Search for a Rational Ethic George D. Snell, 2012-12-06 Knowledge we have in great abundance and enough exists if wisely used to solve many of the most threatening problems of humanity The key word is wisely wisdom we sorely lack There is a special role to be played by distinguished scholars who having passed the most challenging tests of their specialized fields are willing to confront the central questions of human existence What is life where is the boundary between life and non life Why do we behave as we do What is the meaning of human existence Where do ethical precepts come from What should be the goals of civilization beyond mere survival and hedonic reward These are the kinds of topics George Snell boldly addresses in Search for a Rational Ethic Scientific knowledge is especially important in any such endeavor because we are in the golden age of science and scientific research increasingly impinges on the domain of philosophy Indeed it is not too much to say that philosophy has consisted to a large extent of failed neurological models Much of its investigation pivots on how the mind works that is to what extent the mind can perceive reality how concepts are formed what is the source of moral reasoning and so forth Increasingly scientific research is leading us to the physical basis of mind If we are ever to create the correct neurological model it will be through science Searching for a Universal Ethic John Berkman, William C.

The Search for a Methodology of Social Science S. Turner, 1986-02-28 Stephen Turner has explored the origins of social science in this pioneering study of two nineteenth century themes the search for laws of human social behavior and the accumulation and analysis of the facts of such behavior through statistical inquiry The disputes were vigorously argued they were over questions of method criteria of explanation interpretations of probability understandings of causation as such and of historical causation in particular and time and again over the ways of using a natural science model From his careful elucidation of John Stuart Mill's proposals for the methodology of the social sciences on to his original analysis of the methodological claims and practices of Emile Durkheim and Max Weber Turner has beautifully traced the conflict between statistical sociology and a science of factual description on the one side and causal laws and a science of nomological explanation on the other We see the works of Comte and Quetelet the critical observations of Herschel Buckle Venn and Whewell and the tough scepticism of Pearson all of these as essential to the works of the classical founders of sociology With Durkheim's essay on Suicide and Weber's monograph on The Protestant Ethic Turner provides both philosophical analysis to demonstrate the continuing puzzles over cause and probability and also a perceptive and wry account of just how the puzzles of our late twentieth century are of a piece with theirs The terms are still familiar reasons vs

Conclusions of the symposium

In Search of Authenticity Jacob Golomb, 2012-11-12 Great philosophers such as Kierkegaard Nietzsche and Sartre have clearly been preoccupied by the possibility of authenticity In this study Jacob Golomb

looks closely at the literature and writings of these philosophers in his analysis of their ethics Golomb's writings shows his passionate commitment to the quest for the authenticity particularly in our climate of post modern scepticism He argues that existentialism is all the more pertinent and relevant today when set against the general disillusionment which characterises the late twentieth century This book is invaluable reading for those who have been fascinated by figures like Camus's

Meursault Sartre's Matthieu and Nietzsche's Zarathustra **Human Evolution, Reproduction, and Morality** Lewis Petrino, 2013-11-11 An extremely well organized conceptually clear empirically informed and carefully argued volume What makes this contribution special is the invigorating infusion of a wealth of principles and knowledge derived from evolutionary biology neurophysiology and cognitive science The chapters provide abundant material for animated discussion Evolution and Human Behavior September 1997 When engaging in laboratory and field studies researchers have an extensive set of implicit assumptions that justifies their research However these assumptions are rarely made explicit either to the researchers themselves to their colleagues or to the public In this fascinating volume the author gives insight into these underlying beliefs that scientists have regarding moral and biological issues involved in human life such as decisions that influence reproductive practices the termination of life and the pursuit of biomedical research He then uses this descriptive base to develop an ethic based on rational liberalism His arguments stem from the thinking of biologists moral philosophers cognitive scientists and social and developmental psychologists **The Handbook of Communication**

Ethics George Cheney, Steve May, Debashish Munshi, 2011-01-18 The Handbook of Communication Ethics serves as a comprehensive guide to the study of communication and ethics It brings together analyses and applications based on recognized ethical theories as well as those outside the traditional domain of ethics but which engage important questions of power equality and justice The work herein encourages readers to make important connections between matters of social justice and ethical theory This volume makes an unparalleled contribution to the literature of communication studies through consolidating knowledge about the multiple relationships between communication and ethics by systematically treating areas of application and by introducing explicit and implicit examinations of communication ethics to one another The Handbook takes an international approach analyzing diverse cultural contexts and comparative assessments The chapters in this volume cover a wide range of theoretical perspectives on communication and ethics including feminist postmodern and postcolonial engage with communication contexts such as interpersonal and small group communication journalism new media visual communication public relations and marketing and explore contemporary issues such as democracy religion secularism the environment trade law and economics The chapters also consider the dialectical tensions between theory and practice academic and popular discourses universalism and particularism the global and the local and rationality and emotion An invaluable resource for scholars in communication and related disciplines the Handbook also serves as a main point of reference in graduate and upper division undergraduate courses in communication and ethics It stands as an exceptionally

comprehensive resource for the study of communication and ethics **The Human Relationship to Nature** Matthew R. Foster, 2016-11-02 Growing alarm over the harm done by humans to the natural world and even to the viability of our own industrial civilization compels us to ask the deeper moral question What should be the human relationship to nature Matthew R Foster starts by assessing three contrasting patterns of moral reasoning the Progress Ethic that created the world we live in the biblically inspired Stewardship Ethic and the Connection Ethic based on scientific understanding of the interdependence of all natural entities Critical analysis reveals that none of these ethics is able to sustain the values it advocates due to two unsupportable presumptions that the norms of human morality are commensurate with the natural world and that the value of an entity is an intrinsic property Foster argues that in order for a future environmental ethic to be both logically coherent and environmentally constructive it must start from unconventional notions First because nature will never be commensurate with human moral reasoning non rational resources must be employed despite the risks involved Second value resides in the relationship of one entity to another and does not belong intrinsically to either in short value is foremost a verb rather than a noun Foster proposes a new paradigm attentive to the realm of value relations among all natural entities one which offers mediating opportunities between nature and morality In this new ethic there are no shoulds Rather moral responsibilities to the natural entities around us are elective placing us in an unfamiliar yet potentially liberating network of relationships This book will be of interest to scholars both instructors and students of environmental ethics philosophy religion and intellectual history and all who are concerned about the environmental challenges of our time

