their governmental obligations while maintaining their commitment to outreach and advocacy for sex workers rights as well as broader sociopolitical change Drawing on multimethod qualitative research Majic outlines the strategies that CAL PEP and SJI employ to balance the conflicting demands of service and advocacy which include treating sex work as labor with legitimate occupational health and safety concerns empowering their clients with civic skills to advance their political commitments outside the nonprofit organization and conducting and publishing research and analysis to inform the public and policymakers of their constituents needs Challenging the assumption that activists must sell out and abandon radical politics to manage formal organizations Majic comes to the surprising conclusion that it is indeed possible to maintain effective advocacy and key social movement values beliefs and practices even while partnering with government agencies Sex Work Politics significantly contributes to studies of transformational politics with its nuanced portrait of nonprofits as centers capable of sustaining political and social change

The Politics of Water Institutional Reform in Neo-Patrimonial States Jenniver Sehring, 2009-01-30 There is more than enough water in the world for domestic purposes for agriculture and for industry In short scarcity is manufactured through political processes and institutions United Nations Human Development Report 2006 3 Water scarcity water crisis water wars since the beginning of the 1990s these terms have appeared again and again in scientific debates political strategies and media reports Water is perceived as a scarce resource

that needs efficient management in order to satisfy all needs and to prevent violent conflicts over its distribution. Considerable research has been devoted to this topic. In this research, water is commonly referred to as a common pool resource, a non-excludable public good with rivalry in terms of consumption. Hence, research has long focused on collective action problems in managing this common pool resource, e.g., Ostrom 1990, 1992. In recent years, anthropological and sociological scholars, in particular, have criticized that in these studies the complexity of water, its embeddedness in a wider cultural and social context, and the role of power have been neglected. Water is different from other natural resources in some important aspects: its mobility, its variability, and its multiplicity. Mehta 2006, 2f; Linton 2006, 10. Mobility makes ownership claims difficult. Water moves transcending state borders, not fixed like other resources. Variability refers to the fact that its availability varies temporarily depending on weather conditions.
