Walzenbach, 2017-03-02 This collection provides a balanced evaluation of multi level governance Written by international experts of policy making in the European Union each contribution builds on common conceptual definitions critically debating their adaptation to policy specific contexts and investigating their usefulness for conducting empirical research This engaging text uses case studies to identify the specific changes that have occurred in power relations across different levels of the EU system With varying emphasis on state and non state actors on country comparisons and international processes the reader is invited to join a fruitful dialogue among the contributors about the symbiotic relationship of multi level analysis with other conceptual innovations such as transnational regulation network formation or market internationalization This book confronts sophisticated theoretical reasoning with the actual realities of policy making and is therefore essential reading for all those interested in the risks and opportunities of a comparative interdisciplinary approach to European governance New Approaches to Naples c.1500-c.1800 Helen Hills, 2016-04-22 Early modern Naples has been characterized as a marginal wild and exotic place on the fringes of the European world and as such an appropriate target of attempts by Catholic missionaries and others to civilize the city Historiographically bypassed in favour of Venice Florence and Rome Naples is frequently seen as emblematic of the cultural and political decline in the Italian peninsula and as epitomizing the problems of southern Italy Yet as this volume makes plain such views blind us to some of its most extraordinary qualities and limit our understanding not only of one of the world s great capital cities but also of the wider social cultural and political dynamics of early modern Europe As the centre of Spanish colonial power within Europe during the vicerealty and with a population second only to Paris in early modern Europe Naples is a city that deserves serious study Further as a Habsburg dominion it offers vital points of comparison with non European sites which were subject to European

colonialism While European colonization outside Europe has received intense scholarly attention its cultural impact and representation within Europe remain under explored Too much has been taken for granted Too few questions have been posed In the sphere of the visual arts investigation reveals that Neapolitan urbanism architecture painting and sculpture were of the highest quality during this period while differing significantly from those of other Italian cities For long ignored or treated as the subaltern sister of Rome this urban treasure house is only now receiving the attention from scholars that it has so long deserved This volume addresses the central paradoxes operating in early modern Italian scholarship It seeks to illuminate both the historiographical pressures that have marginalized Naples and to showcase important new developments in Neapolitan cultural history and art history Those developments showcased here include bot Structuring the State Daniel Ziblatt, 2008-01-21 Germany's and Italy's belated national unifications continue to loom large in contemporary debates Often regarded as Europe's paradigmatic instances of failed modernization the two countries form the basis of many of our most prized theories of social science Structuring the State undertakes one of the first systematic comparisons of the two cases putting the origins of these nation states and the nature of European political development in new light Daniel Ziblatt begins his analysis with a striking puzzle Upon national unification why was Germany formed as a federal nation state and Italy as a unitary nation state He traces the diplomatic maneuverings and high political drama of national unification in nineteenth century Germany and Italy to refute the widely accepted notion that the two states structure stemmed exclusively from Machiavellian farsightedness on the part of militarily powerful political leaders Instead he demonstrates that Germany's and Italy's founding fathers were constrained by two very different pre unification patterns of institutional development In Germany a legacy of well developed sub national institutions provided the key building blocks of federalism In Italy these institutions absence doomed federalism This crucial difference in the organization of local power still shapes debates about federalism in Italy and Germany today By exposing the source of this enduring contrast Structuring the State offers a broader theory of federalism's origins that will interest scholars and students of comparative politics state building international relations and European political history *The Civilization of Modernity: An Anthology of Carlo Cattaneo's Writings* Carlo G. Lacaita, Alberto Martinelli, 2024-12-23 Carlo Cattaneo was one of the most prominent Italian intellectuals of the nineteenth century Known for his prominent role in the Five Days of Milan uprising in 1848 he combined a vivid intelligence with a reform oriented mind and a strong civic passion This volume offers an exhaustive selection of Cattaneo's writings which cover a wide range of issues and advance highly innovative theories such as the achievement of republican federalism in Italy and Europe thought as a principle of political economy and the psychology of associated mind The two introductory essays examine how his ideas developed through the time and argue for their enduring vitality

Comparative Federalism Thomas O. Hueglin, Alan Fenna, 2015-01-01 Comparative Federalism A Systematic Inquiry Second Edition is a uniquely comprehensive analytic and genuinely comparative introduction to the principles and practices

as well as the institutional compromises of federalism Hueglin and Fenna draw from their diverse research on federal systems to focus on four main models America Canada Germany and the European Union but also to range widely over other cases At the heart of the book is careful analysis of the relationship between constitutional design and amendment fiscal relations institutional structures intergovernmental relations and judicial review Such analysis serves the dual role of helping the reader understand federalism and providing a comparative framework from which to assess the record of federal systems The second edition has been extensively revised and updated taking into account new developments in federal systems and incorporating insights from the growing body of literature in the field It includes two new chapters Fiscal Federalism and The Limits of Federalism

Rescaling the European State Michael Keating, 2013-10 The volume will provide a fresh and engaging analytical approach to the processes of rescaling in Europe within the context of democracy efficacy in government and social solidarity

