Searching For The Secrets Of Nature:

Science and the Secrets of Nature William Eamon, 2020-06-30 By explaining how to sire multicolored horses produce nuts without shells and create an egg the size of a human head Giambattista Della Porta's *Natural Magic* 1559 conveys a fascination with tricks and illusions that makes it a work difficult for historians of science to take seriously Yet according to William Eamon it is in the how to books written by medieval alchemists magicians and artisans that modern science has its roots These compilations of recipes on everything from parlor tricks through medical remedies to wool dyeing fascinated medieval intellectuals because they promised access to esoteric secrets of nature In closely examining this rich but little known source of literature Eamon reveals that printing technology and popular culture had as great if not stronger an impact on early modern science as did the traditional academic disciplines

Translating Nature Jaime Marroquin Arredondo, Jaime Marroquín Arredondo, Ralph Bauer, 2019-05-10 *Translating Nature* recasts the era of early modern science as an age not of discovery but of translation As Iberian and Protestant empires expanded across the Americas colonial travelers encountered translated and reinterpreted Amerindian traditions of knowledge knowledge that was later translated by the British reading from Spanish and Portuguese texts Translations of natural and ethnographic knowledge therefore took place across multiple boundaries linguistic cultural and geographical and produced through their transmissions the

discoveries that characterize the early modern era In the process however the identities of many of the original bearers of knowledge were lost or hidden in translation The essays in *Translating Nature* explore the crucial role that the translation of philosophical and epistemological ideas played in European scientific exchanges with American Indians the ethnographic practices and methods that facilitated appropriation of Amerindian knowledge the ideas and practices used to record organize translate and conceptualize Amerindian naturalist knowledge and the persistent presence and influence of Amerindian and Iberian naturalist and medical knowledge in the development of early modern natural history Contributors highlight the global nature of the history of science the mobility of knowledge in the early modern era and the foundational roles that Native Americans Africans and European Catholics played in this age of translation Contributors Ralph Bauer Daniela Bleichmar William Eamon Ruth Hill Jaime Marroquín Arredondo Sara Miglietti Luis Millones Figueroa Marcy Norton Christopher Parsons Juan Pimentel Sarah Rivett John Slater *Nature, Empire, and Nation* Jorge Cañizares-Esguerra, 2006 This collection of essays explores two traditions of interpreting and manipulating nature in the early modern and nineteenth century Iberian world one instrumental and imperial the other patriotic and national Imperial representations laid the ground for the epistemological transformations of the so called Scientific Revolutions The patriotic narratives lie at the core of the first modern representations of the racialized body Humboldtian theories of biodistribution and views of the landscape as a historical text representing different layers of historical memory *Visual Cultures of Secrecy in Early Modern Europe* Timothy McCall, Sean Roberts, 2013-04-01 Secrets in all their variety permeated early modern Europe from the whispers of ambassadors at court to the emphatically publicized books of home remedies that flew from presses and booksellers shops This interdisciplinary volume draws on approaches from art history and cultural studies to investigate the manifestations of secrecy in printed books and drawings staircases and narrative paintings ecclesiastical furnishings and engravers tools Topics include how patrons of art and architecture deployed secrets to construct meanings and distinguish audiences and how artists and patrons manipulated the content and display of the subject matter of artworks to create an aura of exclusive access and privilege Essays examine the ways in which popes and princes skillfully deployed secrets in works of art to maximize social control and how artists printers and folk healers promoted their wares through the impression of valuable mysterious knowledge The authors contributing to the volume represent both established authorities in their field as well as emerging voices This volume will have wide appeal for historians art historians and literary scholars introducing readers to a fascinating and often unexplored component of early modern culture **The Lancet**, 1879 *Searching for the Secrets of Nature* Simon Varey, Rafael Chabrán, 2000 This collection of essays by historians of science and medicine and literary and textual scholars from several countries analyzes the achievements of Dr Francisco Hernández 1515-87 author of the monumental *The Natural History of New Spain* in the history of medicine and science in Europe and the Americas *Secrets of the Serpent, in Search of the Sacred Past, Special Revised Edition Featuring Two New Appendices* Philip

Rebecca M. Wilkin,2016-12-05 Grounded in medical juridical and philosophical texts of sixteenth and seventeenth century France this innovative study tells the story of how the idea of woman contributed to the emergence of modern science Rebecca Wilkin focuses on the contradictory representations of women from roughly the middle of the sixteenth century to the middle of the seventeenth and depicts this period as one filled with epistemological anxiety and experimentation She shows how skeptics including Montaigne Marie de Gournay and Agrippa von Nettesheim subverted gender hierarchies and or blurred gender difference as a means of questioning the human capacity to find truth while positivists who strove to establish new standards of truth for example Johann Weyer Jean Bodin and Guillaume du Vair excluded women from the search for truth The book constitutes a reevaluation of the legacy of Cartesianism for women as Wilkin argues that Descartes opening of the search for truth even to women was part of his appropriation of skeptical arguments This book challenges scholars to revise deeply held notions regarding the place of women in the early modern search for truth their role in the development of rational thought and the way in which intellectuals of the period dealt with the emergence of an influential female public **Vico and Joyce**

Donald Phillip Verene,1987-07-01 Joyce said My imagination grows when I read Vico as it doesn t when I read Freud or Jung This volume is the first extended examination of the connections between Vico and Joyce Joyce employed Vico s *New Science* as the basis of *Finnegans Wake* as he employed Homer s *Odyssey* as the basis of *Ulysses* In what ways are Vico and Joyce similar To what extent is Vico an influence on Joyce And in what ways can Vico s philosophy be newly understood when seen in relation to Joyce s use of it This book suggests ways to see both thinkers anew Vico and

Joyce is divided into three major parts Cycles and History in which Vico's famous conception of the course and recourse of historical events is examined in relation to Joyce's use of this idea in *Finnegans Wake* Joyce and Vico in which the relationship between the two thinkers is approached more from the side of Joyce than Vico Language and Myth in which the similarities of Vico's and Joyce's grasp of language and imaginative forms of thought are considered This book opens up a relationship and set of ideas whose time has come In the last decade there has been an exciting renaissance in the study of Vico that originated in the English speaking world and spread back to Italy Joyce has been the one major twentieth century figure through which most English readers have come to know something of Vico To consider them together opens up new avenues for our understanding of the imagination memory and the cyclic course of human history
