Season Of Renewal The Columbian Exposition And Victorian America:

A Season of Renewal Dennis B. Downey, 2001-11-30 This study offers an engaging reassessment of the 1893 Chicago World's Fair the Columbian Exposition generally regarded as the preeminent civic pageant in Victorian America Based on exhaustive research Downey uses the Exposition as a representative cultural symbol to challenge established interpretations of the event and to suggest a new approach to writing American cultural history Adopting the approach of culture as conversation he stresses the manner in which the Chicago fair reflected the main currents and conflicting tendencies in American life at the end of the 19th century Viewing the Exposition as a cultural moment Downey emphasizes the theme of renewal as central to the cultural aspirations of the enterprise and its engagement of public life Throughout the narrative the divergent voices that comprised a great cultural conversation on the salient issues of the day emerge through their presence at and participation in the Exposition This lively account offers new insights into the cultural climate of the period while introducing readers to the sheer majesty and splendor of an event that captivated the city and the nation more than a century ago

The Incorporation of America Alan Trachtenberg, Eric Foner, 1982 Alan Trachtenberg presents a balanced analysis of the expansion of capitalist power in the last third of the nineteenth century and the cultural changes it brought in its wake In America's westward expansion labor unrest newly powerful cities and newly mechanized industries the ideals and ideas by which Americans lived were reshaped and American society became more structured with an entrenched middle class and a powerful business elite This is a brilliant essential work on the origins of America's corporate culture and the formation of the American social fabric after the Civil War

Cartographies of Exile Karen Elizabeth Bishop, 2016-04-20 This book proposes a fundamental relationship between exile and mapping It seeks to understand the cartographic imperative inherent in the exilic condition the exilic impulses fundamental to mapping and the varied forms of description proper to both The vital intimacy of the relationship between exile and mapping compels a new spatial literacy that requires the cultivation of localized dynamic reading practices attuned to the complexities of understanding space as text and texts as spatial artifacts The collection asks what kinds of maps do exiles make How are they conceived drawn read Are they private maps or can they be shaped collectively What is their relationship to memory and history How do maps provide for new ways of imagining the fractured experience of exile and offer up both new strategies for reading displacement and new displaced reading strategies Where does exilic mapping fit into a history of cartography particularly within the twentieth century spatial turn The original work that makes up this interdisciplinary collection presents a varied look at cartographic strategies employed in writing art and film from the pre-Contact Americas to the Renaissance to late postmodernism the effects of exile in its many

manifestations on cartographic textual systems ways of seeing and forms of reading the challenges of traversing and mapping unstable landscapes and restrictive social and political networks and the felicities and difficulties of both giving into the map and attempting to escape the map that provides for exile in the first place Cartographies of Exile will be of interest to students and scholars working in literary and cultural studies gender sexuality and race studies anthropology art history and architecture film performance visual studies and the fine arts

who was first to Chicago and who won the Great Cowboy Race **The Body in the Anglosphere, 1880-1920** Robert W. Thurston, 2021-12-30 Focusing on the body in every chapter this book examines the changing meanings and profound significance of the physical form among the Anglo Saxons from 1880 to 1920 They formed an imaginary but in many ways quite real community that ruled much of the world Among them racism became more virulent To probe the importance of the body this book brings together for the first time the many areas in which the physical form was newly or more extensively featured from photography through literature frontier wars violent sports and the global circus Sex sexuality concepts of gender including women s possibilities in all areas of life and the meanings of race and of civilization figured regularly in Anglo discussions Black people challenged racism by presenting their own photos of respectable folk As all this unfolded Anglo men and women faced the problem of maintaining civilized control vs the need to express uninhibited feeling With these issues in mind it is evident that the origins of today s debates about race and gender lie in the late nineteenth century

