New Federations Experiments In The Commo:

The Iraqi Federation Farah Shakir, 2017-02-17 Political instability has characterised the modern history of Iraq which has proven itself as a complex state to govern. However the creation of a federal system in 2005 offers the potential for change and a deviation from a past characterised by authoritarian government brutality and war. The Iraqi Federation explores why and how Iraq became a federal state and analyses how the process of formation impacts on the operation of the Iraqi federal system. It argues that the different approaches taken by various federal theorists in the past particularly William H Riker's bargain theory are insufficient to explain the formation of the Iraqi federation completely. The process of the establishment of a federal Iraq must be understood in the context of its unique history and cultural specificity as well as in the context of the other new federal models that have appeared since the end of the Cold War including Belgium the Russian Federation Ethiopia Bosnia and Herzegovina and Nigeria. Drawing on interviews with contemporary political players in Iraq this book helps to deepen our understanding of how one of the newest federal states operates in a practical sense. By linking the new federal models to the classic federal theory it also provides a unique contribution to theories on federal state formation. It will therefore be of great interest to students and scholars of Middle East Politics as well as those studying Federalism.

Constitutional Crisis in the States in India Meera Srivastava, 1980 Federalizing Europe? Joachim Jens Hesse, Vincent Wright, 1996 This constitutional and institutional development of the European Community and federalism in particular are widely and intensely debated. The issue of federalism has proved to be divisive and misunderstood. This book provides a critical reappraisal of the political economic and socio cultural potential of current federal political institutional arrangements. It includes both an analysis of their necessary preconditions as well as evaluation of their advantages and disadvantages compared with other forms of state organisation. The authors examine the issue at the level of the Community the member states and the states of Central and Eastern Europe reflecting the increasing interdependence and interplay of these three levels nation states in all parts of Europe influencing only one another and the Community and being influenced by it. The book concludes with an overall assessment of the federalizing processes at work in Europe both at the Community and nation state level and pints out the problems paradoxes and likely outcomes of these processes. *Public Finance, Planning and Economic Development* Ursula Kathleen Hicks, 1973 Part 1 deals with theoretical and conceptual issues in the field of public finance. Part 2 concerns fiscal policy and development finance while in part 3 fiscal federalism is dealt with. In part 4 the budget organisation and budgetary problems in socialist planned economies are explored. Part 5 brings two essays on economic policy and planning at the central and local levels. *Diversity and Unity in Federal Countries* Luis Moreno, César Colino, 2010-07-01 In *Diversity and Unity in Federal Countries* leading scholars and practitioners analyse the current political socio economic spatial and cultural diversity in the countries under consideration before delving into the role that social historical and political factors have had in shaping the balance of diversity and unity. The authors assess the

value placed on diversity by examining whether present institutional arrangements and public policies restrict or enhance diversity and address the future challenges of balancing diversity and unity in an increasingly populated and mobile world
