*Venus' Owne Clerk* B.W. Lindeboom, 2007-01-01 Venus Owne Clerk Chaucer's Debt to the Confessio Amantis will appeal to all those who value a bit of integration of Chaucer and Gower studies It develops the unusual theme that the Canterbury Tales were signally influenced by John Gower's Confessio Amantis resulting in a set up which is entirely different from the one announced in the General Prologue Lindeboom seeks to show that this results from Gower's call at the end of his first redaction of the Confessio for a work similar to his a testament of love Much of the argument centres upon the Wife of Bath and the Pardoner who are shown to follow Gower's lead by both engaging in confessing to all the Seven Deadly Sins while preaching a typically fourteenth century sermon at the same time While not beyond speculation at times the author offers his readers a well documented and tantalizing glimpse of Chaucer turning away from his original concept for the Canterbury Tales and realigning them along lines far closer to Gower

**Chaucer and the Cult of Saint Valentine** M.J. Kelly, 2024-11-25 **Chaucer and the Cult of Saint Valentine** Henry Ansgar Kelly, 1986 **Folk-taxonomies in Early English** Earl R. Anderson, 2003 A folk taxonomy is a semantic field that represents the particular way in which a language imposes structure and order upon the myriad impressions of human experience and perception Thus for example the experience of color in modern English is structured around an inventory of twelve basic color terms but languages vary in the number of basic color terms used from

thirteen or fourteen terms to as few as two or three Anthropological linguists have been interested in the comparative study of folk taxonomies across contemporary languages and in their studies they have sometimes proposed evolutionary models for the development and elaboration of these taxonomies The evolutionary models have implications for historical linguistics but there have been very few studies of the historical development of a folk taxonomy within a language or within a language family Folk Taxonomies in Early English undertakes this task for English and to some extent for the Germanic and Indo European language families The semantic fields studied are basic color terms seasons of the year geometric shapes the five senses the folk psychology of mind and soul and basic plant and animal life forms Anderson s emphasis is on folk taxonomies in Old and Middle English and also on the implications of semantic analysis for our reading of early English literary texts
