manifestation of tacheism generates its own specific cultural effects this book represents the first time a scholar has looked at tacheism as a hidden continuum within modern art With a methodological framework drawn from the semiotics of text and image the author introduces a much needed fine tuning to the classic terms index symbol and icon The concept of the tache as a crossing of sign types enables finer distinctions and observations than have been available thus far within the Peircean tradition The sign crossing theory opens onto the whole terrain of interaction between visual art art criticism literature philosophy and psychology

continuing return to pragmatism Novak notes for instance how Copley's art mirrors the puritan denial of self found in Jonathan Edwards and how as colonial scientists they share an interest in sensation and observation She sees Winslow Homer and William James as practitioners of a pragmatic self grounded in an immediate experience that looks for concrete results Through such fruitful comparisons whether between Copley and Edwards or Lane and Emerson or Ryder and Dickinson Novak sheds unmatched light on our nation's artistic heritage Wonderfully illustrated with dozens of black and white pictures and sixteen full color plates here is a stunning work that yields a wealth of insight into American art and culture and concludes Novak's landmark trilogy
