Creating Welded Sculpture Nathan Cabot Hale, 2012-07-12 In this generously illustrated guide newly revised and updated a well known American sculptor shares his forty years of experience working with welded sculpture techniques Nathan Cabot Hale begins with the basic assumption that it is necessary for a sculptor welder to have the same professional skills as a good job welder To help readers gain those skills he demonstrates both traditional and comparatively new welding methods step by step including the oxyacetylene technique in modeling small scale figurative sculpture Mr Hale first discusses the basic tools and techniques of welded sculpture then addresses the construction of abstract and organic shapes and modeling solid figures This is followed by detailed coverage of finishing techniques arc welding and welding large scale commissioned works He even dispenses helpful practical advice on the economics of fine art exhibiting work staying alive searching out public and private support and more Over 80 helpful diagrams and more than 100 photographs accompany the text demonstrating techniques and procedures and depicting works in progress as well as finished works In a new chapter written specially for this edition Mr Hale shares the heartening artistic philosophy he has developed over his long and distinguished career Sculptors at many levels of accomplishment will find his book instructive and inspiring      *Hellenistic Sculpture* Brunilde Sismondo Ridgway, 1990 This is the final volume in Brunilde Sismondo Ridgway's series of books covering the entire range of Greek sculpture from its inception to its virtual end as it merged into the production of the Roman Imperial world Volume III discusses sculptural works both architectural and free standing from approximately 100 B C to the Battle of Actium 31 B C which removed from power the last Hellenistic ruler Although some monuments may belong to the years just before or just after this timespan Ridgway's aim is to concentrate on works plausibly dated to the first century B C even those with highly controversial chronologies Famous sculptures the Laokoon the epic groups from the Sperlonga cave

the Belvedere Torso the bronze Boxer in the Terme Museum and many others are discussed together with less well known pieces Ridgway gives special emphasis to the finds from two shipwrecks the Mahdia and the Antikythera wrecks that provide a reasonable terminus ante quem and argues that many of the stylistic trends and decorative objects usually considered typically Roman instead have their roots in the Greek world This last Hellenistic phase is perhaps the most interesting of the three because it documents to a great extent the transformation of the products of one culture into those of another with different interests and priorities Far from being an unimaginative inferior output driven by commercial considerations the statuary of the first century B C is vibrant and inventive drawing from many sources in a stylistic eclecticism

Nazi Propaganda Through Art and Architecture Norman Ridley, 2024-07-30 When the Nazis came to power in January 1933 they began a program of transforming Germany from a democracy into a totalitarian state but it was not a matter of simply enforcing compliance The people had to be coaxed into believing in the new regime Hearts and minds had to be won over and one of the ways the Nazis did that was to create an ideal of German nationhood in which everyone could feel proud This was especially the case with art which came to be used as a powerful tool of propaganda both to disseminate the myth amongst the population and indicate to the Nazi administrators the sort of cultural environment they should create It was not an easy thing to do While the nation was being re-created as a dynamic modern and powerful industrial giant all the signals coming from Hitler indicated that his own idyllic view of the German nation was of a traditional rural people deep rooted in a romantic mystical aesthetic Hitler's own experience as an artist in Vienna before the First World War had shown that while technically proficient his work was detached and impersonal Despite being rejected by the Vienna Academy of Fine Arts he continued to see himself as artistically gifted especially in the field of architecture This book looks at how the artistic side of Hitler's personality dominated Nazi aesthetics and the ways in which the Third Reich manipulated public opinion and advanced its political agenda using the power of art Despite his early setbacks Hitler always thought of himself first and foremost an artist He would frequently break off discussions with diplomats and soldiers to veer off on a lecture about his ideas on art and architecture which had been formed during his time in Vienna Nazi Propaganda Through Art and Architecture explores how Hitler's artistic and architectural vision for Germany led to the monumental structures which we now associate with the Third Reich alongside the rural idyl he sought to espouse and how they came to symbolise the re-emergent power of a German nation which would dominate Europe
