New Frontiers In International Communication Theory:

New Frontiers in International Communication Theory Mehdi Semati, 2004-04-02 *New Frontiers in International Communication Theory* offers a wide ranging assessment of the present state of the field of international communication and charts new directions for theory and research. It brings together renowned and emerging scholars who challenge the field to move beyond the limits of existing formulations, approaches and trajectories, providing an alternative and a supplement to traditional approaches in analysis and study. In rethinking the central problematics of the field, exploring established and new tools and models of inquiry and articulating new research agendas, this interdisciplinary collection anticipates the future of international communication studies. *New Frontiers in International Communication Theory* Mehdi Semati, 2004-10-26

Hamid Mowlana, 1997-05-05 The new edition of this major work offers a comprehensive analysis of international communication systems and the global flow of information. Hamid Mowlana places the analysis of global mass media and other forms of communication within a critical overview of international and intercultural relations. Extensively rewritten and revised, *Global Information and World Communication* deals with the phenomenon of global information flow in all contexts: political, economic, cultural, technological, legal and professional. Mowlana illustrates how different communication strategies and systems have contributed to the creation of powerful interests and have altered the global scene. He takes into account recent events and shows

Global Communications Paula Chakravartty, Yuezhi Zhao, 2008 This provocative book takes a new approach toward understanding the uneven flows of global communications. Rather than guiding its discussion by geography, types of media or traditional separations of power and resistance, *Global Communications* examines political, economic power and communication in relation to historically specific encounters with modernity. It underscores lived experiences in its approach to globalization, showing that the state and the market can both be sites of empowerment, just as civil society might also be a site of repression. Taking a political economic analysis of communication and culture, this dynamic group of international authors looks beyond developments in the North American information and culture industries to map new forms of citizenship and exclusion. The chapters spotlight China, Ghana, India, Japan, Palestine, Russia, Singapore and Venezuela, and foreground the transnational formations of the European Union, the pan Arab and Spanish speaking markets, and civil society actors in sub-Saharan Africa, the Middle East and North America. Theoretically driven and empirically

grounded Global Communications defines communication broadly to include production circulation and consumption and addresses urgent questions about the inequalities of globalization and the possibilities of hybrid cultural forms and practices
