Searching For Human Origins:

Ancestors Donald C. Johanson, Lenora Johanson, Blake Edgar, 1994 A world renowned paleoanthropologist and author of *Lucy The Beginnings of Humankind* Donald Johanson attempts to solve the mystery of human evolution using new evidence uncovered on his recent forays into the fossil rich regions of Eastern Africa Companion volume to the upcoming Nova series 175 illus Maps

Southern Asia, Australia and the Search for Human Origins Robin Dennell, Martin Porr, 2014-02-24 This volume summarizes what is and is not known about the earliest evidence of our species outside Africa from Arabia to Australia Most books on the origins of modern human behavior and the expansion of our species across the world focus on evidence from Africa Europe and the Levant which have been extensively researched This book focuses instead on the important areas of southern Asia such as Arabia and India as well as evidence from Australia which deserve far wider attention than they have hereto received

Masters of the Planet Ian Tattersall, 2012-03-27 When *Homo sapiens* made their entrance 100 000 years ago they were confronted by a wide range of other hominids but shortly after their arrival something happened that vaulted the species forward This book is devoted to revealing just what made humans the indisputable masters of the planet

The Wisdom of the Bones Alan Walker, Pat Shipman, 1997-09-02 Fascinating As engaging an explanation of how scientists study fossil bones as any I have ever read John R Alden Philadelphia Inquirer In 1984 a team of paleoanthropologists on a dig in northern Kenya found something extraordinary a nearly complete skeleton of *Homo erectus* a creature that lived 1 5 million years ago and is widely thought to be the missing link between apes and humans The remains belonged to a tall rangy adolescent male The researchers called him Nariokotome boy In this immensely lively book Alan Walker one of the lead researchers and his wife and fellow scientist Pat Shipman tell the story of that epochal find and reveal what it tells us about our earliest ancestors We learn that Nariokotome boy was a highly social predator who walked upright but lacked the capacity for speech In leading us to these conclusions *The Wisdom of the Bones* also offers an engaging chronicle of the hundred year long search for a missing link a saga of folly heroic dedication and inspired science Brilliantly captures an intellectual odyssey One of the finest examples of a practicing scientist writing for a popular audience Portland Oregonian A vivid insider's perspective on the global efforts to document our own ancestry Richard E Leakey

Interrogating Human Origins Martin Porr, Jacqueline Matthews, 2019-12-06 *Interrogating Human Origins* encourages new critical engagements with the study of human origins broadening the range of approaches to bring in postcolonial theories and begin to explore the decolonisation of this complex topic The collection of chapters presented in this volume creates spaces for expansion of critical and unexpected conversations about human origins research Authors from a variety of disciplines and research backgrounds many of whom have strayed beyond their usual disciplinary boundaries to offer their unique perspectives all circle around the big questions of what it means to be and become human Embracing and encouraging diversity is a recognition of the deep complexities of human existence in the past and the

present and it is vital to critical scholarship on this topic This book constitutes a starting point for increased interrogation of the important and wide ranging field of research into human origins It will be of interest to scholars across multiple disciplines and particularly to those seeking to understand our ancient past through a more diverse lens In Search of Human Evolution Michael H. Crawford, 2024 In Search of Human Evolution focuses on sources of funding and fieldwork in Mexico Siberia Hungary and the Aleutian Islands It reviews how the evolutionary questions were generated grant proposals submitted to specific agencies and permissions obtained from each country and community This book also includes information on how the field research was organized data collected and graduate students and post docs trained The results of each of these investigations were statistically analysed and summarized *In Search of Origins* Garry Trompf, 2005-01-01 Religion is an integral part of our life The answer to the question what is religion is subjective Since the word religion and its cognates are common coinage across the literate world most of us will have a fair appreciation of the term's connotations Considering students and scholars alike are lacking an introductory textbook on the origins of religion in modern Western theory and archaeological practice this work is designed to fill the lacuna Historians of ideas and social science are often not clear as to how any given theory of religion might pertain to the known archaeological record while exponents of prehistoric religion have worked with surprisingly narrow definitions of religious life Many will locate the kernel of the matter in practice or in an active spirituality Today the pressures of the global village have forced many of us to take off our blinkers and do some cross cultural homework Religious Studies has emerged as an academic discipline or intellectual pursuit with one of its functions being to facilitate mutual understanding between traditions and to ensure that the varieties of religious belief and experience are fairly appraised The series of which this book is a part will be historically rather than theologically oriented This book will cover such a vast area for investigation and it is designed to help students find their own way through the forest pick the trees which interest them and learn how to scrutinise them in depth Religious Studies is a multi disciplinary activity and one is encouraged to turn over as many stones as possible to look at religions from as many different angles as possible the psychological anthropological sociological geographical ecological political economic and the like with some awareness of current theological debates as well This book gives scope to the comparative method and all the great religions are treated side by side with points of comparison and contrast drawn This book begins with the large question of the origins and prehistory of religion including the bearing anthropological study has on this question before giving space to the larger traditions themselves The comparative method is applied not only between such enormous aggregates of phenomena as let us say Buddhism and Islam but between these and small scale tribal traditions as well The book highlights that some religions will be difficult to separate from cultures because they amount to a total way of life An attempt is made to try to interpret religion both as culture and as a distinctive set of forces in interaction with culture or perhaps even against prevailing cultural forms This book has been designed to help students find for themselves possible answers to existential or

theological questions but only as a side effect to historical and phenomenological study and as the author says provide no such answers on a platter

