Inhorn, 2012-03-25 Middle Eastern Muslim men have been widely vilified as terrorists religious zealots and brutal oppressors of women The New Arab Man challenges these stereotypes with the stories of ordinary Middle Eastern men as they struggle to overcome infertility and childlessness through assisted reproduction Drawing on two decades of ethnographic research across the Middle East with hundreds of men from a variety of social and religious backgrounds Marcia Inhorn shows how the new Arab man is self consciously rethinking the patriarchal masculinity of his forefathers and unseating received wisdoms This is especially true in childless Middle Eastern marriages where contrary to popular belief infertility is more common among men than women Inhorn captures the marital moral and material commitments of couples undergoing assisted reproduction revealing how new technologies are transforming their lives and religious sensibilities And she looks at the changing manhood of husbands who undertake transnational egg quests set against the backdrop of war and economic uncertainty out of devotion to the infertile wives they love Trenchant and emotionally gripping The New Arab Man traces the emergence of new masculinities in the Middle East in the era of biotechnology

India has witnessed a transformative shift in women's roles and impact across various sectors over the past decade. From agriculture to aeronautics, business to battlefields, classrooms to corporate offices, and playgrounds to parliament, women have redefined gender equality narratives nationwide. This book celebrates this indomitable spirit, exploring women's struggles, triumphs, and significant contributions in shaping modern India. It reflects the evolving influence of women in contemporary Indian society and celebrates their achievements in diverse fields. This book highlights how Indian women have begun to tap into this vast potential, driving a paradigm shift. Each chapter honours women who have challenged societal norms, driven economic growth, and defied conventions. PM Modi's vision of women as nation builders is evident in the recent law reserving 33% of parliamentary seats for women and initiatives like Lakhpati Didi and Drone Didi, empowering female entrepreneurs and revolutionising agriculture. Empowered women contribute significantly to economic growth, break poverty cycles, and enhance community decision-making, essential for realising India's full potential. A real tribute to the untiring efforts of our empowered women. **Infertility** Renate D. Klein, 2024-11-20

Originally published in 1989, *Infertility* looks at how fertility treatments fail women. At the time, there was disturbing evidence of medical malpractice and invasive technologies which violated women's bodies and took a heavy toll on their lives. Here, for the first time, women from all over the world tell their own stories about the pain and stigma of infertility, never-ending cycles of drugs and hormone injections, the trauma of the test tube baby method, IVF, their unmet hopes when technology fails, yet again, the damage caused by experimental medicine and surgery, how they have been exploited as so-called surrogate mothers. These shocking stories shattered the myths of benevolent doctors working in the interests of women. The women who speak out in this book offer support and suggest alternative strategies for other people with fertility problems. Their experiences show that we urgently need to resist the false promise of reproductive technologies if all women are not to become test sites for medical experimentation and scientific ambition. Still often discussed today, it is considered a classic in the field. *Gender and Health* Jyoti Prasad

reproductive technologies working hazards widowhood and urbanization upon women s health Along with these issues like women s reproductive health awareness life expectancy etc has also been covered A gender perspective has been employed while addressing these various aspects As the articles have been brought in from the various parts of India under their purview the heterogeneity of the problems associated with women s health in India has been made explicit
