as bring out the inventive faculties in them in many ways. The book also discusses direct carving and the use of cartoons and automatic tools in carving. The work done by the author at the Henry Florence Memorial Hall is noted. The varieties of stones that can be used as medium in carving are explained. The text also looks at the methods in moving heavy weights, traditional carving of relief, and wood carving. Modeling as a way to create fine pieces of sculpture is underscored. The book also discusses the methods involved in building a large bronze memorial and an enormous aluminum stag. Alternative methods of casting a large memorial are also elaborated. The text also puts emphasis on fiberglass sculpture, including materials and methods to be employed. The manual is a good reference for beginner and master sculptors. **The Conservation of Medieval Polychrome Wood Sculpture** Michele D. Marincola, Lucretia Kargère, 2020-08-18

The first English language book to comprehensively discuss the history and methodology of conserving medieval polychrome wood sculpture. Medieval polychrome wood sculptures are highly complex objects, bearers of histories that begin with their original carving and adornment and continue through long centuries of repainting, deterioration, restoration, and conservation. Abundantly illustrated, this book is the first in English to offer a comprehensive overview of the conservation of medieval painted wood sculpture for conservators, curators, and others charged with their care. Beginning with an illuminating discussion of the history, techniques, and meanings of these works, it continues with their examination and documentation, including chapters on the identification of both the wooden support and the polychromy itself, the paint layers, metal leaf, and other materials used for these sculptures. The volume also covers the many aspects of treatment: the process of determining the best approach, consolidation, and adhesion of paint ground and support, overpaint removal, and surface cleaning and compensation. Four case studies on artworks in the collection of The Cloisters in New York, a comprehensive bibliography, and a checklist to aid in documentation complement the text. **Ellsworth Kelly** Ellsworth Kelly, Brenda Richardson, 2011

Ellsworth Kelly describes the thirty wood sculptures he created over the span of four decades between 1958 and 1996 as his totems. Far less known than his other works, these sculptures have a talismanic intimacy for Kelly that distinguishes them from the rest of his oeuvre. *Ellsworth Kelly Wood Sculptures* represents a retrospective of these wood sculptures for the first time, investigating the development of this intensely personal expression of Kelly's commitment to abstract art and to nature. Many

of these wood sculptures now in private collections are rarely seen and hardly known by the public Accompanying a major exhibition at the Museum of Fine Arts Boston in 2011 this book speaks to the artist s lifetime of acute observation and how deeply of nature his work has always been Publisher s description **Wood and Traditional Woodworking in Japan**
