Sea Power In The Mediterranean:

Sea Power in the Mediterranean Edward Luttwak, 1979 **Sea Power in the Mediterranean** Stanley Walter Croucher Pack, 1971 **Sea Power in the Mediterranean** S. W. C. Pack, 1971 Naval Blockades and Seapower Bruce A. Elleman, S. C. M. Paine, 2006 This book is one of the first scholarly works to address the problem of naval blockades from a multi national perspective *Sea Power in the Mediterranean, a Study for Sea Power in the Mediterranean from the Seventeenth Century to the Present Day* S. W. C. Pack, 1970 *Sea power in the Mediterranean; a study of the struggle for the sea power in the Mediterranean from the 17th century to the present day* S. W. C. Pack, 1971 **Muslim Sea-power in the Eastern Mediterranean from the Seventh to the Tenth Century A.D.** Aly Mohamed Fahmy, 1966 **Russian Seapower and 'the Eastern Question' 1827-41** John C.K. Daly, 1991-06-18 Focusing on the Black Sea fleet between 1827 1841 this book assesses Russia's naval strength against other Mediterranean powers especially the Ottoman Empire arguing their limitations came from geographic political and economic considerations Primary and secondary sources are utilized

Seapower Geoffrey Till, 1994 This volume explains the evolution of maritime strategy through the twentieth century and concludes with some speculations about its future in the next century The forms and practices of navies and maritime strategy are analysed through the development of eight historical and contemporary topics drawn from the First and Second World Wars the Cold War and post Cold War period Seapower States Andrew Lambert, 2018-11-27 A fascinating geopolitical chronicle A superb survey of the perennial opportunities and risks in what Herman Melville called the watery part of the world The Wall Street Journal In this volume one of the most eminent historians of our age investigates the extraordinary success of five small maritime states Andrew Lambert author of The Challenge Britain Against America in the Naval War of 1812 winner of the prestigious Anderson Medal turns his attention to Athens Carthage Venice the Dutch Republic and Britain examining how their identities as seapowers informed their actions and enabled them to achieve success disproportionate to their size Lambert demonstrates how creating maritime identities made these states more dynamic open and inclusive than their lumbering continental rivals Only when they forgot this aspect of their identity did these nations begin to decline Recognizing that the United States and China are modern naval powers rather than seapowers is essential to understanding current affairs as well as the long term trends in world history This volume is a highly original big think analysis of five states whose success and eventual failure is a subject of enduring interest by a scholar at the top of his game An intriguing series of stories of communities thinking seriously about how to stand their own ground when outpowered how to do so in ways that are consistent with their values and sometimes how to negotiate the descent from being a great power when the cards just aren't in their favor any more These are timely questions Times Higher Education Supplement Lambert is without a doubt the most insightful naval historian writing today The Times **Seapower and Naval Warfare, 1650-1830** Dr Richard Harding, Richard Harding, 2002-01-04 From the author of Amphibious Warfare in the

Eighteenth Century and The Evolution of the Sailing Navy 1509 1815 this book serves as a single volume survey of war at sea and the expansion of naval power in the 18th century The book is intended for undergraduate courses on 18th century European history and for amateur and professional military historians and for navy colleges and navy and ex navy professionals

Architects of Continental Seapower Jeremy Stocker, 2020-10-01 This book describes and analyses two iconic figures in twentieth century naval history the German Admiral Alfred von Tirpitz and the Russian Admiral Sergei Gorshkov It examines the men what they thought and wrote about seapower the fleets they created and the strategic consequences of what they did More broadly it draws on the respective histories of the post 1897 Imperial German Navy and the post 1956 Soviet Navy to examine the continental bid for large scale seapower The work argues that both individuals built navies that did not and could not fulfil the objectives for which they were created Drawing on the legacies of both men the book also develops some wider ideas about the creation of large navies by continental states with cautionary lessons for today's emerging powers India and China Both admirals have received book length biographies but this is the first attempt at a comparative study and the first to draw broader strategic lessons from their respective attempts as continental navalists to challenge maritime states This book will be of much interest to students of naval history strategic studies and International Relations

China Goes to Sea Andrew S. Erickson, Lyle J Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks But China's turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets its vast and expanding merchant marine the wide offshore reach of its energy and minerals exploration companies its growing fishing fleet and indeed its increasingly

modern navy Yet for all these achievements there is still profound skepticism regarding China's potential as a genuine maritime power Beijing must still import the most vital subcomponents for its shipyards maritime governance remains severely bureaucratically challenged and the navy evinces at least as of yet little enthusiasm for significant blue water power projection capabilities This volume provides a truly comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context China is hardly the only land power in history to attempt transformation by fostering sea power Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure Too many works on China view the nation in isolation Of course China's history and culture are to some extent exceptional but building intellectual fences actually hinders the effort to understand China's current development trajectory Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders this comparative study provides reason to believe that China has turned the corner on a genuine maritime transformation If that proves indeed to be the case it would be a remarkable if not singular event in the history of the last two millennia

Ottoman Seapower and Levantine Diplomacy in the Age of Discovery Palmira Johnson Brummett, 1994-01-01 This work reframes sixteenth century history incorporating the Ottoman empire more thoroughly into European Asian and world history It analyzes the Ottoman Empire's expansion eastward in the contexts of claims to universal sovereignty Levantine power politics and the struggle for control of the oriental trade Challenging the notion that the sixteenth century Ottoman Empire was merely a reactive economic entity driven by the impulse to territorial conquest Brummett portrays it as inheritor of Euro Asian trading networks and participant in the contest for commercial hegemony from Genoa and Venice to the Indian Ocean Brummett shows that the development of seapower was crucial to this endeavor enabling the Ottomans to subordinate both Venice and the Mamluk kingdom to dependency relationships and providing the Ottoman ruling class access to commercial investment and wealth

Eurasianism Paolo Pizzolo, 2020-01-28 Eurasianism An Ideology for the Multipolar World investigates the ideology of Eurasianism a political doctrine that founds its principles on geopolitics and conservatism Specifically the book examines neo Eurasianist thought and its implications for the international system After collocating Eurasianism in the spectrum of conservative theories the research analyzes its historical evolution from the early 20th century to its contemporary manifestations Pizzolo describes the liaison between Eurasianism and geopolitics describing the nature of geopolitics and the main theories that highlight the relevance of the Eurasian landmass including Mackinder's Heartland theory Spykman's Rimland theory and Haushofer's Kontinentalblock project The book also focuses on

the central elements of the neo Eurasianist ideology including the key features of the so called Fourth Political Theory arguing that Eurasianism could represent a theoretical contribution for the advent of the multipolar world

Twenty-First Century Seapower Peter Dutton, Robert Ross, Øystein Tunsjø, 2013-05-02 This book offers an assessment of the naval policies of emerging naval powers and the implications for maritime security relations and the global maritime order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general

Seapower in the Nuclear Age Joel J. Sokolsky, 2021-01-26 This book first published in 1991 provides a major analysis of the prelude to the US s Cold War maritime strategy showing how NATO s maritime forces were organised in the period It examines how the United States Navy and allied navies particularly the Royal Navy were incorporated into the Alliance s nuclear and conventional deterrent forces It looks at the structure of the main naval commands the growth of Soviet maritime forces and the impact of the flexible response strategy on NATO s naval posture in the 1970s Drawing upon many declassified documents this account fills an important gap in postwar literature on American seapower and its relation to European security It also addresses important aspects of NATO strategy and organisation
