

Introduction

Many people consider themselves to be either hand or machine embroiderers while others combine the two successfully. With a mixture of the two techniques we have a vast and exciting palette at our disposal. Most typically this is worked by machine stitching into a background with hand stitching used to further embellish the piece.

In this booklet we will look at TWO quite distinct approaches to combining hand and machine stitching in dynamic ways that can offer vigorous and dimensional surfaces as well as subtle and fragile effects. Both methods are capable of being worked in limitless ways to produce practical or wall hung textiles. They are also relatively unexplored and very versatile.

Following our philosophy of giving pointers and guidelines we hope to encourage you to consider our suggestions in the first instance before developing them in your own style. This is just the tip of the iceberg and we hope there are enough tantalising samples to encourage you to try for yourself with many more avenues to follow.

Inside Front Cover:

A simple machined grid of straight stitches darned with a range of knitting tapes, fabric strips and embroidery silks in matt, shiny and metallic textures.

Right:

Machined straight stitch lines and circular shapes decorated with straight and buttonhole stitches plus the addition of tiny crystal beads.

Useful Pointers

The most useful advice we can give to anyone anticipating working with their machine is to get to know it and be comfortable handling the basic functions. The techniques we are developing are relatively simple and require the minimum of adjustments.

- Large top stitch needles either 100 or 110 (not less than 90) will help.
- Initially select a good-tempered thread and one that you know works well for you and your machine.
- Wooden circular frames with bound inner frames make for ease of working.
- Although many people work with a foot attachment we both advocate the use of a darning foot to stabilise the fabric and avoid thread breakage. There are excellent darning feet that allow maximum visibility available for most machines.
- If you are new to free motion stitching then follow the makers instructions for setting up the machine and first experiment with spirals or other rhythmic patterns on a firm fabric held taut in frame.
- We both keep ongoing notebooks with samples and suggest that all samples could be kept in a small notebook with simple notes on tensions etc as you go.
- If you really do not need any more samples then they would make delightful cards etc (see 'Giving Pleasure' - book 8).

Armed with these simple guidelines we are ready to proceed.