Searching for Adam Dr. Terry Mortenson, 2016-10-01 Though there are a growing number of books out on Adam this one is unique with its multi author combination of biblical historical theological scientific archaeological and ethical arguments in support of believing in a literal Adam and the Fall A growing number of professing evangelical leaders and scholars are doubting or denying a literal Adam and a literal Fall which thereby undermines the gospel of Jesus Christ the Last Adam who came to undo the damaging consequences of Adam's sin and restore us to a right relationship with our Creator This book is increase your confidence in the truth of Genesis 1:11 and the gospel Enhance your understanding pertaining to the biblical evidence for taking Genesis as literal history Discover the scientific evidence from genetics fossils and human anatomy for the Bible's teaching about Adam Understand the moral spiritual and gospel reasons why belief in a literal Adam and Fall are essential for Christian orthodoxy

A Search for Origins Trefor Jenkins, Phil Bonner, Amanda Esterhuysen, 2007-10-01 A study of the Cradle of Humanity and its history The Cradle of Humankind COH bordering Gauteng and the North West Province was declared a World Heritage Site for the wealth of the human and animal fossils found there Research based on fossils found in the area as well as signs of early human habitation have shed new light on the evolution of humankind and on the significant role that southern Africa played in the development of modern humans A Search for

Origins aims to provide an overview of the history of the COH and of the important discoveries that have been made there for a non specialist audience A number of general accounts have been written which have concentrated on the palaeontological discoveries made there No systematic account written by specialists in their disciplines has however been published about the wider history of the COH and surrounding areas In particular no overview spanning the evolution of early plant and animal life human development and recent and colonial history as reflected in discoveries linked to the COH has been attempted This edited volume frames the scientific advances that have been made in the COH against the intellectual and political background out of which they emerged The multi disciplinary approach from a wide range of specialists is innovative and ground breaking

Prehistoric Humans in Film and Television Michael Klossner, 2015-01-09 From the early days of the movies cavemen have been a popular subject for filmmakers not surprisingly since the birth of cinema occurred only a few decades after the earliest scientific studies of prehistoric man Filmmakers however were not constrained by the emerging science instead they most often took a comedic look at prehistory a trend that continued throughout the 20th century Prehistoric humans also populated adventure fantasy films with the original One Million B C 1940 leading the charge Documentaries were also made but it was not until the 1970s that accurate film accounts of prehistoric humans finally emerged This exhaustive work provides detailed accounts of 581 film and television productions that feature depictions of human prehistory Included are dramas and comedies set in human prehistory documentaries and films and television shows in which prehistoric people somehow exist in historical periods from the advent of civilization up to the present or in extraterrestrial settings Each entry includes full filmographic data including year of release running time production personnel cast information and format A description of each film provides background on the prehistoric elements Contemporary critical commentary is included for many of the works

Elwyn Simons: A Search for Origins John G Fleagle, Christopher C. Gilbert, 2007-12-03 For nearly a half century Dr Simons has dominated the study of primate evolution This volume summarizes the current state of knowledge in many aspects of primate and human evolution that have been studied by Simons and his colleagues and place it in a broader paleontological and historical perspective The book contains the results of new research as well as reviews of many of the critical issues in primate and human evolution during the last half of the twentieth century

In Search of the Neanderthals Chris

Stringer, Clive Gamble, 1993 Portrayed as club wielding cavemen the Neanderthals have become the archetype of all that is primitive and uncultured But were the Neanderthals the ancestors of modern humans or an evolutionary dead end replaced by fully modern people from Africa The authors take the latter view in this highly readable book that provides the most up to date summary of knowledge about Neanderthals and their world Illustrations Seeking Good Debate Michael S.

Evans, 2016-02-16 Religion and science often appear to cause conflict in American public life But why This book reports the results from the first study to combine large scale empirical analysis of multiple religion and science debates with in depth research into what Americans actually want from public life The surprising finding is that apparent conflicts involving religion and science reflect a more fundamental conflict between media elites and ordinary Americans over what good debate should be raising profound questions about the future of the public sphere and American democracy Provided by publisher

Collecting, Processing and Presenting Geoscientific Information Martin H. Trauth, Elisabeth Sillmann, 2018-03-26 This second edition is an intensively revised and updated version of the book MATLAB and Design Recipes for Earth Sciences It aims to introduce students to the typical course followed by a data analysis project in earth sciences A project usually involves searching relevant literature reviewing and ranking published books and journal articles extracting relevant information from the literature in the form of text data or graphs searching and processing the relevant original data using MATLAB and compiling and presenting the results as posters abstracts and oral presentations using graphics design software The text of this book includes numerous examples on the use of internet resources on the visualization of data with MATLAB and on preparing scientific presentations As with the book MATLAB Recipes for Earth Sciences 4rd Edition 2015 which demonstrates the use of statistical and numerical methods on earth science data this book uses state of the art software packages including MATLAB and the Adobe Creative Suite to process and present geoscientific information collected during the course of an earth science project The book s supplementary electronic material available online through the publisher s website includes color versions of all figures recipes with all the MATLAB commands featured in the book the example data exported MATLAB graphics and screenshots of the most important steps involved in processing the graphics

Finding Ourselves after Darwin Stanley P. Rosenberg, Michael Burdett, Michael Lloyd, Benno van den Toren, 2018-07-17 A multinational team of scholars focuses on the interface between Christian doctrine and evolutionary scientific research exploring the theological consequences for the doctrines of original sin the image of God and the problem of evil Moving past the misperception that science and faith are irreconcilable the book compares alternative models to those that have generated faith science conflict and equips students pastors and anyone interested in origins to develop a critical and scientifically informed orthodox faith