The Disaster Experts Scott Gabriel

Knowles, 2012-07-02 In the wake of 9/11 and Hurricane Katrina many are asking what if anything can be done to prevent large scale disasters How is it that we know more about the hazards of modern American life than ever before yet the nation faces ever increasing losses from such events History shows that disasters are not simply random acts Where is the logic in creating an elaborate set of fire codes for buildings and then allowing structures like the Twin Towers tall impressive and risky to go up as design experiments Why prepare for terrorist attacks above all else when floods fires and earthquakes pose far more consistent threats to American life and prosperity *The Disaster Experts* takes on these questions offering historical context for understanding who the experts are that influence these decisions how they became powerful and why they are only slightly closer today than a decade ago to protecting the public from disasters Tracing the intertwined development of disaster expertise public policy and urbanization over the past century historian Scott Gabriel Knowles tells the fascinating story of how this diverse collection of professionals insurance inspectors engineers scientists journalists public officials civil defense planners and emergency managers emerged as the authorities on risk and disaster and in the process shaped modern America

Critical Theories, Radical Pedagogies, and Social Education, 2010-01-01 A refreshing collection of essays that offers a range of critical and radical voices which are generally marginalized in the critical social studies mainstream This collection is a good read with valuable insights that can impact teaching practice Canadian Social Studies Canada's National Social Studies Journal Volume 45 Issue 1 Award American Educational Studies Association AERA Critics Choice Book Award 2011 This edited collection begins with the assertion that there are emergent and provocative theories and practices that should be part of the discourse on social studies education in the 21st century Anarchist eco activist anti capitalist and other radical perspectives such as disability studies and critical race theory are explored as viable alternatives in responding to current neo conservative and neo liberal educational policies shaping social studies curriculum and teaching Despite the interdisciplinary nature the field and a historical commitment to investigating fundamental social issues such as democracy human rights and social justice social studies theory and practice tends to be steeped in a reproductive framework celebrating and sustaining the status quo encouraging passive acceptance of current social realities and historical

constructions rather than a critical examination of alternatives These tendencies have been reinforced by education policies such as No Child Left Behind which have narrowly defined ways of knowing as rooted in empirical science and apolitical forms of comprehension This book comes at a pivotal moment for radical teaching and for critical pedagogy bringing the radical debate occurring in social sciences and in activist circles where global protests have demonstrated the success that radical actions can have in resisting rigid state hierarchies and oppressive regimes worldwide to social studies education

Contesting the Past, Reconstructing the Nation Ben Railton, 2007-09-30 In this study of Gilded Age literature and culture Ben Railton proposes that in the years after Reconstruction America's identity was often connected through distinct and competing conceptions of the nation's history Concerned with key social questions such as race Native Americans women and the South *Contesting the Past Reconstructing the Nation* provided close readings of a number of texts for the ways they highlight these issues This book examines established classics newer additions to the canon largely forgotten best sellers recovery gems and autobiographical works by Douglass and Truth poems by Harper and Piatt and short stories by Woolson and Cooke These readings contribute to ongoing conversations over historical literature's definition and value and a greater understanding of not only American society in the Gilded Age but also debates on our shared but contested history that remain very much alive in the present From publisher's description *Earth Into Property* Tony Hall, 2010 A broad exploration of the colonial roots of global capitalism and the worldwide quest of Indigenous people for liberation through decolonization

Mystery and Marvel John Henry Hepp, 2024-11-30 First book on the Centennial in nearly four decades offering a new insight into this seminal event The Centennial was America's first world's fair taking place only twenty five years after the first international exposition in London The exhibition was a paean to progress by people fascinated by science and technology The organizers largely leading Pennsylvania industrialists and merchants wanted to show the world that the United States was as advanced as any nation in Europe and for the most part their plan succeeded Everyday Americans attended the fair to be reassured of their nation's economic and technological past present and future

Mystery and Marvel looks at the 1876 Centennial Exposition through the eyes of the ten million visitors to the fair to help us understand the technological enthusiasm of middle class Victorians. Although this enthusiasm was not unbounded and was occasionally tinged with a combination of nostalgia and uncertainty, overall the women and men of the late nineteenth century were usually happy to be part of a world they thought was as modern and as cutting edge as the one we live in today. In and around the buildings that appeared in the city's Fairmount Park that spring and summer were the physical embodiments of this culture. The sights, the sounds, and even the smells of the exhibition presaged the coming of a modern America. In 1876 Philadelphia was the nation's largest manufacturing city and Pennsylvania one of the most important industrial states. The exposition can serve as a wonderful lens to examine America's shift from the young agricultural republic of 1800 to the industrial empire of 1900.
