

Searching for the Ox

In the pasture of the world,
I endlessly push aside the tall
grasses in search of the bull.
Following unnamed rivers,
lost upon the interpenetrating
paths of distant mountains,
My strength failing and my vitality
exhausted, I cannot find the bull.
I only hear the locusts chirping
through the forest at night.

Similarity Search Pavel Zezula,Giuseppe Amato,Vlastislav Dohnal,Michal Batko,2006-06-07 The area of similarity searching is a very hot topic for both research and commercial applications Current data processing applications use data with considerably less structure and much less precise queries than traditional database systems Examples are multimedia data like images or videos that offer query by example search product catalogs that provide users with preference based search scientific data records from observations or experimental analyses such as biochemical and medical data or XML documents that come from heterogeneous data sources on the Web or in intranets and thus does not exhibit a global schema Such data can neither be ordered in a canonical manner nor meaningfully searched by precise database queries that would return exact matches This novel situation is what has given rise to similarity searching also referred to as content based or similarity retrieval The most general approach to similarity search still allowing construction of index structures is modeled in metric space In this book Prof Zezula and his co authors provide the first monograph on this topic describing its theoretical background as well as the practical search tools of this innovative technology **Once-Born, Twice-Born Zen** Conrad Hyers,2004-01-26 Once Born Twice Born Zen is a fresh treatment of the two major Zen schools of Japan Its biographical and comparative approach is both original and very readable The use of William James typology along with other phenomenological categories provides the reader with helpful handles for distinguishing the schools as well as similar tendencies in other religious traditions The book should make an excellent text for introductory and middle level courses in which one is trying to get students to develop categories for understanding religious experience and behavior Readers will see something of themselves in the range of biographical examples given and will detect their own tendencies through the use of this method Bardwell Smith **Tetsugaku Companion to Ueda Shizuteru** Ralf Müller,Raquel Bouso,Adam Loughnane,2022-11-11 This book presents the first collection of essays on the philosophy of Ueda Shizuteru in a Western language Ueda the last living member of the Kyoto school has fostered the East West dialogue in all his works and has helped to open up the Western image of philosophy by engaging the Zen tradition The book reflects this particular trait of Ueda's philosophy but it also covers all thematic fields of his writings Contributions from both young and established scholars and

experts from Japan Europe and the U S make this a unique introduction to and reception of Ueda s philosophy Readers will discover discussions of mysticism in the East and West and consideration of modern philosophy topics including self awareness nature and poetic language The book also presents a focussed look at language and nothingness considering silence and nihilism Chapters allow the reader to understand the timeliness of a thinking that mediates and transcends the dichotomy of East and West This volume will appeal not only to scholars of Nishida Japanese philosophy mysticism and religious experience in Japan but also to scholars of Western philosophy especially those interested in Meister Eckhart Martin Heidegger and Martin Buber It makes an ideal introduction to Zen philosophy and presents important contributions to scholarship on language and experience