Journalism Ethics Christopher Meyers, 2010-03-17 Since the introduction of radio and television news journalism has gone through multiple transformations but each time it has been sustained by a commitment to basic values and best practices Journalism Ethics is a reminder a defense and an elucidation of core journalistic values with particular emphasis on the interplay of theory conceptual analysis and practice The book begins with a sophisticated model for ethical decision making one that connects classical theories with the central purposes of journalism Top scholars from philosophy journalism and communications offer essays on such topics as objectivity privacy confidentiality conflict of interest the history of journalism online journalism and the definition of a journalist The result is a guide to ethically sound and socially justified journalism in whatever form that practice emerges Journalism Ethics will appeal to students and teachers of journalism ethics as well as journalists and practical ethicists in general Ethical Issues that Matter Enoch Hammond Oglesby, 2002 Faith communities have always struggled with the questions of ethical method and cultural inclusivity Accordingly Ethical Issues that Matter enlarges the methodological discussion among ethicists and theologians by adopting the landscape of a mountain as a useful metaphor for racism **Social Constructionism and Theology** Chris Hermans, Immink, Albert F. de Jong, Lans, 2001-12-01 Scholars of practical theology are increasingly regarding the discipline as one whose scope extends beyond the bounds of an applied theology The concept of action or practice plays a central role in this new understanding At

the base of theological reflections by scholars of practical theology are the practices and these are analyzed empirically The aim of the discipline is to transform these practices and develop a hermeneutical action theory or a hermeneutical empirical approach to human actions As a result of its focus on practices practical theology is closely linked to the social sciences Within the social sciences social constructionism is a growing theory Although its forms vary this theory is one to which not only social scientists but also researchers in the psychology and sociology of religion adhere This volume demonstrates the importance of reflection on the emerging concept of social constructionism in the social sciences by scholars of practical theology

The Soul of Liberty Fred E. Foldvary,1980 **The Integrated Protestant Ethic and the Spirit of Environmentalism** S. Steiner-Aeschliman,1999 The theory and data of environmental science suggest that growth in rates of population consumption and environmental degradation as a result of the activities of industrialized societies has created an ecological crisis to which modern societies must adapt However adaptation is problematic Max Weber studied adaptive social change during the industrial revolution The evolution of this new way of life was initially problematic because individuals who established industrialism were socialized under feudalism In this dissertation I consider The Protestant Ethic and the Spirit of Capitalism as a theoretical treatise framed by modern human ecology in order to study social change in the context of the ecological crisis of industrialism The Protestant Ethic is known for describing how religious ideas influenced the unfolding of modern capitalism in the West However there is nothing inherent in Protestantism that requires linkage to industrialism I argue that Protestantism has evolved and that it need not necessarily promote environmental exploitation although under industrialism it has I identify a green subculture within Protestantism and consider how Protestantism's weakness may also be its strength The very sociological structure that in the absence of ecologically realistic norms permits widespread ecosystem degradation by industrial capitalism may also generate ecologically realistic norms for a natural capitalism Weber contended that rationality was problematic because it paradoxically results in a dual crisis of management and meaning where human agency becomes imprisoned as if in an iron cage The irrational continuation of environmentally degrading social practices eventually contributes to a legitimation crisis People turn to religion as an alternative authority If science and religion converge on environmental values they might catalyze social change unless they are too distorted by ideological bias Adaptive social change only occurs if ethical and ecological values are in accordance with the sustainability of ecosystems Hence to adapt to the ecological crisis sociocultural systems require socialization into ecological realism because ecologically rational societies may still be maladaptively organized around environmentally unsustainable trajectories

In Search of the Good Daniel Callahan,2012-10-12 One of the founding fathers of bioethics describes the development of the field and his thinking on some of the crucial issues of our time Daniel Callahan helped invent the field of bioethics more than forty years ago when he decided to use his training in philosophy to grapple with ethical problems in biology and medicine Disenchanted with academic philosophy because of its analytical bent and distance from the concerns

of real life Callahan found the ethical issues raised by the rapid medical advances of the 1960s which included the birth control pill heart transplants and new capacities to keep very sick people alive to be philosophical questions with immediate real world relevance In this memoir Callahan describes his part in the founding of bioethics and traces his thinking on critical issues including embryonic stem cell research market driven health care and medical rationing He identifies the major challenges facing bioethics today and ruminates on its future Callahan writes about founding the Hastings Center the first bioethics research institution with the author and psychiatrist Willard Gaylin in 1969 and recounts the challenges of running a think tank while keeping up a prolific flow of influential books and articles Editor of the famous liberal Catholic magazine Commonweal in the 1960s Callahan describes his now secular approach to issues of illness and mortality He questions the idea of endless medical progress and interventionist end of life care that seems to blur the boundary between living and dying It is the role of bioethics he argues to be a loyal dissenter in the onward march of medical progress The most important challenge for bioethics now is to help rethink the very goals of medicine **New Scientist** ,1990