Rules, Paper, Status Anna Tuckett, 2018-06-26 Whether motivated by humanitarianism or concern over porous borders dominant commentary on migration in Europe has consistently focused on clandestine border crossings Much less however is known about the everyday workings of immigration law inside borders Drawing on in depth ethnographic fieldwork in Italy one of Europe's biggest receiving countries Rules Paper Status moves away from polarized depictions to reveal how migration processes actually play out on the ground Anna Tuckett highlights the complex processes of inclusion and exclusion produced through encounters with immigration law The statuses of legal or illegal which media and political accounts use as synonyms for good and bad worthy and unworthy are not created by practices of border crossing but rather through legal and bureaucratic processes within borders devised by governing states Taking migrants interactions with immigration regimes as its starting point this book sheds light on the productive nature of legal and bureaucratic encounters and the unintended consequences they produce Rules Paper Status argues that successfully navigating Italian immigration bureaucracy which is situated in an immigration regime that is both exclusionary and flexible requires and induces culturally specific modes of behavior Exclusionary laws however can transform this social and cultural learning into the very thing that endangers migrants right to live in the country

Institutional Diversity in Self-Governing Societies Dario Castiglione, Filippo Sabetti, 2016-12-27 The work of Elinor and Vincent Ostrom represents a distinctive contribution to the study of political economy public policy and administration collective action and governance theory Efforts to present a comprehensive overview of the Bloomington School that grew around the Workshop in Political Theory and Policy Analysis now renamed the Ostrom Workshop which they founded more than 40 years ago received new impetus with the award of the Nobel Memorial Prize in Economic Science to Elinor Ostrom in 2009 Since then renewed attempts have been made to map the Ostroms contributions to theories of polycentric governance and collective action and to multi methods and comparative institutional analysis of ways of managing social and ecological systems common pool resources public economies and metropolitan reform The open ended and multiform nature of the Ostroms research program

defies a single comprehensive overview yet it is a stimulus towards both creativity and disciplinary cross fertilization in social science research What sets this volume apart is that it brings together theory and practice models and work on the ground design and creativity empirics and norms to outline the significance of the Ostroms research program for the future Each contribution to the volume takes the Ostromian perspective as the point of departure amplifies it and explores the ground for future work by engaging with other approaches and areas of research with which the Bloomington School has some affinities This way of testing and extending the ideas and methods of the Ostroms is particularly appropriate since their research program initiated and nurtured through the Workshop has always been in between different fields and sub fields in the social sciences political science economics public administration law history anthropology cultivating a strong interdisciplinary way of doing research and exploiting the virtuous circle between theory analysis model building and empirical research Engaging in a creative dialogue with ideas and methods of other research programs is a way of sharpening one s analytic tools while renovating one s own vision of social research This volume is a way of thinking through and beyond the Bloomington School

Agnew, 2002-10 How do the places where people live help structure and restructure their sociopolitical identities and interests In this book renowned political geographer John A. Agnew presents a theoretical model that addresses the relation of place to politics and applies it to a series of historicogeographical case studies set in modern Italy For Agnew place is not just a static backdrop against which events occur but a dynamic component of social economic and political processes He shows for instance how the lack of a common landscape ideal or physical image of Italy delayed the development of a sense of nationhood among Italians after unification And Agnew uses the post 1992 victory of the Northern League over the Christian Democrats in many parts of northern Italy to explore how parties are replaced geographically during periods of intense political change Providing a fresh new approach to studying the role of space and place in social change *Place and Politics in Modern Italy* will interest geographers political scientists and social theorists *A Companion to Italian Constitutional History (1804-1938)*, 2023-06-12 This is the first account in English of the making of Italian nationhood from the perspective of constitutional history It is also the first to consider the role that the House of Savoy played in this process Bringing together influential experts in the field the collection covers the evolution of the Italian constitution from Russian diplomacy's little known planning of the Risorgimento to the monarchy's demise after its clashes with fascism Combining systematic coverage with original research the volume includes such varied themes as the king's role in the Italian wars of independence the Italian peninsula's forgotten charters of 1848 and the story of the ephemeral building that housed the first Italian parliament Contributors are Carolina Armenteros Andrea Ungari Paolo Colombo Frans Willem Lantink Christian Satto Giulio Stolfi Valentina Villa Tommaso Zerbi and Romano Ferrari Zumbini **Major Nation-States in the European Union** J. Richard Piper, 2015-09-25 Integrating the study of individual European nation states within the framework of the European Union this unique new text is essentially two books in one a book on the EU and a comparative introduction to European politics This text provides more value to students by

Shivakumar, 2005-10-13 Examining the foundations of development Shivakumar describes how societies can reconstitute themselves to improve their developmental well being He argues that the unitary state focus in theory and practice limits the creative potential of individuals to improve their mutual well being through crafting capabilities for self governance This is a significant contribution to current discussions on institutional foundations of development providing practical guidance on what it means to constitute a government that facilitates rather than impedes progress
