thriving community in the heart of the central city The obstacles to the evolution of Dearborn Park were quite formidable including a succession of six mayors huge economic impediments policy disputes engendered among people used to making their own corporate decisions the wretched reputation of the South Loop problems with the Chicago public school system and public mistrust of a project supported by the wealthy no matter how altruistic the goal It took twenty years and millions of dollars but it will pay off and in fact is paying off right now With Dearborn Park Chicago left a formula that other cities can use to turn fallow land into vibrant neighborhoods without big government subsidies As Wille explains the realization of this vision requires shared investment and shared risk on the part of local businesses financial institutions and government It links private and public influence and capital Wille explains how these elements worked together to build a neighborhood in a blighted tract of Chicago s Loop She also describes how key decisions affecting the public interest were made during a time of profound change in the city s political life Dearborn Park was conceived during the final years of the most powerful political machine in America and had to adapt as that machine crumbled and city government was reshaped

**Regeneration** Great Britain: Parliament: House of Commons: Communities and Local Government Committee,2011-11-03 The Government set out its new approach to regeneration in Regeneration to enable growth What Government is doing in support of community led regeneration DCLG But the document gives the Committee little confidence that the Government has a clear strategy for addressing the country s regeneration needs It lacks strategic direction and is unclear about the nature of the problem it is trying to solve It focuses overwhelmingly upon the achievement of economic growth giving little emphasis to the specific issues faced by deprived communities and areas of market failure The proposed measures are unlikely to bring in sufficient resources Funding for regeneration has been reduced dramatically and disproportionately over the past two years and unless alternative sources can be found there is a risk of problems being stored up for the future Also lacking is a strategy for attracting private sector investment And the document gives too much prominence to changes to the planning system and does not acknowledge the benefits effective planning has brought to regeneration The financial and economic climate has impacted dramatically upon regeneration but the withdrawal of Housing Market Renewal Funding in particular has created significant problems leaving many residents trapped in half abandoned streets The Committee suggests a number of measures that could as part of a wider approach contribute to stimulating regeneration and incentivising private sector involvement The Government should now produce a national regeneration strategy which sets out a coherent approach to tackling deprivation and market failure in the country s most disadvantaged areas
